General Features of the Grade 8 Intermediate-Level Science Test

The Regulations of the Commissioner of Education provide that an intermediate-level science test is to be administered in Grade 8 to serve as a basis for determining students' need for academic intervention services in science. The Grade 8 Intermediate-Level Science Test is designed to measure the content and skills contained in the *Intermediate-Level Science Core Curriculum, Grades 5–8*. The core curriculum is based on the *New York State Learning Standards for Mathematics, Science, and Technology*.

The New York State Grade 8 Intermediate-Level Science Test consists of two required components: a Written Test and a Performance Test. The Written Test consists of multiple-choice and open-ended questions. Students will have two hours in which to complete the Written Test. The Performance Test (Form A) consists of hands-on tasks set up at three stations. Students will have 15 minutes to complete the tasks at each of the three stations, for an actual total testing time of 45 minutes. Teachers will need additional time for both the Written and Performance Tests to set up, distribute, and collect test materials and to provide instructions to students.

The Department establishes a State-designated level of performance to help schools identify students who must receive academic intervention services. All students who earn a final test score below 65 must be provided such services, which must commence in the semester immediately following the administration of the test.

The first section of this manual contains information of special interest to administrators. Subsequent sections contain information on test preparations and other guidelines along with directions for administering and scoring the Written and Performance Tests.

Information for School Administrators

General Information

All school personnel who will be involved in the administration and scoring of the Grade 8 Intermediate-Level Science Test should have a copy of, and be familiar with, the information in this manual. The manual may be photocopied by the school as needed. In addition, please check the Office of State Assessment's web site periodically at: <http://www.emsc.nysed.gov/osa/elintsci.html>. Schools may submit questions concerning the administration of the Grade 8 Intermediate-Level Science Test via e-mail at emscassessinfo@mail.nysed.gov.

Pursuant to Section 102.3 of the Regulations of the Commissioner of Education, "Building principals are responsible for administering department examinations and maintaining the integrity of examination content and programs, in accordance with directions and procedures established by the commissioner."

Test Forms

Written Test: The Written Test booklet has two parts and should be administered in one sitting. Part I contains multiple-choice questions, and Part II contains open-ended questions. Students are allowed two hours of working time to complete the Written Test. In addition, the test administrator will need approximately 15 minutes to give directions to students. The Department will provide a new form of the Written Test each year. All schools must use an answer sheet developed by a Regional Information Center (RIC) or large-city scanning center. Students write their answers to the questions in Part II of the test in the test booklet.

Performance Test, Form A: The Performance Test consists of tasks at three stations. Each station requires 15 minutes of testing time, for a total testing time of 45 minutes, plus the time needed to provide instructions to students and for students to move between stations. Allot at least one hour for administration of the Performance Test. The Performance Test is hand scorable only. Students write their answers to the questions on the Performance Test in the test booklet.

Administration Schedule

The Grade 8 Intermediate-Level Science Performance Test must be administered between May 24, 2010 and June 3, 2010. The specific date (within that timeframe) when the test is administered is a local decision. The Written Test must be administered on June 7, 2010. Students who are absent for the Performance Test on the specific administration date established by the school must be tested when they return to school, but no later than June 3. Similarly, students who are absent for the Written Test on June 7, must be tested when they return to school, but no later than June 9. Answer sheets for such students must be submitted to the scanning center.

Students to be Tested

General Education Students

The Grade 8 Intermediate-Level Science Test must be administered to all public school students. This test is part of the State's accountability system under the No Child Left Behind Act (NCLB). The failure of a public school to administer this test and/or to report the test results to the Department can have an impact on the school's accountability status. Nonpublic schools are strongly encouraged to

administer State assessments. The rules pertaining to the inclusion in this test of English language learners and of students with disabilities apply to students in public and participating nonpublic schools. (See Appendix VII, "Information on Ungraded Students.")

The Grade 8 Intermediate-Level Science Test should be administered to students in the grade in which they will have completed all of the material in the *Intermediate-Level Science Core Curriculum, Grades 5–8*. While this grade is typically Grade 8, the test may also be administered to students in Grade 7 who will have completed by the end of this school year all of the material in the *Intermediate-Level Science Core Curriculum, Grades 5–8* and are being considered for placement in an accelerated high school level science course when they are in Grade 8. The inclusion of Grade 7 students who meet these criteria is a local decision. Schools can use the scores for these Grade 7 students to help determine whether students should be placed in accelerated science courses. Students who take the test in Grade 7 will not be permitted to take the test again in Grade 8. Therefore, caution is advised in administering the test to Grade 7 students. If a Grade 7 student scores below the State-designated level of performance, the student will be required to have academic intervention services the following year.

Schools are required to administer this assessment to those Grade 8 students who did not take this assessment last school year as Grade 7 students, unless such students will be taking a Regents Examination in science at the end of this school year. School principals have the discretion to either require or waive the Grade 8 Intermediate-Level Science Test for those accelerated Grade 8 students who did not take this examination during the last school year but who will be taking a Regents Examination in science at the end of this school year. For those accelerated students for whom the school waives the Grade 8 Intermediate-Level Science Test, the student's achievement in science will be measured by the student's performance on the Regents Examination in science.

Students who are repeating Grade 8 are required to take the test again.

English Language Learners

All English language learners are required to participate in the Grade 8 Intermediate-Level Science Test. English language learners may take the test either in an alternative language or in English, whichever would be better for the student. English language learners may also use both an English and an alternative language edition of the test simultaneously. Alternative language editions of the test are provided in Chinese (Traditional), Haitian Creole, and Spanish. Information about administering these translated editions is included on page 17 under "Test Materials." The test may be translated orally into other languages for those English language learners whose first language is one for which a written translation is not available from the Department. Schools are permitted to offer English language learners specific testing accommodations when taking this test (see page 6).

Students with Disabilities

The Committee on Special Education (CSE) must decide for each student with a disability, on a case-by-case basis, whether the student will be participating in the Grade 8 Intermediate-Level Science Test or will not be participating in this assessment because the student is participating in the New York State Alternate Assessment (NYSAA) for students with severe disabilities. The CSE's decision must be documented on the student's Individualized Education Program (IEP). The criteria that the CSE must use to determine a student's eligibility to participate in the NYSAA are available at the web site: <http://www.vesid.nysed.gov/specialed/alterassessment/alterassess.htm>. Students participating in the NYSAA should be coded as eligible for the Alternate Assessment on the Grade 8 Intermediate-Level Science Test answer sheet.

When determining which students will be participating in this test, be sure to consider those students with disabilities who attend programs operated by the Board of Cooperative Educational Services (BOCES) as well as any other programs located outside the school.

Medically Excused. A student may be medically excused from testing if documentation from a medical practitioner is obtained and kept on file at the school indicating that the student is too incapacitated to test at the school, at home, or in a medical setting.

Testing Accommodations

Students Who Incur Disabilities Shortly Before Test Administration

Principals may provide accommodations when testing general education students who incur an injury (e.g., broken arm) or experience the onset of either a short or long-term disability (either cognitive or physical) within 30 days prior to test administration. Eligibility for such accommodations is based on the principal's professional judgment. The principal may confer with CSE/504 Multi-Disciplinary team members, the school physician, or other school personnel in making such a determination. These accommodations must not significantly change the constructs/skills being tested and are limited to the following:

- extending the time limit for a test,
- administering the test in a special location,
- recording the student's answers in any manner, and
- reading the test to a student (only for a student whose vision is impaired).

Prior permission need not be obtained from the Department to authorize testing accommodations for general education students. However, a full written report concerning each authorization must be sent to the Office of State Assessment via fax to 518-474-1989. The report must be on school letterhead, must be signed by the principal, and must include the following information:

- the name of the student,
- the title of the test,
- a brief description of the student's injury or disability, and
- a listing of the accommodations that were authorized by the principal.

If the student is expected to continue to need testing accommodations, the principal must immediately make the appropriate referral for the consideration of an IEP or Section 504 Accommodation Plan (504 Plan).

Students with Disabilities

Students with disabilities must be provided with the testing accommodations specified in their IEPs or 504 Plans when taking this test. It is the principal's responsibility to ensure that this occurs and that those staff who will be providing these testing accommodations are appropriately trained. Please advise proctors to become familiar with the accommodations specific to the particular test being administered. As explained on page 4 in this manual, only those testing accommodations that do not alter the constructs measured by the test are permitted on elementary- and intermediate-level State assessments. Students who have been declassified may continue to be provided testing accommodations if recommended by the local CSE at the time of declassification and it is written in

the student's declassification IEP. Plan all necessary arrangements for implementing testing accommodations well in advance of the test dates.

The Department's Office of Vocational and Educational Services for Individuals with Disabilities (VESID) provides more information on test access and accommodations for students with disabilities on its web site: <http://www.vesid.nysed.gov/specialed/publications/policy/testaccess/policyguide.htm>. You may contact that office via e-mail at: vesidspe@mail.nysed.gov if you have questions on this topic for which you are unable to find answers on the web site.

Use of Scribes or Tape Recorders and Large-Type or Braille Editions

Instead of using a scribe, the Department encourages the use of a word processor (with dictionary disabled), as most students have some experience with computers, and word processing allows the student more control over his or her environment, fosters independence, and is less labor-intensive than using a scribe. However, the use of scribes and the use of tape recorders are allowable accommodations for the Grade 8 Intermediate-Level Science Test. Note the following procedures for scribing:

- The scribe must record word-for-word what the student dictates or records.
- The scribe must use lined paper and must write on every other line.
- The student must read the complete dictation/transcription and indicate on the skipped lines any further changes to be transcribed.
- The scribe must then transfer the student's completed response into the test book exactly as dictated or recorded and should attach the lined paper with the student's dictation to the back of the test booklet, preferably by stapling, to ensure against the student's response being lost.

For students who use large-type or braille editions of the tests, or large-type answer sheets, teachers should transcribe the students' responses onto regular test answer sheets and test books exactly as dictated or recorded.

Format Changes

Any format changes to the text to be made by the school, such as the re-spacing of questions, enlargement beyond the standard large-type edition provided, colorization, etc., must receive prior written approval from the Department. Note that the reformatting of State assessments may never change the wording of questions, nor may additional examples be included.

In order for the Department to process requests for reformatting by the school, requests for approval should be submitted to the Office of State Assessment at least one week before the first scheduled date of the test administration. Requests should include a letter from the school signed by the school principal. Each request must include the portion of the student's IEP in which the type of reformatting is listed or defined. Requests may be faxed to 518-474-1989. Department approvals will be provided by fax. However, regardless of approval, under no circumstances may the shrink-wrapped test packages of State assessments be opened prior to the morning of the day that the test is to be administered in the school.

English Language Learners

Schools may provide the following testing accommodations to English language learners.

- ***Time Extension:*** Schools may extend the test time for English language learners. Principals may use any reasonable extensions, such as “time and a half” (the required testing time plus one-half of that amount of time), in accordance with their best judgment about the needs of the English language learners. Principals should consult with each student’s classroom teacher in making these determinations.
- ***Separate Location:*** Schools are encouraged to provide optimal testing environments and facilities for all students. They may administer State tests to English language learners individually or in small groups in a separate location.
- ***Bilingual Dictionaries and Glossaries:*** English language learners may use bilingual dictionaries and glossaries when taking this test. The bilingual dictionaries and glossaries may provide *only* direct translations of words. Bilingual dictionaries or glossaries that provide definitions or explanations are *not* permitted.
- ***Translated Editions:*** English language learners may be provided with a translated edition of the Grade 8 Science Test. This test is available in Chinese (Traditional), Haitian Creole, and Spanish. In addition, English language learners may use both an English and an alternative language edition of the test simultaneously. However, they should be carefully instructed to record all of their responses in only one of the two editions. The alternative language edition used by the student should be so indicated on the student’s answer sheet.
- ***Oral Translation for Lower Incidence Languages:*** Schools may provide English language learners with an oral translation of this test when there is no translated edition provided by the Department. All translations must be oral, direct translations of the English editions; written translations are not allowed. No clarifications or explanations may be provided. Translators should receive copies of the English edition of the tests one hour prior to administration. The Department’s Office of Bilingual Education and Foreign Language Studies (telephone 518-474-8775) and the Bilingual/ESL Technical Assistance Centers (BETACs) can assist schools in locating suitable translators. A list of BETACs is available at: <http://www.emsc.nysed.gov/biling/bilinged>.
- ***Writing Responses in the Native Language:*** English language learners may write their responses to the open-ended questions in their native language. Scoring the tests is the responsibility of the school. However, the Department’s Office of Bilingual Education and Foreign Language Studies and the BETACs can assist schools in locating persons who can translate the students’ responses into English to facilitate scoring of the answer papers.

Former English Language Learners

Schools may provide the testing accommodations listed above under the heading “English Language Learners” only to those former English language learners who were identified as English language proficient based on their scores on one of the two most recent administrations of the New York State English as a Second Language Achievement Test (NYSESLAT), either Spring 2008 or

Spring 2009. These accommodations may not be provided to former English language learners who were identified as English language proficient prior to the 2008 NYSESLAT administration.

For each English language learner or eligible former English language learner, darken the circles on the answer sheet in the box labeled "ELL Accommodations" to indicate the testing accommodations provided.

Security of the Tests

Prior To Testing

Secure test materials will arrive about two to three school days before testing at the secure facility designated by the principal via the online Examination Request System. Prior to these delivery dates, the principal should make arrangements to be notified when the test materials arrive.

Safeguarding Test Materials

The sealed packages of secure test materials must be stored in a secure place at the location indicated on the Examination Storage Plan submitted to the Department. As soon as practical after delivery an inventory of the test materials must be conducted. Except while taking inventory, the sealed packages of secure test materials must be kept inside the secure location. The school principal must notify the Department in writing via fax to 518-474-1989 if any of the packages of secure test materials are not properly sealed when received. The sealed packages of secure test booklets may *not* be opened until the test administration date, and then just early enough to permit the distribution of booklets prior to the scheduled starting time.

All Written Test booklets, both used and unused, and all scoring keys and rating guides must be held secure from the date the school receives its shipment of examination materials through June 9, 2010. While schools may score the student answer papers before the end of this period, caution raters not to discuss the test content and scoring rubrics except during scoring sessions. Once the Department-designated test administration period has ended, the Written Test materials are no longer considered secure.

All Performance Test materials must be held secure except during the actual administration and scoring of the Performance Test. The same Performance Test (Form A) will be administered for several years, and all Performance Test materials *except* student answer papers are to be returned to the Department.

To preserve security, advise all teachers administering and scoring this test that they are not to discuss test questions or other specific test content online via e-mail or listserv or through any other electronic means.

Examination Certificates

All teachers who assist in the administration and scoring of the Grade 8 Intermediate-Level Science Test are expected to sign the Deputy and Proctor Certificate and the Examination Scoring Certificate contained within the *New York State Grade 8 Intermediate-Level Science Test Manual for Administrators and Teachers*. Similarly, principals are required to complete and sign the Examination Storage Certificate and the Examination Scoring Certificate, also found within the test manual. These three certificates, as well as student answer papers must be retained on file in the school for one year. Copies of these certificates can be found in Appendix VI. The **Examination Scoring Certificate** may be copied. All scorers are required to sign this form to indicate compliance with all scoring procedures as outlined in this manual and in the scoring keys and rating guides for the test.

Emergency Supply of Test Materials

All shipments of secure test materials should be inventoried immediately after delivery and before being placed in secure storage. After taking inventory:

1. If you determine that an item or items are **missing** from your shipment that are listed on your shipping notice, circle the item(s) and quantity that are missing on the notice and fax the corrected shipping notice to the Department's Operations Group at: 518-474-2021. (No cover sheet is necessary.) The missing item(s) will be sent to your school's storage site.
2. If you require items that were **not originally requested** or items necessary to accommodate students whose needs you were not previously aware of, contact the Department's Operations Group by calling 518-474-8220. Under the direction of the Operations Group, contact your regional center to arrange pickup of test materials. Please note that only the Written Test will be sent to regional centers. Performance Test materials will not be sent to regional centers, only to schools.
 - Before sending an official school representative to pick up the emergency supply of materials, contact the official in charge of your regional center. Information on Regional Centers is available at: <http://www.emsc.nysed.gov/osa/elintgen.html>.
 - The official school representative picking up secure examination material must present to the regional center official a photo ID and a letter of authorization signed by the principal listing the materials to be picked up. This letter, authorizing the school representative to pick up test materials, must be written on school stationery. (**Note:** Secure materials can be obtained from the regional center only on the day that they will be administered.)
 - The school representative must countersign the authorization letter and leave it with the regional center official before the emergency supply of materials can be released.

Test Preparations and Other Guidelines

Administration of the Tests

To ensure that the Grade 8 Intermediate-Level Science Test provides an accurate measure of student achievement, both students and teachers should be properly prepared for its administration. This manual provides suggestions for preparing students to take the tests. School personnel who administer the Written and Performance Tests must be familiar with the test materials and the directions for administration provided in this manual.

Orientation of Test Administrators

Everyone who will be administering the test should become familiar with the detailed directions for administering the test, which are provided in this manual. *The Manual for Administrators and Teachers* is not secure; copies of this publication should be distributed to teachers in advance of the administration date(s) so they may familiarize themselves with the procedures for administering the test. Schools may make photocopies of this publication if necessary. It can also be found at the Department's web site at: <http://www.emsc.nysed.gov/osa>.

In addition, schedule an orientation prior to the testing dates to enable test administrators to become adequately prepared. The orientation should include direct hands-on experience with the Performance Test if the test administrators have not had previous experience with that component of the test. The BOCES or large-city central office may provide assistance for conducting such orientation sessions.

Note regarding test security: Allow access to the Performance Test materials only to those who are scheduled to administer the Performance Test, conduct the orientation, or rate the test. **These materials must remain under strict security conditions at all times to preclude access to the test materials by students and other unauthorized persons.**

Assembling the Test Materials

Assemble all test materials at least one day before the test administration, except for the test booklets for the Written Test and the Performance Test, the scoring keys, and the rating guides.

Preparation of Students for Testing

The administration of the test should be announced to students before the date that the test is scheduled to be administered. All announcements should be made in such a way as to increase the students' interest in the test without causing them to become overly anxious. In addition, parents should be informed of the dates of testing and the purpose of the tests. Parents should be asked to encourage students to do their best on the test and to ensure that students are well rested on the days of testing. Each student should be familiar with the general types of questions on the test and the procedures that they should follow when recording the answers to the test questions. Previous editions of the Written Test that feature questions similar to those that will be on this year's test may be accessed on the Department's web site at: <http://www.emsc.nysed.gov/osa>.

Selecting the Testing Room(s)

Arrangements for administering the tests should interfere as little as possible with the normal school routine. The Written Test may be administered in the students' regular classroom, or classes may be arranged into smaller or larger groups, at the convenience of the school. The Performance Test need only be set up in one location. For buildings with more than one class of Grade 8 students, classes

should cycle through the testing area one at a time. Suggestions for selecting an appropriate testing site for the Performance Test are provided in the section of this manual entitled “Administering and Rating the Performance Test” (pages 23–24) and in Appendix II.

Preparation of the Testing Room(s)

The room(s) in which the tests are administered should be well lighted, well ventilated, and quiet. Make preparations before the testing period to keep noise and other distractions to a minimum. Place a “Do Not Disturb” sign on the door to prevent interruptions. If tests are to be administered in a classroom, clear desks and shelves under the desks of all books, papers, and other materials. Completely cover or remove from the walls all charts and blank or completed graphic organizers pertinent to science and all board work. Make arrangements in advance to seat the students so that each student will be clearly visible to the proctor at all times and so that there will be the least possible opportunity for any communication between students. Seating of students in alternate rows is recommended.

Supervision of Students

Unauthorized Materials

Students should be under close supervision at all times during the administration of the tests and may not use any unauthorized notes, printed materials, tools, or electronic devices that might give them an unfair advantage on the tests. When students enter the testing room, proctors must ensure that students do not bring any unauthorized materials such as those listed above. **Students should be informed that they may not use cell phones or other communications devices during the test.** These must be turned off and put away before the test booklets are handed out. Use of a cell phone during testing invalidates a student's test regardless of the content of the communication. Such student's test result must be reported as “administrative error.” (See pages 12–13.)

Aid to Students

No one, under any circumstances, may interpret or explain test questions to students, nor may anyone review or comment on the answer sheet of a student while the test is in progress. In response to inquiries by students concerning the meaning or interpretation of test questions, proctors should advise students to use their own best judgment. Teachers may give students assistance only in the mechanics of taking the tests, such as understanding where to record their responses.

Temporary Absence from Testing Room

No student may be permitted to leave and then return to the testing room during any part of the test unless the student is accompanied by a proctor for the duration of his or her absence from the testing room.

Emergency Evacuation of a School Building

Evacuation of a school building during a test may be required because of an emergency such as a fire alarm or bomb threat. In any situation in which the safety of the students is endangered, the principal has full authority to interrupt the test immediately. If it is possible, the students should be kept under supervision during the emergency. If work can be resumed following evacuation then students may make up the remaining time so that they will have the allotted time on the test. Following the test, a written report of the circumstances should be faxed to the Office of State Assessment. (See pages 12–13.)

Student Cheating

Do not permit students to obtain information from or give information to other students in any way during the test. If the proctor suspects that such an attempt has occurred, the proctor should warn the students that any further attempts will result in the termination of their tests. If necessary, the proctor should move the students to another location. If these steps fail to end attempts to obtain or give information, the proctor should notify the principal immediately and terminate the students' tests. At the conclusion of the test, all suspected cheating must be reported to the principal.

If, in the judgment of the principal, a student has attempted to give aid to or obtain aid from another person during the test, the principal must follow the school's disciplinary procedure for student cheating and invalidate the student's test. Score reports will not be produced for invalidated tests. When reporting student assessment data to the Department under such circumstances, the principal must report the students' test results as "administrative error." (See "Coding of Invalid Tests" on page 13.)

Illness

If a student becomes ill during a part of the test, the student should be excused until he or she is well enough to continue. The principal should estimate the time that the student had remaining to complete that part of the test. When the student is well enough to complete the test (and as long as the testing or makeup period has not ended), the student may be given the remaining time for that part. When the student goes back to finish the test, the student must be closely supervised so that he or she does not go back to previously finished questions on the test.

Students Absent on the Test Day

Plan to administer the test at a later date during the test administration or make-up period to all students who were absent when the test was initially given. Do not involve these students in any classroom discussions about the test prior to the time they take it.

Proctoring

Proctors must circulate periodically around the room during the administration of each session of the test to ensure that students are recording their responses to test questions in the proper manner. While circulating around the room, proctors should point out to students if they have left one or more answers blank, if they have darkened more than one circle for the same multiple-choice question, or if they do not appear to be recording their answers in the proper place (on the answer sheet for multiple-choice questions or in the test book for open-ended questions). **However, proctors may not comment to the student on the correctness or sufficiency of any answer.**

Students must not be given help in interpreting any test questions. They should be advised to independently answer test questions according to their best judgment. Proctors must limit any test-related assistance to students to that required in the mechanics of taking the test, such as filling out the headings on the answer sheet and the answer booklets and understanding where to record their answers.

No one, under any circumstances, including the student, may alter the student's responses on the test once the student has handed in his or her test materials. Teachers and administrators who engage in inappropriate conduct with respect to administering and scoring State examinations may be subject to disciplinary actions in accordance with Sections 3020 and 3020-a of Education Law or to action against their certification pursuant to Part 83 of the Regulations of the Commissioner of Education.

Security Breaches, Administration and Scoring Irregularities, and/or Misadministrations

Pursuant to Section 102.3 of the Regulations of the Commissioner of Education, "Building principals are responsible for administering department examinations and maintaining the integrity of examination content and programs, in accordance with directions and procedures established by the commissioner." Accordingly, the building principal is responsible for all aspects of the school's test administration and must take appropriate measures both to prevent, as much as possible, and to investigate all security breaches and irregularities associated with the administration and scoring of the test.

In addition, the principal must report such events in writing to the Office of State Assessment within 24 hours by faxing a description of the incident to 518-474-1989. The fax must be written on school letterhead and signed by the building principal.

Security breaches and testing irregularities include, but are not limited to, the situations listed below:

- Any instance occurring prior to, during, or after testing where it has been determined that students, teachers, administrators, or paraprofessionals have had access to the specific contents of a test prior to the administration of the test
- All suspected or confirmed cases of teachers, administrators, or paraprofessionals giving aid or impromptu lessons on specific test content to students immediately before or during the test
- All instances of teachers, administrators, or paraprofessionals altering student responses to test questions
- All instances of teachers, administrators, or paraprofessionals providing students with unauthorized/inappropriate testing accommodations or tools
- All instances of teachers, administrators, or paraprofessionals not providing students with the accommodations specified in their IEP or 504 Plans
- All instances of teachers, administrators, or paraprofessionals providing students with other nonstandard test administrations, unrelated to cheating
- All cases in which a school official does not adhere to the Department policy concerning the finality of examination scores as determined by the teacher scoring committee (See "Finality of Teacher Scoring Committee's Scores" on page 41.)
- All student use of cell phones and other communications devices during the test
- All confirmed cases of student cheating
- All interruptions of testing sessions, including those caused by power outages or fire alarms

- All instances in which the test was administered without Department authorization on a day outside the published Statewide administration or makeup schedule
- All instances in which scorers do not score the test in accordance with the scoring materials provided by the Department
- All cases in which student test books or answer sheets are lost prior to either the scoring of the tests or submission of the answer sheets to the RIC or large city scanning center

Coding of Invalid Tests

Any breaches or irregularities described above, except interruptions caused by power outages or alarms, may be determined by the Department to invalidate a student's test results. In cases where a student's test has been invalidated the principal must:

1. Darken the circle on the affected student's answer sheet denoting "administrative error."
2. Notify the RIC or large city scanning center of the administrative error.
3. On the Student Information Repository System (SIRS), in the *Assessment Standard Met Code* field, code all of these students' answer sheets as "administrative error" with *Standard Achieved Code of 97* and in the numeric field enter "999" indicating no valid score. For further details, see the SIRS Manual Appendix 13—Standard Achieved Codes (<http://www.emsc.nysed.gov/irts/sirs>).

Note that on the verification reports, students for whom administrative errors occurred will appear as "not tested."

Scanning of Machine-Scorable Answer Sheets

It is the school's responsibility to make the necessary arrangement for scoring the test. All schools must contract with a RIC or large-city school district for answer sheets, scanning, and reporting services. The school must send answer sheets to the RIC/large-city district office after the rating of the Written Test, Part II, and the Performance Test are completed.

Some schools will have two separate answer sheets, one for the Performance Test and one for the Written Test. If this is the case, both must be sent to the RIC/large-city district office if that is part of their arrangement. Schools may not require students to record their responses for the same multiple-choice questions on more than one answer sheet.

Reporting Test Results on the Grade 8 Intermediate-Level Science Test

Data for all schools must be reported through the SIRS. For more information about reporting results, school administrators should contact their local RIC or their large-city school district scanning center. **Schools must not send completed answer sheets to the Department.**

Determining the Need for Academic Intervention Services

Section 100.2(ee)(i) of the Regulations of the Commissioner of Education requires schools to provide academic intervention services to students who score below the State-designated performance level (performance level 3, final test score 65) on the Grade 8 Intermediate-Level Science Test. All students who achieve a final score in performance levels 1 and 2 (see Appendix IX) must receive academic intervention services. These services must commence in the semester immediately following the administration of the test.

Evaluating School Results on the Grade 8 Intermediate-Level Science Test

The Rating Guides for the Written and Performance Tests provide summary charts that link each test to the Intermediate-Level Science Core Curriculum. The core curriculum is based on the *New York State Learning Standards for Mathematics, Science, and Technology (Intermediate-Level)*. The charts provide a reference to these documents for each item on the Written and Performance Tests.

Recording Test Scores and Storing Student Answer Papers

Schools must maintain complete and accurate records of students' test scores. A student's score and the date of administration must be entered on the student's permanent record.

All schools must keep their students' Performance Test answer booklets on file in the school for at least one year. Since the Performance Test booklets remain secure, they must be stored in a secure location. Schools must also keep their students' Written Test answer sheets on file for the same period.

Individual Student Results

At the school's earliest opportunity after tests have been scored, schools are expected to provide results to each student's parent/guardian.

Review of Answer Papers by Students and Parents

Students and parents/guardians of students who have taken the Grade 8 Intermediate-Level Science Test have the right to review student answer papers after the scores have been recorded as described in the preceding section. Answer papers should be reviewed in the presence of the principal, or the principal's designee, to ensure that no changes are made on the answer papers as they are being reviewed.

Online Submission of Teacher Evaluations of the Test to the Department

Suggestions and feedback from teachers provide an important contribution to the test development process. The Department provides an online evaluation form for State assessments where teachers may respond to several specific questions and may make suggestions. Go to www.emsc.nysed.gov/osa/exameval to complete and submit the evaluation.

Return of Tests and Scoring Materials to the Department

Written Test: Since the Department will provide a new form of the Written Test each year, schools do **not** have to return Written Test materials to the Department. After the Department-designated test administration period has ended and the test has been scored, schools may use the Written Test as part of the instructional program. Schools may make photocopies of the Written Test if additional copies are needed for this purpose. All schools must keep student answer papers for the Written Test on file in the school for one year. Copies of this manual and the Rating Guide for the Written Test should be kept on file at the school with the students' answer papers for reference. **No school should send answer sheets to the address listed below for the return of certain Performance Test materials.**

Performance Test: Principals are required to ensure that the school returns Performance Test materials to the Department as indicated in the chart below.

Return to the Department's Test Distribution Unit	Retain in the School Do NOT return to the Department
<p>All <i>unused</i> Performance Test answer booklets, including regular, large-type, braille, and alternative language editions</p> <p>All used and unused Performance Test Rating Guides</p>	<p>Performance Test answer booklets used by students</p> <p>Written Test Student Answer Papers</p> <p>Test Administrator's Record Sheet</p> <p>Copies of this test administration manual</p> <p>Completed Examination Storage Certificate</p> <p>Completed Deputy and Proctor Certificate</p> <p>Completed Examination Scoring Certificate</p>

Use the return label enclosed with the shipment of test materials to return the Performance Test materials after scoring has concluded but no later than June 17, 2010, to:

Test Distribution Unit
New York State Education Department
Cultural Education Center, Room 167
Empire State Plaza
Albany, New York 12230

Note: New York City public schools should follow the procedures for the return of Performance Test materials provided to them by the New York City Department of Education.

Department Contacts

Different Department staff are responsible for various aspects of the test. Direct questions to one of the persons or offices listed below.

Do not discuss test questions or other specific test content via e-mail. This is a violation of security, as stated on page 7. Questions about scoring should be addressed by telephone.

Test Administration:	Carolyn Trombe, Test Administration and Communications 518-474-5902 ctrombe@mail.nysed.gov
Rating/Scoring:	Judy Pinsonnault, Test Development Unit 518-474-5900 jpinsonn@mail.nysed.gov
Requests for Additional Test Materials:	Operations Group Fax a copy of shipping notice with a note itemizing which materials are needed to: 518-474-2021
Content/Curriculum:	Office of Curriculum, Instruction and Instructional Technology 518-474-5922
Accommodations for Students	Special Education Policy Unit 518-473-2878 vesidspe@mail.nysed.gov
Reporting Results in SIRS	Information and Reporting Services 518-474-7965 dataquest@mail.nysed.gov
Academic Intervention Services:	Office of School Improvement 518-474-5923 mflanaga@mail.nysed.gov

General Test Administration Procedures

Test Materials

The test materials provided by the Department for administering the Grade 8 Intermediate-Level Science Test include:

For the Written Test:

- test booklets
- directions for administering and scoring the Written Test (pages 19–22 of this manual)
- Scoring Key for the Written Test, Part I (for non-NYC schools)
- Rating Guide for the Written Test, Part II

For the Performance Test (Form A):

- test booklets
- Station Diagrams (10 sets of each of these Station Diagrams and one Test Administrator's Record Sheet)
- directions for administering and rating the Performance Test (pages 23–40 of this manual)
- Test Administrator's Record Sheet (Appendix III of this manual)
- Rating Guide for the Performance Test (Form A)

The Written Test booklet and the test booklet and Station Diagrams for the Performance Test (Form A) are available in large-type and braille as well as in the following alternate language editions: Chinese (Traditional), Haitian Creole, and Spanish. The alternate language editions are direct translations of the English editions. The directions to students on the alternative language test materials are the same as those on the English editions. The Department does not provide separate directions for administering the alternative language editions of the tests. Teachers who speak the language should be able to administer the alternative language editions by using a copy of the test materials in the appropriate language and the directions provided in this manual. If a teacher who does not speak the alternative language administers the tests, the directions on the test materials should enable students to complete the tests by themselves.

The test materials to be provided by the school include pencils for both the Written and Performance Tests and the station materials for the Performance Test.

Machine-Scoring of Answer Sheets

The answer sheets provided by the RIC or large-city scanning center include several grids containing spaces for recording special codes. The school must develop uniform written instructions about the completion of these grids and provide them to everyone who will be administering the test. Such instructions should be based on careful consideration of the types of student and score information the school needs, as well as on the processing requirements of the scoring center that the school is using.

Schools may not require students to record their responses for the same multiple-choice questions on more than one answer sheet and, except as an accommodation for a student with a disability, may not administer the Written Test with any answer sheet other than one provided by a RIC or large-city scanning center.

Test Administration Time

Written Test: Students are allowed two hours of working time to complete the Written Test. In addition, the test administrator will need approximately 15 minutes to give directions to students.

Performance Test, Form A: The Performance Test should be administered in a 45 minute time period. Field testing has determined that almost all students will complete the tasks at all three stations in this amount of time. In addition, the test administrator will need approximately 15 minutes to give directions to students.

Administering and Scoring the Written Test

Detailed Directions for Administering the Written Test

Make sure that sufficient quantities of all test materials are on hand. The following materials are needed for each student:

- test booklet
- answer sheet
- No. 2 pencil
- calculator (**Note:** Calculators *may* be needed for some questions. If so, four-function calculators are sufficient. Scientific calculators are permitted. Graphing calculators are *not* permitted.)

For the test administrator:

- detailed directions for administering and scoring the Written Test provided in this manual
- test booklet (for demonstration purposes)
- answer sheet (for demonstration purposes)
- extra answer sheets and pencils
- instructions for completing the special code grids on the separate answer sheet

After the desks have been cleared of books and papers and when the students are ready to begin, say:

Today you are going to take a test in science. I will now give each of you a test booklet face up on your desk. Write your name and school on the cover. Do not open the booklet until I tell you to do so.

Distribute one test booklet, face up, to each student. Then say:

I will now give out the answer sheets. Please do not write on the answer sheet until I tell you what to do. Now, read the directions on the cover and on page 3 of the test booklet.

After the answer sheets have been distributed, give directions for completing the heading of the answer sheet. Provide directions for marking any machine-readable name or number grids. These directions *must* be developed by the school.

If students do not understand how to mark the answer sheet, explain the appropriate directions until everyone knows what to do. Then say:

Check your booklet to be sure that it is complete and that no pages are stuck together.

When I tell you to, turn to page 4 and begin work. When you are finished, close your test booklet and place it on top of your answer sheet.

Now, turn the page and begin work.

Begin timing the two hours now. Note the time on a clock and record the time on the chalkboard or on a sheet of paper. A sample is shown below.

Start time: _____

Stop time: _____

Stop time less 15 minutes: _____

Stop time less 5 minutes: _____

Walk around the room and make sure that all students understand the directions and are properly marking their answer sheets. Explain again the test-taking procedures to any student who appears to be having difficulty.

No one, under any circumstances, may interpret or explain test questions to students, nor may anyone review or comment on the answer paper of a student while a test is in progress. In response to inquiries by students concerning the meaning or interpretation of test questions, students should be advised to use their own best judgment.

When 15 minutes remain, say:

You have 15 minutes left.

When 5 minutes remain, say:

You have 5 minutes left.

When the time is up, say:

Stop work. Put down your pencil. Close your test booklet and place it over your answer sheet.

Students should remain quietly at their desks when they finish the test. The teacher may collect the test materials either as students complete the test or when most of the students have finished.

If the test is administered in a large-group setting, school administrators may prefer to allow students to hand in their test materials as they finish and then leave the room. If so, take care that students leave the room as quietly as possible so as not to disturb the students who are still working on the test.

Note: No one, *under any circumstances*, including the student, may alter the student's responses on the test once the student has handed in his or her test materials. Teachers and administrators who engage in inappropriate conduct with respect to administering and scoring State examinations may be subject to disciplinary actions in accordance with Sections 3020 and 3020-a of Education Law or to action against their certification pursuant to Part 83 of the Regulations of the Commissioner of Education.

Scoring the Written Test

Part I—All schools administering the Grade 8 Intermediate-Level Science Test are required to make arrangements to obtain answer sheets and associated scanning services from a RIC or large-city scanning center. These centers will scan and score the answer sheets according to the following criteria:

1. One credit will be awarded for each correct answer.
2. Credit will not be allowed if two or more answers have been marked for the same questions.
3. The raw score for Part I will be determined by counting the number of correct responses.

For information only, correct responses are listed on the Scoring Key for the Written Test, Part I, included in the shipment of test materials to upstate and Long Island schools. Scoring keys are not sent to New York City public or charter schools.

Part II—assign credits as indicated in the Rating Guide for the Written Test Part II. A list of criteria for rating the open-ended questions on Part II is provided in that guide.

Machine Scoring. Schools should be sure to check with their scoring center concerning the procedure to be followed in preparing the answer sheets for machine scoring.

The separate answer sheet containing the multiple-choice answer grids also provides grids for recording a student's Part II and Performance Test scores. When filled in, these grids enable scoring centers to produce student records that include final student scores. Record the Performance Test scores in these grids after the Written Test is administered but before the answer sheets are machine scored. If schools have two separate answer sheets for the Written and Performance Tests, both must be sent to the RIC or large-city school district.

Determining the Student's Final Test Score. A chart for converting the student's Written Test raw score and Performance Test raw score to a final score will be provided on the Department's web site at: <http://www.emsc.nysed.gov/osa>. Once a final score has been determined for each student, a performance level can be assigned. The Performance Levels Chart is provided in Appendix IX of this manual.

Note: The final score corresponding to the raw scores in the conversion chart will change with each year's edition of the test. For this reason, it is crucial that for each test year, teachers use only the conversion chart provided for that edition to determine the student's final score.

Rating the Written Test, Part II

Approximately one-half of the questions on the Written Test will be open-ended. A group of teachers should rate the Part II open-ended questions on the Grade 8 Intermediate-Level Science Test. There must be at least two raters. School administrators decide who can rate Grade 8 Intermediate-Level Science Test(s) after review of the teacher's certification, and present and past teaching assignments. It is estimated that two teachers working as a team should be able to rate all of the open-ended responses for about 20 students in approximately one hour.

The Rating Guide for the Written Test, Part II gives detailed directions for rating the open-ended section of the Written Test and specific criteria for rating each question. It is printed on yellow paper and included in the shipment of test materials from the Department. In rating the students' test booklets, each rater should follow the procedures detailed in the rating guide. The rating should be completed prior to June 17, the date when answer sheets must be submitted to the scanning centers. Copies of the Written Test Rating Guides should be kept on file at the school for reference.

Organizing the Rating Process

The following is a suggested procedure for managing the mechanics of the rating process.

1. Designate one person as the coordinator of the rating process. The coordinator may be appointed at either the building or the district level. He or she will be responsible for training and supervising raters and may also rate some of the questions in the student test booklets.
2. Set aside one room as a central rating room for collecting, sorting, circulating, and storing test booklets and for preparing and maintaining records.
3. Provide adequate time for rating during the school day.
4. Make sure each rater receives approximately the same number of student booklets.
5. At least two teachers should participate in rating the open-ended questions in Part II. Each should be responsible for rating a selected number of the open-ended questions in each test booklet. No one teacher is to score more than half of all the open-ended questions in a student's test booklet.
6. Prior to the rating of students' responses to the open-ended questions in Part II, allow time to provide training for all raters (even if they have received prior training). If possible, select at random 10–15 student test books and duplicate them for use as a “warm-up” exercise with the raters for discussion of the questions, the criteria, and the rating of each item. During the training exercise, after three or four complete student test booklets have been rated, ask the raters to indicate, by a show of hands, how many credits they gave each response. If there is some disagreement about the number of credits to be awarded a response, ask raters who gave different credits to a response to explain their rating by citing specific criteria from the rating guide.

Administering and Rating the Performance Test

Preparation

Well in Advance of the Test Date:

1. Notify school administrator(s) that you will be administering the Grade 8 Intermediate-Level Science Performance Test and that test security measures must be maintained. Notify other professionals and support staff of this test and the role that they may need to play.
2. Assemble and prepare all equipment according to the directions (pages 26–29) in this manual. The materials listed specify what is needed for a single station. Some commercial and public suppliers have constructed kits that provide *most* of the specific equipment for each station. Appendix VIII provides a list of these suppliers. Although kits ordered from suppliers should generally be the same, some kits may not be ready for immediate use, and additional time may be needed for preparation. The school may need to provide some miscellaneous materials such as marking pens, tape, or labels.
3. Check the materials well in advance of the test date. Contact the supplier for a replacement if a piece of equipment or material is missing or arrives broken.
4. Check to be sure that the equipment and materials are adequate for the number of students to be tested. Appendix I provides a complete list of materials needed for each station. A supplier's kit of materials usually provides for a maximum of 30 students. Each group of stations will accommodate three students, and students will move to each station within the group. If 30 students are to participate in the Performance Test, you will need 10 groups and equipment for 10 complete setups of each station. Each student will need one test booklet and a sharpened pencil. Check that enough booklets will be available for the number of students to be tested. Test administrators should have an extra supply of sharpened pencils on hand.
5. Check the equipment schools must provide: triple-beam balances, compound microscopes with at least two objectives, and handheld calculators. Make sure that all balances can be “zeroed,” all microscopes are in good working order, and all calculators have an energy source. The microscopes should have an eyepiece with 10× magnification, a lowest-power objective of 4× magnification, and a highest-power objective of about 10× magnification. Overall, the microscopes should give total magnifications of about 40× and about 100×.
6. Select and reserve a testing room. Once all the equipment has been prepared, it should take three to four person-hours to set up the room, one hour to conduct the assessment (for a class of 30 students), and one hour to disassemble the setup. For larger schools and schools where the test will be given early in the school day, station setup can be done the day before and secured overnight. Do *not* leave test booklets out overnight.
7. **Plan the layout of the room and prepare a diagram of the layout of the stations. This is an essential step in the process of performance testing.** The testing room must have flattop student work spaces (student tables, lab tables, library tables, or cafeteria tables) in sufficient numbers for the number of students to be tested. An individual student desk may be too small to accommodate all the equipment for a station plus provide room for the student to write. It may be possible to place two smaller individual desks together to make a larger work area for one station. Determine how many tables will be needed and how they will be arranged in groups of three stations each (see page 25). The room may need to be large enough to

accommodate 8–10 groups (24–30 students) comfortably. Students will need to move (either sideways or front-to-back) among stations within their group with as little confusion as possible. An important consideration is the location of Station 1, which requires the use of a microscope. If the microscope uses a mirror, it should be positioned so that it has enough light but not direct sunlight. If it has an electrical light source, it must be positioned near an electrical outlet.

8. Check that all print materials from the Department are ready. These include the student test booklets, directions for setting up the stations, detailed directions for administering the test, Station Diagrams for Stations 1, 2, and 3, and a Rating Guide.
9. Check that at least two adult test administrators (two professionals, or one professional and one paraprofessional) have been trained and are completely familiar with the test protocols and the equipment. These adults will administer the test, direct student movement, and handle equipment issues. In addition, teachers or aides may be present to provide testing accommodations to students with disabilities pursuant to their IEPs. They should also receive training regarding the procedures used in this assessment. To minimize possible distractions during the testing, other adults should *not* be invited to attend.

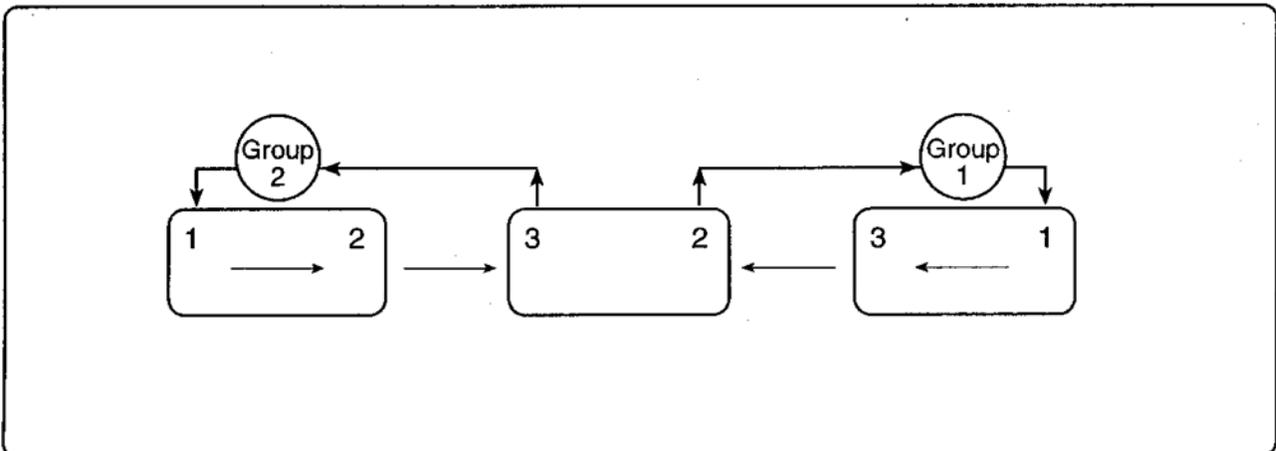

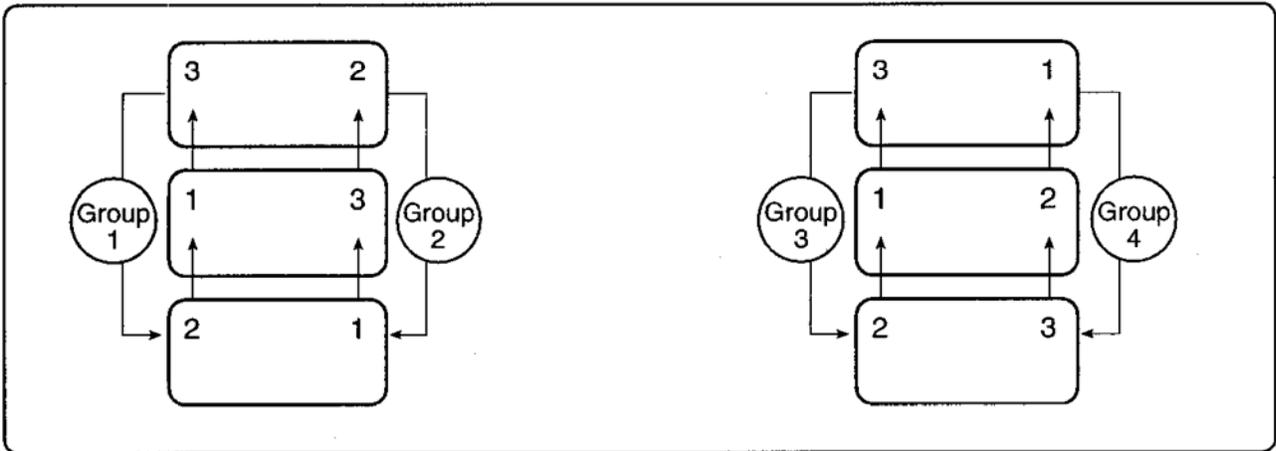

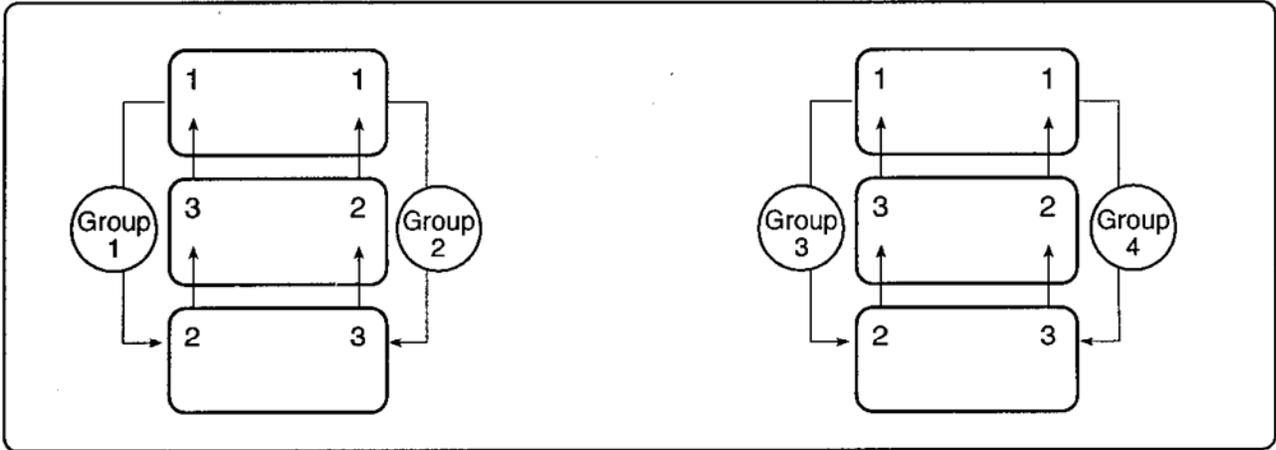

One Day Prior to the Test or Early Morning on the Test Date:

1. Prepare a diagram of the room layout of the stations.
2. Arrange the tables into groups of three stations each. Remember that natural or artificial lighting is needed for the microscopes, so locate all Station 1 setups first. Set up each station according to the directions provided in the section of this manual entitled “Preparing Each Station,” pages 22–31. The materials listed specify what is needed at each station for each group that is being tested. The stations do not need to be in numerical order. Arrange the equipment exactly as it is shown on the Station Diagram.
3. Assign a group number to each set of Stations 1, 2, and 3. Use this numbering system to tell students which group they are in. This number will be recorded on the cover of each student’s test booklet. The group number will be important when rating students’ responses based on specific materials. For Group 1, the station setups should include Block B–1 and Slide X–1; for Group 2, the station setups should include Block B–2 and Slide X–2; etc.
4. Write the school name on the chalkboard so that students can correctly and quickly record it in their test booklets.
5. Instruct students *not* to bring any items with them to the testing room. However, reserve a location near the door for the quick placement of items that students might bring with them, such as books, bookbags, and coats.
6. Give students the opportunity to visit the rest rooms prior to the testing session.
7. Place a sharpened pencil and one copy of the student test booklet face down at each station just before students enter the room. Have a supply of sharpened pencils available.
8. Complete the Test Administrator's Record Sheet. **This information is very important.** It will be used to determine the range of correct answers when rating the students' tests. Copies are provided in Appendix III of this manual and in the packet of Station Directions.

Partial Diagrams of Typical Classroom Setups

Three Typical Group Setups

Electric Outlets or Windows

Windows

Electric Outlets

Preparing Each Station

The detailed directions listed below include a list of the materials needed for each station, a Station Diagram, and specific suggestions for preparing the materials and setting up the stations. Refer to the diagram of the setup for your testing room to determine how many individual station setups you will need.

Station 1: Sorting Creatures

Time: 15 minutes

Materials for one station:

- Black permanent marker
- Collection of six specific plastic creatures
- Index card (3" × 5", unlined)
- Masking tape
- Microscope with an eyepiece of 10× and at least two lenses providing total magnification of about 40× and 100×
- Slide A—slide of grid with 1-cm squares (graph paper)
- Slide X—microscopic specimen: (recommend *Drosophila*—**must clearly show** six legs)
- Sorting Chart (8½" × 14"), laminated

Preparation to be done prior to the test date:

1. When setting up the room, determine the location of this station first. This is important because the microscope may need an electrical outlet for a light source or good natural lighting if it uses mirrors. Do *not* place microscopes where direct sunlight could hit the mirror and reflect into a student's eye.
2. Appendix IV provides a master for the Sorting Chart. It should be on an 8½" × 14" sheet of paper (preferably laminated).
3. Use a black permanent marker to label each of the six specific plastic models with its corresponding letter. Place the capital letter on the underside of each creature. (**Note:** These models are available from the suppliers listed in Appendix VIII.)

A—centipede

D—ant

B—fly

E—spider

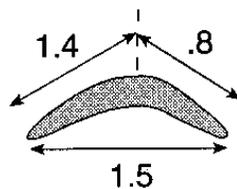

C—dragonfly

F—bristletail

4. The microscope should have an eyepiece of 10×. The lowest power objective should provide about 4× magnification. The highest power objective should provide about 10× magnification. These will provide total magnifications of about 40× and about 100×. If the microscope has a higher objective than these two, it should be covered so that students will not use it. This can be done by wrapping a piece of lens paper over it and securing the paper with masking tape.

Note: Microscopes in a school’s inventory may have a total lowest magnification of 100×. These should work if students are accustomed to moving specimens across the field of view to determine measurements. You must also provide a second objective larger than 10×. If a microscope has only two objectives, 10× and 40×, both of these objectives should be available for the student’s use; neither should be covered.

5. Prepare a Slide A for each Station 1. This is a permanent slide that can be made from a section of graph paper ruled every 1.0 mm. Cut out a 1.0-cm × 1.0-cm section of the graph paper. Use clear transparent tape to mount the graph-paper section in the center of the blank slide. Label this Slide A. Place Slide A on the index card. (**Note:** Some suppliers may provide slides with grid lines printed directly onto the slides.)
6. Prepare a Slide X for each Station 1. Dry and mount a *Drosophila* under a coverslip so that all six legs are clearly visible. Specimens should be approximately 2–2.5 mm in length. (These specimens are available commercially.)
7. Use consecutive numbers to label the microscopes 1, 2, 3, etc. These numbers will indicate which group used that microscope. Fill out the Test Administrator’s Record Sheet (Appendix III) for each microscope by recording the lowest power and the field of view to the nearest 0.5 mm.
8. Use consecutive numbers to label the Slide X samples, e.g., X-1, X-2, X-3, etc. These numbers will indicate which group observed that slide. Place Slide X on the index card.
9. Once a Slide X has been placed at each Station 1, examine the slides under lowest power *using the microscope at that station*. In the table on the Test Administrator’s Record Sheet, record the length of the *Drosophila* on each slide to the nearest 0.5 mm. A simple method for determining the length of the *Drosophila* is to place Slide A on the microscope stage and place Slide X on top of it. Focusing on these two slides will easily show the size of the *Drosophila*. **Note:** Some of the *Drosophila* specimens are bent and could be measured by adding the two sections or by measuring across from head to end. Do *not* include the antennae, legs, and wings. If possible, replace these slides. If not, make a note of both values on the Test Administrator’s Record Sheet. For example:

(Not drawn to scale)

If the specimens were bent as illustrated above, both 1.5 ± 0.5 mm or 2.2 ± 0.5 mm can be accepted.

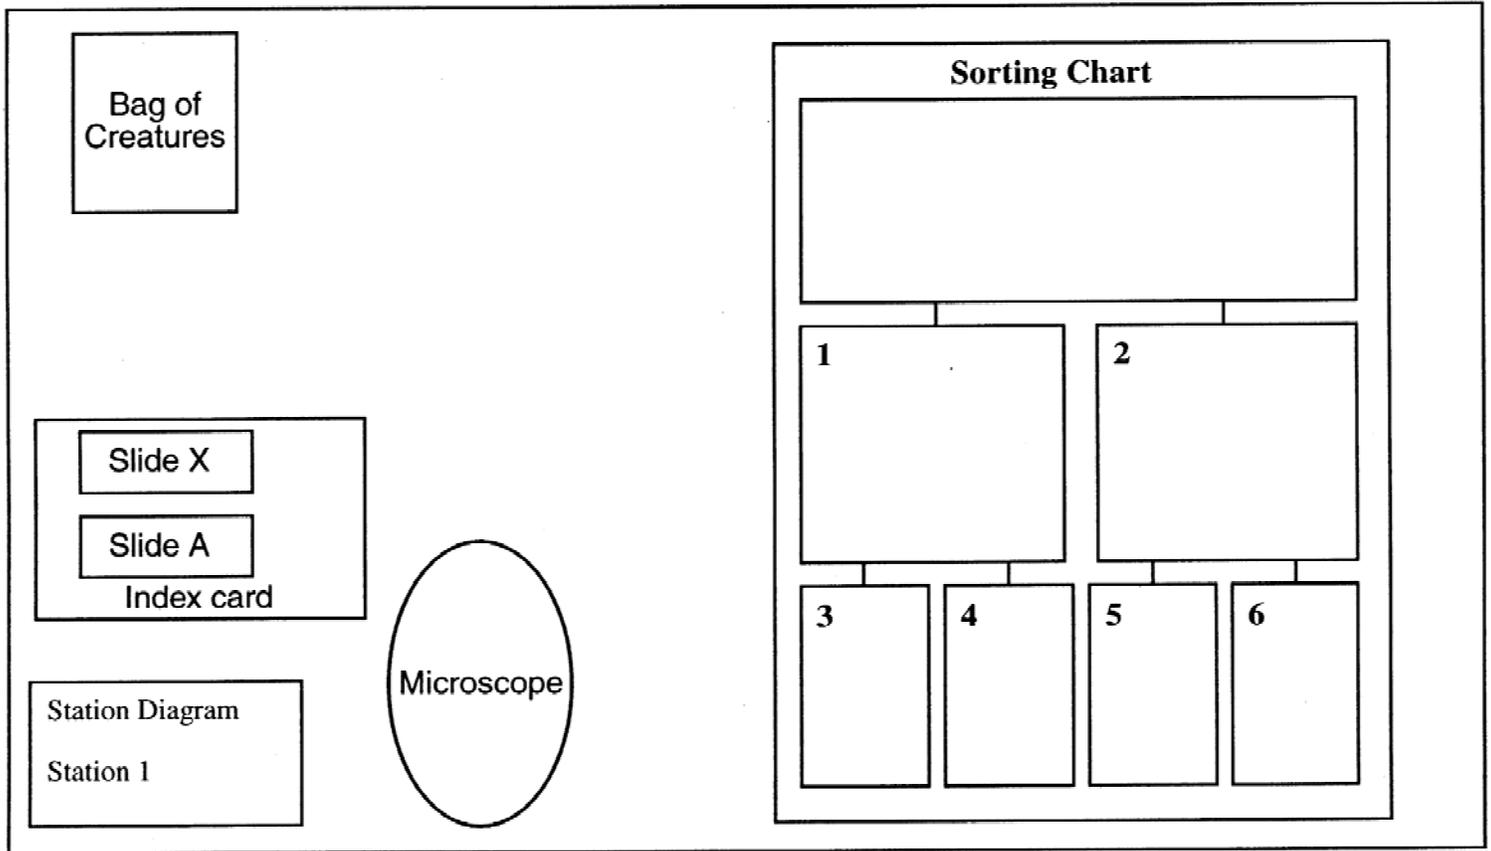

10. Use masking tape to secure the Station Diagram in the lower left corner of the desk/table.
11. Place the equipment at the station so its location agrees with the Station Diagram on page 25.

Safety:

1. When positioning a microscope with a mirror, be sure that the mirror will not be pointed directly at the Sun at any time during the testing sessions.
2. Alert students about handling sharp-edged microscope slides.
3. Monitor the students for safe use of the microscopes.
4. If electrical extension cords are used, take care that students do not trip or push against them as they move among stations. If necessary, tape the cords to the floor and/or flag them so that they can be easily seen.
5. Do not place electrical lights or extension cords near water faucets.

Station Diagram

Station 1: Sorting Creatures

Station 2: Ramp and Golf Ball

Materials for one station:

- Black permanent marker
- Carpet tape or duct tape
- 5-gram mass or 25-cent coin
- Golf ball
- Masking tape
- Resealable plastic bag
- Ping-Pong ball
- Place mat with measuring strip
- Round plastic container with hole
- Ruler with groove
- Support block(s)
- Labels

Preparation to be done prior to the test date

1. The round plastic container should be transparent or translucent, about 12 cm in diameter (1-pint size), and about 15 g in mass, e.g., a deli container. From the rim, cut a hole (about 6 cm × 6 cm) to allow enough room for the golf ball to roll inside. (Some vendors may have already done this step.) This is the front of the cup.

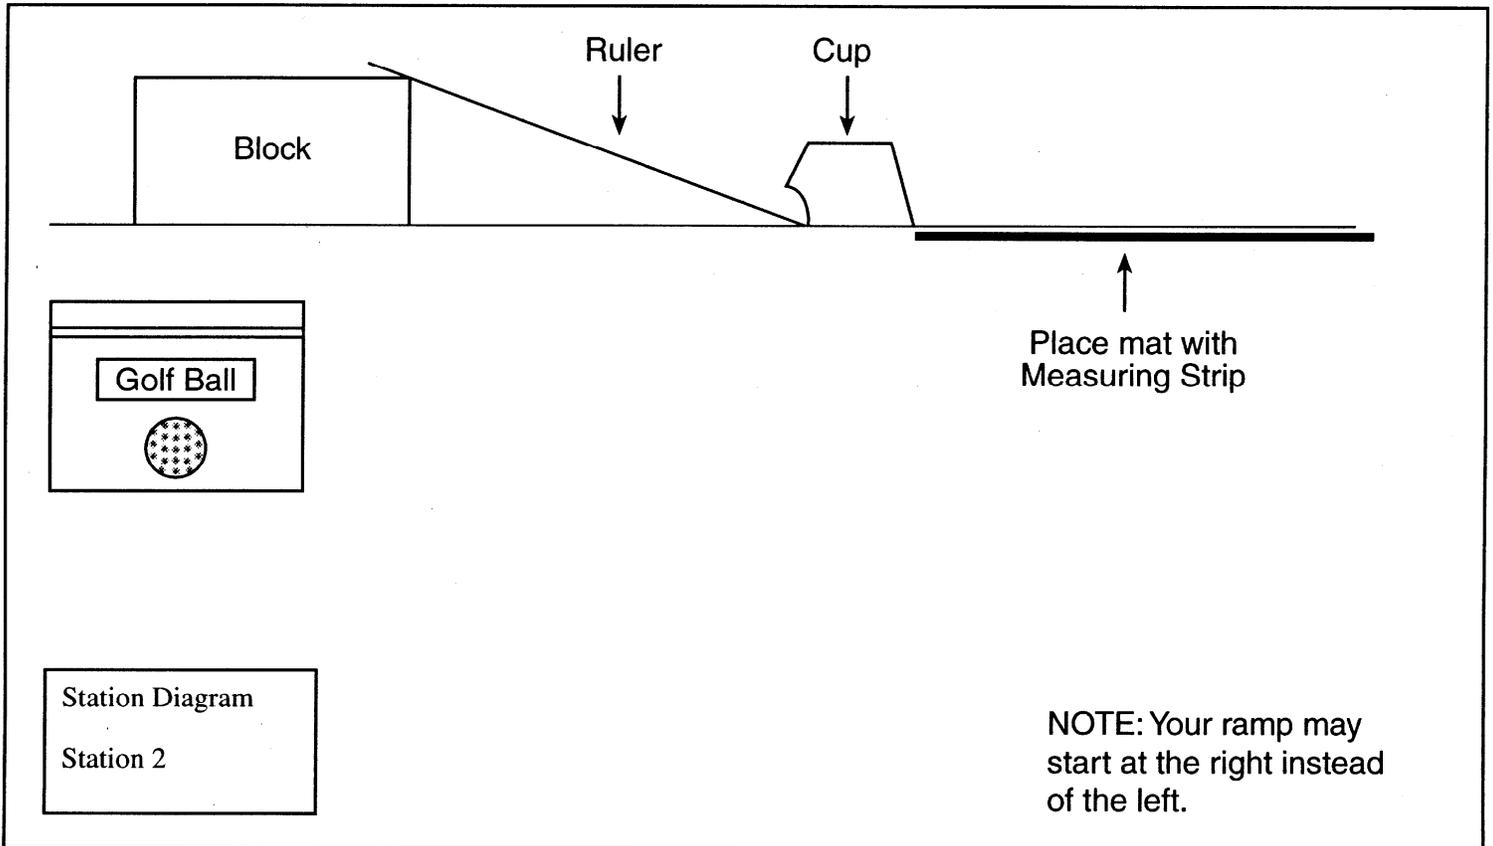

2. The grooved plastic ruler serves as the ramp for rolling the golf ball. Allow only the metric units to show on the ruler. Cover the standard units (inches) with black permanent marker or duct tape. Be sure the tape does not get into the groove of the ruler, as it may interfere with the roll of the ball. The ruler's zero mark should be at the end of the ruler, *not* indented.
3. Appendix V provides a master for the place mat. Make it on an 11" × 17" sheet of paper (preferably laminated).
4. A block of wood about 5–6 cm in height will serve as the ramp support.
5. Assemble the ramp setup as described below, but do *not* tape any equipment down until everything has been put in place and tested. The ramp must be set up so the ball does not push the cup off the table.
6. Use masking tape to secure the Station Diagram in the lower left corner of the desk/table. Refer to the diagram when setting up the station.
7. Place the ruler's 28–29-cm mark at the edge of the ramp support and the ruler's zero mark on the table. Slip the place mat under the ruler so that it is aligned with the "End of Ramp Ruler" mark (about 1 cm inside the edge of the place mat).
8. Place the ramp support to the back and far left of a level desk/table so that the ruler will slope down from upper left to lower right. The ruler's numbers must be on the side of the ruler nearest the students (even if the numbers are upside down). If the numbers are not on the student's side, reverse the ramp position to the back and right of the desk. (**Note:** If this is the case, the Station Diagram will not exactly match the setup.) Place the ramp back far enough on the desk/table so that the student has plenty of room to write in the test booklet.

9. Place the cup on the place mat's "Starting Circle" 1 cm away from the end of the ruler, with the cup's opening toward the ruler.
10. Place a 5-g mass or a 25-cent coin on the top of the cup and secure it in two directions with masking tape. Try rolling the golf ball from the 28–29-cm mark. The back rim of the cup should slide and stop beyond the 15-cm mark on the place mat. Release the ball from the 10-cm and 25-cm marks to be sure to have a good range of values for the distance that the cup slides. (If the ramp is too steep, the ball will bounce down the ramp and onto the table, giving inconsistent results.)
11. Once you have determined the correct height of the ramp, tape down the corners of the place mat. Then tape the base of the support block(s) to the table. Use carpet tape to secure the bottom of the block. If using duct tape (or masking tape), secure strips of tape against the side of the block. Do this on all four sides of the block. (If the block should slip during setup, reset the block by using the ruler as a guide to the place mat.) On the underside of the ruler at the 0-cm and the 29-cm marks, place carpet tape to secure the ruler. (You can also use duct tape or masking tape that has been rolled back on itself so there are two sticky sides.) When the ruler is put into place, its 0-cm mark should be on the place mat and the support should be at the 28–29-cm mark. Place two additional strips of tape across the ruler at the 29-cm mark, following the ruler's contour, and secure it to the support. If the tape is too tight, this will lift the other end of the ruler off the place mat.
12. Release the golf ball from the 29-cm mark again to be sure that the whole system is working correctly and the cup is not pushed off the table.
Note: As more students use the setup, the place mat may become smoother, and the cup will travel farther.
13. Place the golf ball into a transparent, resealable bag that is labeled "Golf Ball," and put it on the desk/table.
14. Place a Ping-Pong ball into a transparent, resealable bag that is labeled "Ping-Pong Ball" and "Do Not Open." Use masking tape or duct tape to cover the seal on the bag so that it cannot be opened. The test administrator will give a Ping-Pong ball to the student upon request.
15. Place the equipment at the station so its location agrees with the Station Diagram on the next page.

Safety: Routine laboratory safety procedures are required.

Station Diagram Station 2: Ramp and Golf Ball

Station 3: Woods and Water

Materials for one station:

- Balance (triple beam, 0.1 g)
- *Block A* (3.7-cm cube) in plastic resealable bag (pine, maple, or other wood with a density $<1.0 \text{ g/cm}^3$)
- *Block B* (2.5-cm cube) (lignum vitae or other wood with a density $>1.0 \text{ g/cm}^3$, available in science stores or wood specialty stores)
- Handheld calculator (Four-function calculators are sufficient. Scientific calculators are permitted. Graphing calculators are *not* permitted.)
- Paper towels
- Black permanent marker
- Ruler (metric)
- Transparent plastic cup (5 oz) with water
- Plastic bag (resealable)
- Masking tape
- Labels

Preparation to be done prior to the test date:

1. The triple-beam balance must be mechanical and measure to the nearest 0.1 g. Do *not* use electronic balances. Do *not* place balances at locations near windows or doors if they will be open during testing. Air breezes may cause balance arm to oscillate while the student is measuring.
2. The ruler must have only metric units showing. All other units must be covered with tape or marked over with permanent marker. Be sure the tape does not get into the groove of the ruler. The 0-cm mark should be at the end of the ruler, not indented.
3. Use consecutive numbers to label the balance for each group. These numbers will indicate which students worked with that balance.
4. Block A should be about 3.7 cm on each side. Block A's density should be about 0.7 g/cm^3 . Place Block A in a resealable plastic bag labeled "Block A" and "Do Not Open." Secure the bag with duct tape, masking tape, or a label so that it can *not* be opened.
5. Block B should be about 2.5 cm on each side. Block B's density should be about 1.3 g/cm^3 . Replace any Block Bs that are not cubes with all sides approximately equal. (Lignum vitae may be purchased from a science store or wood specialty store.)
6. Label each face of the block with the letter "B." Use consecutive numbers to label the Block B samples for each group, e.g., B-1, B-2, etc. These numbers will indicate which group worked with that block.
7. Record the length of one side of the Block B samples on the Test Administrator's Record Sheet (Appendix III). Round length to the nearest 0.1 cm.
8. Once a Block B has been placed at each Station 3, find the mass of each block *using the balance at that station*. Record your results on the Test Administrator's Record Sheet. **Note:** The mass of Block B may be slightly greater at the end of the day. After the testing sessions are over, record the mass of Block B specimens again to be certain that the mass did not change appreciably. If this is the case, make notes on the Test Administrator's Record Sheet.
9. Calculate and record the volumes of the Block B samples on the Test Administrator's Record Sheet.
10. Calculate and record the density of the Block B samples on the Test Administrator's Record Sheet.
11. The plastic cup should be large enough for Block B to sink in about $\frac{1}{2}$ cup of water. It should be easy for the student to remove Block B from the cup.

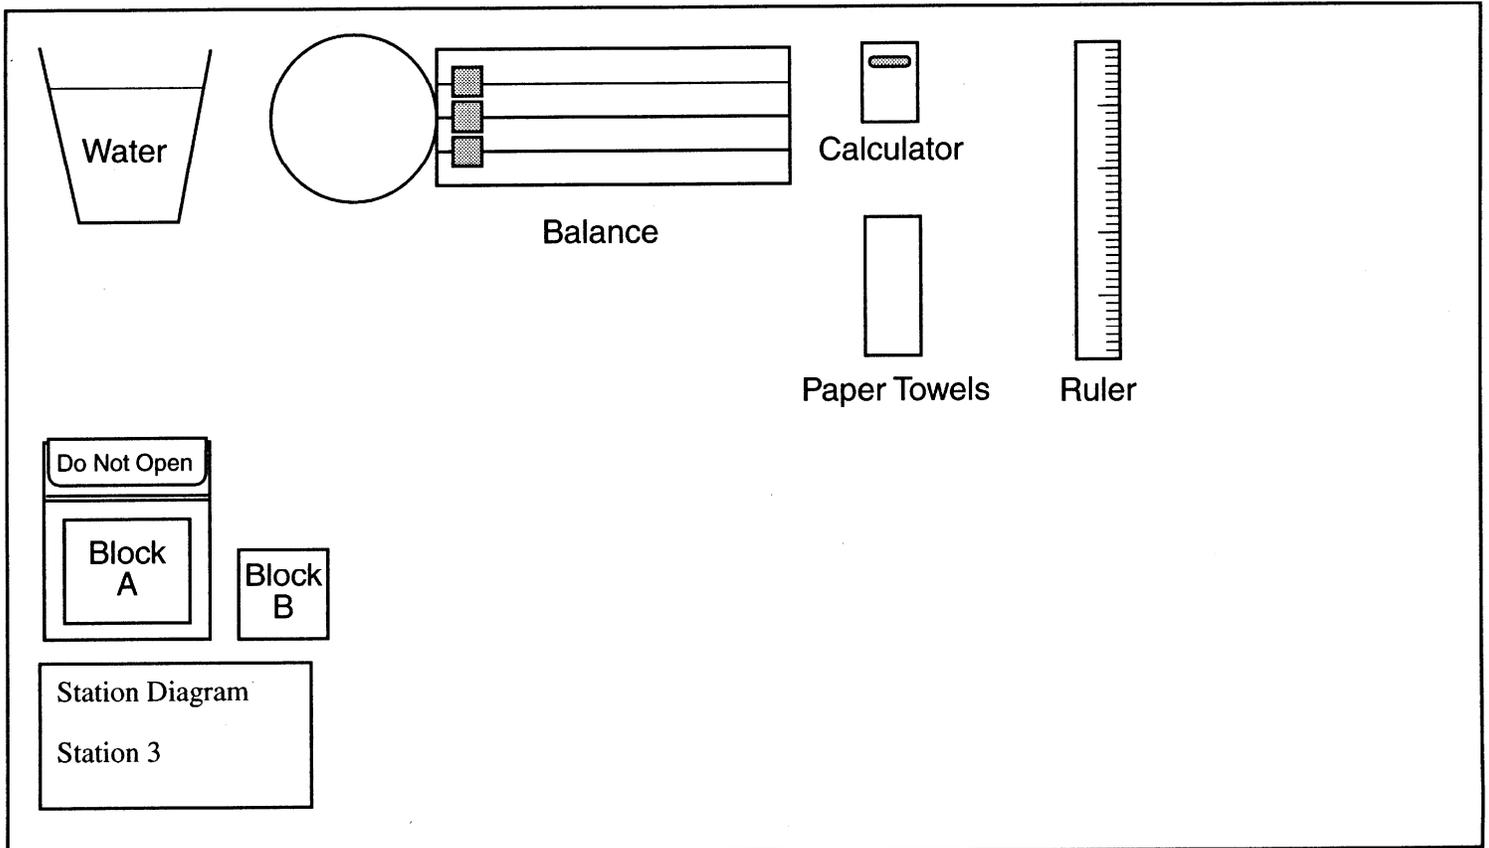

12. **Note:** It is very important to test all Block B specimens to be certain that they sink when placed in the cup of water. Block Bs that do not sink should be replaced with blocks that sink.
13. Use masking tape to secure the Station Diagram in the lower left corner of the desk/table.
14. Place the equipment at the station so its location agrees with the Station Diagram on the next page.

Modifications: Any triple-beam balance that students are familiar with is acceptable as long as it is mechanical and able to measure to the nearest 0.1 g.

Safety: Routine laboratory safety procedures are required.

Station Diagram

Station 3: Woods and Water

Detailed Directions for Administering the Performance Test

1. This assessment is a timed test. Students should be provided the opportunity to visit the rest rooms prior to coming to the examination room so that an unscheduled interruption does not occur during the testing period.
2. Teachers should tell students not to bring bookbags, coats, books, or such items to the testing room. These items will get in the way when students rotate among stations.
3. Just before the testing period begins, make sure that all microscope lamps are turned on (or microscope mirrors can get indirect light), the balances are at zero, and the calculators are at zero.
4. Quickly bring students into the testing room, first filling those stations farthest from the door. It does not matter which station students go to first because each student will eventually be doing all tasks. Instruct students *not* to touch the equipment and *not* to open the test booklet until they are instructed to do so.
5. If you must take attendance, save time by waiting until students are working at their stations.
6. Do *not* attempt to explain to students at the beginning of the test how to move among stations within the group. Present that information after they complete the first task and then again after the second task.
7. If students have questions during the test, you may give assistance for lost or broken equipment or safety issues. However, for most questions you should answer only, “Read it again,” “Sound out the word(s),” or “Do your best,” etc.
8. You must *not* give assistance to students on how to perform a procedure or acknowledge that the student is performing a correct *or* an incorrect procedure. This is not the time to be providing instruction. The purpose of this test is to determine what the student is able to do. Exceptions to this would be safety concerns or specific provisions in a student’s IEP for allowable testing accommodations.
9. Complete the Test Administration Record Sheet. This information is important as it will be used to determine the range of correct answers when rating the test.
10. Use a timing device, stopwatch, or clock with a sweep-second hand to provide accurate time splits of 10 minutes, 13 minutes, and 15 minutes. If you use a clock with a sweep-second hand, note the start time and splits on a piece of paper, the chalkboard, or the Test Administrator’s Record Sheet. See the chart below as an example. Be sure to collect a test booklet and pencil from *each* student before the students leave the testing room.

Time	Say:	First Station	Second Station	Third Station
Start Time	“You may begin work.”			
Start Time + 10 minutes	“You have 5 minutes left.”			
Start Time + 13 minutes	“You have 2 minutes left.”			
Start Time + 15 minutes	“Stop working.”			

Detailed Directions to Students Taking the Performance Test

Students will be anxious to get started. When students are at their first station and ready to work, quickly read aloud to the students the scripts that are in the boxes that follow. (Information in italics or in parentheses or information that is outside the boxes is information for you and your colleagues and is *not* to be read aloud.) Do *not* count this direction-reading stage as part of the time for completing the first task.

Good morning (afternoon). Today, you will be taking a science skills test. I think you will enjoy it because you will be able to use science equipment to help you answer the questions on the test. Please listen carefully, follow my directions and the directions in your test booklet, and do your best work.

If you do not have a test booklet and a pencil at your station, raise your hand. (*short pause*)

Print your name on the cover of your test booklet and put a check mark to indicate whether you are male or female. (*pause*) Write in the name of our school as I have it written on the chalkboard. (*pause*) Write your group number. I will tell you which group you are in. (*Assign a number to the students in each group. This number can be determined by the number on Block B at Station 3 and Slide X at Station 1. For example, Group 4 should have Block B-4 and Slide X-4, etc.*)

Keep this test booklet and pencil with you throughout the test. They will be collected at the end of the test.

Look at the cover of your test booklet. Let's read the test directions together. You read along silently while I read aloud.

This booklet contains science performance tasks located at three different stations: 1, 2, and 3. During this skills test, you will work at all three stations. You are already seated at one of these stations. Use the materials at each station to help you do the tasks.

At each station you will have 15 minutes to finish your work. Continue working until you see the word "**STOP**" at the bottom of the page or until the 15 minutes are up. If you have extra time, check your work, or wait quietly.

Do not help other students or ask others to help you. Everyone should work alone. There must be no talking between students during this test.

Read the description of each station carefully. Read carefully all of the directions in boxes. All of your answers must be recorded in this test booklet.

After you complete the tasks at each station, please leave the station the way it is shown on the Station Diagram. This diagram is located in the lower left corner of your station.

Do *not* try to explain at this time how the students will be moving from station to station. Leave that information until after they complete the first station (and then again after they complete the second station).

The directions that follow will be repeated three times during the testing session.

START HERE when reading directions for the second and third stations.

Look at the bottom left corner of your desk/table. The Station Diagram gives the number and the title of the station where you will be working. Open your booklet and find that station.

Pause and look around to be sure that everyone has found the correct place.

Look at the Station Diagram again. Check to see that you have all the equipment shown on the diagram and that the equipment is located where it should be. If you are missing equipment, raise your hand. (*pause*)

Resolve any equipment problems.

You may begin work. Start by reading the description of the task in the box at the top of the page.

Begin timing the 15 minutes now.

Start a stopwatch or note the time on a clock with a sweep-second hand. Record the time on the chalkboard or on a sheet of paper. A sample chart is shown below.

Time	Say:	First Station	Second Station	Third Station
Start Time	“You may begin work.”			
Start Time + 10 minutes	“You have 5 minutes left.”			
Start Time + 13 minutes	“You have 2 minutes left.”			
Start Time + 15 minutes	“Stop working.”			

Remember that you can provide only limited assistance to the students. If students have questions during the test, you may give assistance only for lost or broken equipment, safety issues, or specific provisions in a student’s IEP for allowable testing accommodations. For most student questions, you should answer, “Read it again,” “Sound out the word(s),” or “Do your best,” etc. You must *not* give assistance to students on how to perform a procedure or acknowledge that the student is performing a correct *or* an incorrect procedure. This is not the time to be providing instruction. The purpose of this test is to determine what the student is able to do.

For students at Station 1, Sorting Creatures: Be sure that students are recording their answers in the test booklet after performing the sort using the separate sorting chart.

For students at Station 2, Ramp and Golf Ball: While at this station, the students will raise their hands to return the golf ball. Do *not* give the students the Ping-Pong ball at this time. Wait until the students raise their hands a second time.

After 10 minutes, say:

You have 5 minutes left.

After 13 minutes, say:

You have 2 minutes left.

After 15 minutes, say:

Stop work.
Please put all the equipment back the way it is shown on the Station Diagram. Put the microscopes back to lowest power; put the balances back to zero; put the calculators back to zero. (*pause*)

Before the students rotate to the next station, check to be sure all equipment and materials are positioned as shown in the Station Diagrams. Be sure that the Ping-Pong balls have been collected and the golf balls have been returned to each Station 1 setup.

You are now going to move to your next station. I will show you how to do that. Be sure to take your test booklet and pencil with you.

Because stations have been arranged in groups, student movement can be kept to a minimum. Take one group and demonstrate for the whole class how students will move to the next station. Then let each group move one at a time and provide help when necessary. When all the students have moved, repeat the directions that start on page 38 until the testing session is completed.

When the students have completed ALL THREE STATIONS, say:

The science skills test is over. Thank you for being so attentive and cooperative during the test. Please wait quietly until all test materials are collected and you are dismissed.

Be sure to collect the test booklets and pencils from all students before they leave the room. Return all unused test booklets and materials to the Department according to the instructions on page 15 of this manual.

Rating the Performance Test

The entire Performance Test will require rating by teachers. School administrators decide who can rate the Grade 8 Intermediate-Level Science Test after review of the teacher's certification, and present and past teaching assignments. It is estimated that a team of three teachers should be able to rate the responses to all three stations for about 30 students in one hour. This scoring can be most quickly accomplished if one teacher rates all students' responses to Station 1 while another rates all students' responses to Station 2 and a third rates all students' responses to Station 3.

The Performance Test, Form A Rating Guide gives detailed directions for rating the Performance Test and specific criteria for rating each item. It is printed on yellow paper and is included in the shipment of test materials from the Department. In rating the students' test booklets, each rater should follow the procedures in the rating guide. The rating should be completed prior to June 17, the date when answer sheets must be submitted to the scanning centers.

Organizing the Rating Process

The following is a suggested procedure for managing the mechanics of the rating process.

1. Designate one person as the coordinator of the rating process. The coordinator may be appointed at either the building or the district level. He or she will be responsible for training and supervising raters and may rate some of the students' responses.
2. Set aside one room as a central rating room for collecting, sorting, circulating, and storing test booklets and for preparing and maintaining records.
3. Provide adequate time for rating during the school day.
4. Make sure each rater receives approximately the same number of student booklets.
5. Provide a copy of the completed Test Administrator's Record Sheet (in Appendix III) to each rater.
6. At least two teachers, and preferably three, should participate in rating the questions on the Performance Test. Each should be responsible for rating all of the questions for one station. No one teacher is to score all the open-ended questions in a student's answer booklet.
7. Prior to the rating of the students' answers to the Performance Test, allow time to provide training for all raters (even if they have received prior training). If possible, select at random 10–15 student test booklets and duplicate them for use as a "warm-up" exercise with the raters for discussion of the questions, the criteria, and the rating of each item. During the training exercise, after three or four complete student test booklets have been rated, ask the raters to indicate, by a show of hands, how many credits they gave each answer. If there is some disagreement about the number of credits to be awarded for an answer, ask raters who gave different credits to an answer to explain their rating by citing specific criteria from the rating guide.
8. Raters should have a set of stations available to check the accuracy of questionable student answers by actually performing the task for which the answer was given.

Note: Some schools may elect to administer the Performance Test prior to the Written Test. If this is the case, it is recommended that schools do *not* record the students' Performance Test scores on their scannable answer sheets until after the students have taken the Written Test and completed their portion of the answer sheet. This way, students will not be distracted by seeing their Performance Test scores on the answer sheets. This will also prevent students from altering those scores.

Finality of Teacher Scoring Committee's Scores

When the teacher scoring committee completes the scoring process, test scores must be considered final and must be entered onto students' permanent records.

Principals and other administrative staff in a school or district do not have the authority to set aside the scores arrived at by the teacher scoring committee and rescore student examination papers or to change any scores assigned through the procedures described in this manual and in the scoring materials provided by the Department. Any principal or administrator found to have done so, except in the circumstances described below, will be in violation of Department policy regarding the scoring of this test. Teachers and administrators who violate Department policy with respect to scoring State examinations may be subject to disciplinary action in accordance with Sections 3020 and 3020-a of Education Law or to action against their certification pursuant to Part 83 of the Regulations of the Commissioner of Education.

On rare occasions, an administrator may learn that an isolated error had occurred in arriving at a final examination score for a student or in recording the student's score in the permanent records. For example, the final examination score may have been based on an incorrect summing of the student's raw scores for parts of the test or from a misreading of the conversion chart. When such errors involve no more than five students' final examination scores and when such errors are detected within four months of the test date, the principal may arrange for the corrected score to be recorded in the student's permanent record. However, in all such occurrences, the principal must advise the Office of State Assessment in writing that the student's score has been corrected. The written notification to the Department must be signed by the principal or superintendent and must include the names of the students whose scores have been corrected, the name of the examination, the students' original and corrected scores, and a brief explanation of the nature of the scoring error which was corrected.

If an administrator has substantial reason to believe that the teacher scoring committee has failed to accurately score more than five student answer papers, the administrator must first obtain permission in writing from the Office of State Assessment before arranging for or permitting a rescoring of student papers. The written request to the Office of State Assessment must come from the superintendent of a public school district or the chief administrative officer of a nonpublic or charter school and must include the examination title, date of administration, and number of students whose papers would be subject to such rescoring. This request must also include a statement explaining why the administrator believes that the teacher scoring committee failed to score appropriately and, thus, why he or she believes rescoring the examination papers is necessary. As part of this submission, the school administrator must make clear his or her understanding that such extraordinary re-rating may be carried out only by a full committee of teachers constituted in accordance with the scoring guidelines presented in this manual and fully utilizing the scoring materials for this test provided by the Department.

On occasion, the Department finds it necessary to notify schools of a revision to the scoring key and rating guide for an examination. Should this occur after the scoring committee has completed its work, the principal is authorized to have appropriate members of the scoring committee review students' responses only to the specific question(s) referenced in the notification and to adjust students' final examination scores when appropriate. Only in such circumstances, the school is not required to notify or obtain approval from the Department to correct students' final examination scores.

Appendix I

Materials Needed to Administer the Performance Test, Form A

The Department will provide the test booklets, rating guides, and other printed administration materials. Schools are responsible for obtaining the materials needed for the performance tasks. Schools can either prepare these materials or purchase the materials in a complete kit from one of several vendors (see Appendix VIII). Schools might want to contact the vendor that has supplied them with kits in the past. A list of materials that will be needed for *one* setup for each of the three stations appears below.

Schools will need to provide microscopes, triple-beam balances, and handheld calculators.

Station 1: Sorting Creatures

Materials for one station:

- Black permanent marker
- Collection of six specific plastic creatures
- Index card (3" × 5", unlined)
- Masking tape
- Microscope with an eyepiece of 10x and at least two lenses (providing total magnification of about 40x and 100x)
- Slide X—slide of microscopic specimen: (recommend *Drosophila*—must clearly show six legs)
- Slide A—slide of grid with 1-mm squares
- Sorting Chart (8½" × 14"), laminated

Station 2: Ramp and Golf Ball

Materials for one station:

- Ruler with groove (metric)
- Round plastic container with hole
- Support block(s)
- Place mat with measuring strip
- 5-gram mass or 25-cent coin
- Golf ball
- Masking tape
- Ping-Pong ball
- Carpet tape or duct tape
- Black permanent marker

Station 3: Woods and Water

Materials for one station:

- Balance (triple beam, 0.1 g)
- Block A (3.7-cm cube) in plastic resealable bag (pine, maple, or other wood with a density <1.0 g/cm³)
- Block B (2.5-cm cube) (lignum vitae or other wood with a density >1.0 g/cm³, available in science stores or wood specialty stores)
- Handheld calculator
- Paper towels
- Black permanent marker
- Ruler (metric)
- Transparent plastic cup (5 oz) with water
- Plastic bag (resealable)
- Masking tape
- Label

Appendix II

Comparison of Possible Performance Test Sites

SITE: CLASSROOM	
<i>Advantages</i>	<i>Disadvantages</i>
Ease of station preparation Furniture already at site Good station-to-station movement Only classroom teacher and students will be disrupted Secure location	Need to relocate the teacher and students whose room is being used for the duration of the testing
SITE: LIBRARY	
<i>Advantages</i>	<i>Disadvantages</i>
Large space Tables and/or carrels and chairs at site Secure location	May disrupt more teachers and students than classroom site Library unavailable for other uses during testing
SITE: CAFETERIA	
<i>Advantages</i>	<i>Disadvantages</i>
Large space Tables and chairs at site	May disrupt a large number of teachers and students Unavailable for other uses during testing Poor security Breakfast/lunch program may interrupt the testing Poor acoustics and high noise levels May need to disassemble and reassemble stations before and after lunch
SITE: SCIENCE ROOM	
<i>Advantages</i>	<i>Disadvantages</i>
Large space Tables and/or carrels and chairs at site Secure location Science materials on site Counters with electrical outlets for microscopes	May disrupt more teachers and students than classroom site
SITE: GYMNASIUM	
<i>Advantages</i>	<i>Disadvantages</i>
Large space	May disrupt large numbers of teachers and students Need to move tables or desks and chairs into space Poor security Poor acoustics Not a familiar testing site for students May need to disassemble and reassemble stations to accommodate physical education classes
SITE: HOME AND CAREERS CLASSROOM	
<i>Advantages</i>	<i>Disadvantages</i>
Large space Counters with electrical outlets for microscopes	May disrupt more teachers and students than classroom site

Appendix III
Test Administrator's Record Sheet
Grade 8 Intermediate-Level Science
Performance Test, Form A

This record sheet should be completed by the person(s) administering the Performance Test. At the conclusion of the test administration, return this completed record sheet with the student test booklets to the person in charge of the testing program for the school. **The information on this record sheet will be needed to accurately score the tests.** Be certain to fill in both sides of this sheet completely.

Test Administrator(s): _____ Date: _____

School Name: _____ School District: _____

Station 1: Sorting Creatures
Microscope Power and Data for *Drosophila* on Slide X

Group	Lowest Power Available on Microscope	Field of View Diameter (to nearest 0.5 mm)	Acceptable Range for Field of View (± 0.5 mm)	Length of <i>Drosophila</i> (to nearest 0.5 mm)	Acceptable Range for Length (± 0.5 mm)	Number of Legs That Are Clearly Visible	Acceptable Range for Number of Legs (± 1)

Examination Scoring Certificate

The University of the State of New York
THE STATE EDUCATION DEPARTMENT
Office of State Assessment
Albany, New York 12234

EXAMINATION STORAGE CERTIFICATE
Grade 8 Intermediate-Level Science Test

School Name _____

City or Town _____

Examination Date _____

(Month/Year)

I, the undersigned principal of the school named above, do hereby declare that each of the security procedures listed below was fully and faithfully observed for the current administration of the Grade 8 Intermediate-Level Science Test.

1. The sealed packages of secure test materials were stored in a secure place at the location agreed to on the online Examination Storage Plan submitted to the Department for the above examination period.
2. The secure place was maintained under strict security conditions.
3. An inventory of the test materials was conducted as soon after delivery as was practical. The State Education Department was notified if any of the packages of secure test materials were not properly sealed when received. The sealed packages of secure test materials were replaced inside the secure location immediately after the inventory was completed.
4. The sealed packages of secure materials for the test were not removed from the secure location, except for the inventory of test materials shipped to the school, until the day on which the test was scheduled to be administered.
5. The sealed packages of secure materials for the test were not opened until the day on which the test was scheduled to be administered.

Name of Principal (print or type) _____

Signature of Principal _____ Date ____ / ____ / ____

After completion, retain in school files for one year.

DEPUTY AND PROCTOR CERTIFICATE
Grade 8 Intermediate-Level Science Test

School Name _____

City or Town _____

Examination Date _____

(Month/Year)

We, the undersigned deputies and proctors who assisted in the administration of the Grade 8 Intermediate-Level Science Test, hereby declare our belief in the correctness of the following statement:

The rules and regulations for administering the test were fully and faithfully observed, and in particular:

1. The rules for administering the test were read to or read by each person who assisted in administering the test.
2. The test was held within the prescribed dates.
3. The tests were kept in the sealed packages until the administration date.
4. The students were given appropriate instructions and orientation before beginning the test.
5. The students were so seated as to prevent collusion.
6. Adequate supervision was maintained throughout the administration of the test.
7. The answer papers were collected from the students immediately at the close of the test.
8. All test booklets and scoring materials for the test were collected and returned to the principal.

EXAMINATION SCORING CERTIFICATE

Grade 8 Intermediate-Level Science Test

School Name _____

City or Town _____

Examination Date _____
(Month/Year)

As one of the undersigned scoring leaders and scorers who participated in the scoring of the Grade 8 Intermediate-Level Science Test (*each* participating scoring leader and scorer *must* sign below), I hereby declare my belief in the correctness of the following statement:

The rules and guidance materials for scoring the examination were fully and faithfully observed, and in particular:

1. As a scorer, I was trained using the procedures and materials described in the Grade 8 Intermediate-Level Science Test Manual for Administrators and Teachers, the Rating Guide for Performance Test, Form A, and the Rating Guide for the Written Test.
2. The scoring committee, of which I was a member, included the required minimum number of scorers as specified in the Grade 8 Intermediate-Level Science Test Manual for Administrators and Teachers.
3. Test questions were assigned to me for rating according to the procedures described in the Grade 8 Intermediate-Level Science Test Manual for Administrators and Teachers.
4. The answer sheets and examination booklets were safeguarded while scoring was occurring.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

11. _____
12. _____
13. _____
14. _____
15. _____
16. _____
17. _____
18. _____
19. _____
20. _____

As principal, I attest that the rules and regulations for scoring, as listed above, were fully and faithfully observed.

Principal _____

Date ____ / ____ / ____

After completion, retain in school files for one year.

Appendix VII

Information on Ungraded Students

Students who are graded must take the State examination for the grade level in which they are enrolled. The chart below is to be used solely to ascertain the appropriate grade-level tests to administer to ungraded students with disabilities.

Age Ranges for Testing on the NYSAA and General Assessments for Ungraded Students with Disabilities at the Elementary and Middle Levels in 2009–2010

Assessment	Birth Date	Reaches Age Given Between September 1, 2009 and August 31, 2010
Grade 3 English Language Arts, Mathematics	September 1, 2000–August 31, 2001	9
Grade 4 English Language Arts, Mathematics, Science	September 1, 1999–August 31, 2000	10
Grade 5 English Language Arts, Mathematics, Social Studies	September 1, 1998–August 31, 1999	11
Grade 6 English Language Arts, Mathematics	September 1, 1997–August 31, 1998	12
Grade 7 English Language Arts, Mathematics	September 1, 1996–August 31, 1997	13
Grade 8 English Language Arts, Mathematics, Science, Social Studies	September 1, 1995–August 31, 1996	14

Appendix VIII

Suppliers for Grade 8 Intermediate-Level Science Performance Test Kits

The Grade 8 Intermediate-Level Performance Test, Form A, will be given during the designated administration period. This is the same performance test that has been administered since 2000. A new kit will not be needed. The suppliers below can be contacted if replacement materials or additional kits are needed.

Updated Spring 2008

Appendix IX

Performance Levels Chart

The chart on the next page defines the four performance levels for this test. The state-designated level of performance for this test is a final score of 65 or higher (level 3 and 4). Students scoring below 65 (levels 1 and 2) must be provided with academic intervention services according to section 100.2(ee) (i) of the Regulations of the Commissioner of Education. The chart provides the score intervals and a brief description of student abilities at each level.

Performance Levels
Grade 8 Intermediate-Level Science Test

Level	Score Range	Description of Student Performance
4	85 – 100	<p style="text-align: center;">Meeting the Standards with Distinction</p> <ul style="list-style-type: none"> • Student demonstrates superior understanding of the intermediate-level science content and concepts for each of the learning standards and key ideas assessed. • Student demonstrates superior intermediate-level science skills related to each of the learning standards and key ideas assessed. • Student demonstrates superior understanding of the intermediate-level science content, concepts, and skills required for a secondary academic environment.
3	65 – 84	<p style="text-align: center;">Meeting the Standards</p> <ul style="list-style-type: none"> • Student demonstrates understanding of the intermediate-level science content and concepts for each of the learning standards and key ideas assessed. • Student demonstrates the science skills required for intermediate-level achievement in each of the learning standards and key ideas assessed. • Student demonstrates understanding of the intermediate-level science content, concepts, and skills required for a secondary academic environment.
2	44 – 64	<p style="text-align: center;">Not Fully Meeting the Standards</p> <ul style="list-style-type: none"> • Student demonstrates only minimal proficiency in intermediate-level science content and concepts in most of learning standards and key ideas assessed. • Student demonstrates only minimal proficiency in the skills required for intermediate-level achievement in most of the learning standards and key ideas assessed. • Student demonstrates marginal understanding of the science content, concepts, and skills required for a secondary academic environment.
1	0 – 43	<p style="text-align: center;">Not Meeting the Standards</p> <ul style="list-style-type: none"> • Student is <i>unable</i> to demonstrate understanding of the intermediate-level science content and concepts in most of the learning standards and key ideas assessed. • Student is <i>unable</i> to demonstrate the science skills required for intermediate-level achievement in most of the learning standards and key ideas assessed. • Student is <i>unable</i> to demonstrate evidence of the basic science knowledge and skills required for a secondary academic environment.
