The grade 4 social studies core curriculum:
- builds on students’ understanding of families, schools, and communities.
- highlights local political institutions and historical developments with connections to New York State and United States history.
- provides an in-depth study of government including the structure and functions of the different branches of local government.
- explores the rights and responsibilities of citizens.
- expands such civics concepts as power, equality, justice, and citizenship.
- establishes a chronological framework to help students organize information about their communities within the context of New York State history.
- explores such themes and events as: Native American Indians of New York State, the European encounter, the colonial and Revolutionary War periods, the new nation, the period of industrial growth and expansion in New York State, and local and State government.
- is a foundation for the social history that students will study in grades 7 and 8.

**FOCUS QUESTIONS**

- Who were the first inhabitants of New York State and how did they live?
- Who were the European explorers who claimed and settled New York State?
- What were the effects of the slave trade and slavery on New York State?
- What was life like in New York under the Dutch, the French, and the English?
- How did the Revolutionary War impact New York State?
- How was the government of the United States of America formed? Who were the founders and what were the founding documents?
- What were the impacts of industrialization and expansion on New York State?
- How did urbanization change New York State?
- What is structure and function of government at the local and State levels?
**Content Understandings**

**Native American Indians of New York State**

Native American Indians were the first inhabitants of our local region and State. The Iroquois (Haudenosaunee—People of the Longhouse) and the Algonquians were the first inhabitants of our State. The Iroquois and Algonquians met their basic needs of food, clothing, and shelter in what is now New York State. Geographic factors and the environment shaped Native American Indian settlement patterns. Native American Indians who lived in our community and State have achieved significant accomplishments and made important contributions.

**Three worlds (Europe, the Americas, Africa) meet in the Americas**

Explorers from France, England, and the Netherlands came to what is now New York State in a search for an all-water route to Asia through North America. European exploration had social/cultural, economic, political, and geographic impacts on the Americas. The slave trade carried enslaved people from Africa to the thirteen colonies; slaves did many of the same jobs as European colonists and free African Americans. Many different groups of people from all over the world migrated to our local region and State.

**Colonial and Revolutionary periods**

Dutch, English, and French colonists made lasting cultural contributions that helped shape our community, local region, and State. The social/cultural, political, economic, and scientific/technological life in the colonies changed over time. Everyday life in colonial New York was different from everyday life today. The colonists depended on and modified their physical environments. In colonial New York, the New York Assembly was elected by some New Yorkers, but governors were appointed by the British government. Colonial societies were organized to answer three fundamental economic questions: What goods and services do we produce? How do we produce them? For whom do we produce them? In our local region and State, there were many different ways of making a living during colonial times. There were social, political, and economic causes of the American Revolution. Many individuals and groups made important contributions to colonial life.

**The Revolutionary War in New York State**

New York State’s location and its relationship to the locations of other people and places meant that New York would play a key role in the American Revolution. New York’s waterways played a vital role in Britain’s plans to capture New York; several key battles of the Revolution were fought along New York’s rivers and lakes. The American Revolution had a lasting effect on the power of the Iroquois League. The Battle of Saratoga was a turning point in the American Revolution. Not all colonist held the same viewpoint regarding the struggle against Great Britain. The leaders of the American Revolution came from all walks of life and regions of the thirteen colonies. The American Revolution had a lasting impact on New York.

**The new nation**

The foundations for American democracy and the new government can be traced to the Mayflower Compact, the Declaration of Independence, and the Constitutions of the State of New York and the United States of America. The Bill of Rights lists the fundamental rights that belong to the people. Many individuals and groups helped to strengthen democracy in the United States. The traditions of people from a variety of groups and backgrounds played important roles in establishing the roots of American culture. Shared values, practices, and traditions unite all Americans.
**Industrial growth and expansion**

During the 1800s, new inventions changed the ways Americans traveled and communicated with each other. In the late 1800s and early 1900s, the number of immigrants coming to New York State and the United States increased dramatically.

People migrated to the United States for such reasons as poverty, hunger, and/or a lack of freedom in their homelands. Immigrants made important contributions to New York State and the United States of America.

The Industrial Revolution significantly changed the way goods were made, and services delivered. There were many geographic reasons why New York State became a leading manufacturing center.

**Urbanization: economic, political, and social impacts**

After World War II, thousands of people moved from rural areas to the urban areas of New York State. The people of New York State are economically interdependent. The labor movement struggled to improve working conditions for children and adults.

**Government**

The basic democratic values of American democracy include an understanding of the following concepts: individual rights to life, liberty, property, and the pursuit of happiness; the public or common good; justice; equality of opportunity; diversity; truth; and patriotism.

The fundamental values and principles of American democracy are expressed in the Declaration of Independence, Preamble to the United States Constitution, Bill of Rights, Pledge of Allegiance, speeches, songs, and stories.

**Purposes of government**

The basic purposes of government in the United States are to protect the rights of individuals and to promote the common good.

**Local and State governments**

New York State and local governments include executive, legislative, and judicial branches. Democracy, power, and citizenship are key terms and concepts related to government.

The United States Constitution and the Constitution of the State of New York with their respective Bills of Rights were developed as written plans for organizing the functions of government and safeguarding individual liberties.

People elect and/or appoint leaders who make, enforce, and interpret laws. Citizenship includes an awareness of the holidays, celebrations, and symbols of our nation, including the flag of the United States of America, its proper display, and use.

Citizenship includes rights and responsibilities that apply to the classroom, school, home, and local community. Effective, informed citizenship involves duties such as voting, jury service, and other service to the local community.

Citizens can participate in political decision making and problem solving at the local, State, and national levels.
Native American Indians of New York State

- Native American Indians were the first inhabitants of our local region and State.
- The Iroquois (Haudenosaunee—People of the Longhouse) and the Algonquians were the first inhabitants of our State.
- The Iroquois and Algonquians met their basic needs of food, clothing, and shelter in what is now New York State.
- Geographic factors and the environment shaped Native American Indian settlement patterns.
- Native American Indians who lived in our community and State have achieved significant accomplishments and made important contributions.

Classroom Activities

Have students label the six nations of the Iroquois Confederacy and the Algonquians on an outline map of New York State.
- Who were the first inhabitants of New York State?
- How did the Iroquois and Algonquians meet their basic needs and wants?
- How did the environment and geography influence the Native American Indian settlements?
- Describe and compare the contributions of the Native American Indians of New York State?

IROQUOIS ALGONQUIANS

Read Indian Captive by Lois Lenski to the students (an excerpt may be sufficient). Have students listen for examples that describe the life of the Iroquois.

Have students write diary entries as an Iroquois child of the 1600s and entries as a modern-day child of Iroquoian descent.

Work with students to prepare a Native American Indian feast featuring authentic foods (three sisters: corn, beans, and squash), crafts (beadwork), games (lacrosse or snow snake), music, and dances. During the feast, have students role-play different figures (e.g., storytellers sharing their favorite legends, beadworkers making decorations).

Have students make murals or models, such as dioramas, depicting typical village life during the precolonial period; include longhouses, dome-shaped houses or wigwams, and stockades.

Have students design wampum belts that tell a story.
CONNECTIONS

Teacher Notes

• Consider carefully the following Sensitivity Guidelines for Discussing Native American Indians. [Full text appears in Appendix B.]
  - Don’t use the past tense when discussing Native American Indians unless it is clear that you are limiting that particular discussion to historical events.
  - Don’t use dehumanizing materials that treat Native American Indians as objects rather than as human beings.
  - Don’t lump all Native American Indians together.
  - Don’t accept, ignore, or propagate stereotypical views of Native American Indians.
  - Don’t display illustrations that mislead or demean.
  - Don’t use derogatory terms.
  - Don’t use the term The First Thanksgiving.
  - Don’t teach that Columbus “discovered” America.
  - Don’t emphasize violence and warfare.
  - Don’t act out sacred dances or ceremonies, or play games like “cowboys and Indians.”

• Make sure that students understand the perspective of Native American Indians, who live, work, and go to school in New York State today.
• Encourage children to be respectful as they learn about the way of life and/or culture of the Iroquois or Algonquians.
• Begin a classroom timeline and add appropriate dates throughout the school year.

Interdisciplinary Connections

SCIENCE
Explore with students the relationship between Native American Indians and the environment.
• How did Native American Indians adapt to their environment?
• How did they make use of natural resources?

PHYSICAL EDUCATION
Have students play Iroquois games.

ARTS
Engage students in discussing and making Native American Indian crafts, such as weaving cloth, making color dyes, and doing beadwork.

ENGLISH LANGUAGE ARTS
Share Native American Indian legends and poems with students. Then ask students to write and illustrate some legends and poems, reflecting the Native American Indian style.

Suggested Documents and Other Resources Selected by New York State Teachers

Speakers who are Iroquois or Algonquian
Exhibits in local museums, historical societies, or libraries
Outline map of New York State
Iroquois or Algonquian foods
Native American Indian posters

Three Worlds (Europe, the Americas, Africa) Meet in the Americas

- Explorers from France, England, and the Netherlands came to what is now New York State in a search for an all-water route to Asia through North America.
- European exploration had social/cultural, economic, political, and geographic impacts in the Americas.
- The slave trade carried enslaved people from Africa to the thirteen colonies; slaves did many of the same jobs as European colonists and free African Americans.
- Many different groups of people from all over the world migrated to our local region and State.

### Classroom Activities

- Have students read “America, 1492” and “Explorers” from Kids Discover. Discuss with the class.
- Distribute physical maps of New York State and ask students to map the routes of Champlain, Hudson, and Verrazano.
  - Who were the explorers of New York?
  - Why did these men make the voyages and what were the impacts of their travels?
- Have students prepare a mock interview of the explorers of New York State. Questions about country of origin, area of exploration, and dates and significance of the journey should be included. Help students make a class chart of information gathered.
- Assign a project such as creating murals depicting ships that were used by explorers and the lands they explored. Have students include flags from the explorers’ countries of origin.
- Discuss sailing vessels and navigation instruments used by the explorers. Have students construct a model or large diagram of Hudson’s Half Moon.
- Have students read Hudson’s log entries and draw a picture of what the land along the Hudson River looked like to him.
- Ask students to map places or structures in New York State that are named for explorers (e.g., Hudson River, Verrazano Narrows Bridge, Lake Champlain).
- Have students create a cultural diffusion chart showing crops, diseases, and technologies that were exchanged.

#### CULTURAL DIFFUSION

</tr>
</tbody>
</table>
Draw a large Venn diagram on the chalkboard and have students use it to compare slaves and indentured servants.
• What impact did the slave trade have on the colonies?
• What ethnic groups migrated to New York?

Have students write diary entries as slaves or indentured servants.
Suggest that students list natural resources identified or logged by the explorers, and describe uses for these resources.

**Teacher Notes**
• At the beginning of this unit, review the explorations of the Vikings and Columbus.
• You may wish to limit your selection of explorers to those who visited New York.
• Continue the class timeline.

**Interdisciplinary Connections**

**MATHEMATICS**
Have students use a scale of miles to calculate the distances explorers traveled.

**SCIENCE**
Have students investigate the navigation instruments used by early explorers.

**ENGLISH LANGUAGE ARTS**
Provide students with an opportunity to read journals, logs, and diaries from the Age of Exploration.

**ARTS**
Have students investigate the kinds of ships used in the Age of Exploration. In addition, they might analyze and draw the sailing vessels of the period.

**Suggested Documents and Other Resources Selected by New York State Teachers**
Excerpts from logs, diaries, or journals of explorers
Exploration maps of New York State
Drawings or paintings of sailing ships of the times (to compare with modern-day ships)
Charts of navigational instruments
Flags of explorers’ nations
Diagrams of famous ships

Colonial and Revolutionary Periods

- Dutch, English, and French colonists made lasting cultural contributions that helped shape our community, local region, and State.
- The social/cultural, political, economic, and scientific/technological life in the colonies changed over time.
- Everyday life in colonial New York was different from everyday life today.
- The colonists depended on and modified their physical environments.
- In colonial New York, the New York Assembly was elected by some New Yorkers, but governors were appointed by the British government.
- Colonial societies were organized to answer three fundamental economic questions: What goods and services do we produce? How do we produce them? For whom do we produce them?
- In our local region and State, there were many different ways of making a living during colonial times.
- There were social, political, and economic causes of the American Revolution.
- Many individuals and groups made important contributions to colonial life.

Classroom Activities

Have students label and color maps of land claims in New York during the colonial period.
- Where were the Dutch, English, and French land claims in New York?

Have students label and color a map of the 13 English colonies.

Have students write newspaper articles about important events in New Netherlands.

Have students make a graphic organizer to show where colonists in New York came from and what their reasons were for coming.
- What were the social, cultural, economic, religious, and political characteristics of Dutch and English colonies?

Case Study: Dutch New York

Have students create a timeline for major historical events in New Netherlands.

Have students read diaries of colonists who came to New York.

Suggest that students pretend they are coming to settle in the colony. They should pack a small trunk with food, clothing, tools, and other supplies. Have them make a list of the supplies they would bring.
CONNECTIONS

Have students study the contributions of the Dutch. As a supplementary activity, they might cook some Dutch foods (waffles, coleslaw, and cookies) and play Dutch games such as skittles.

Have students write a diary entry as a child during colonial times. They should describe what their trip to America was like, what they saw upon arrival, and how they adapted to the new environment.

Have students create a model of a colonial village (milk cartons cut and covered work well).

Explore with students how the colonists answered fundamental economic questions:
• What goods and services were produced?
• How were these goods and services produced?
• For whom were these goods and services produced?

Help students plan a colonial day featuring hands-on activities such as candle making, weaving, spinning, and dying cloth.

The English took over New Netherlands in 1664. Have students debate the idea of fighting or surrendering to the British.

Have students read stories of life in the Dutch and English colonies.
• What were the influences and contributions of the Dutch in New York?

Have students reenact the trial of John Peter Zenger. This important trial helped to establish the principles of free speech and freedom of the press.

Engage students in an in-depth study of the history of their region. They should find out why, when, and by whom their area was settled. They should learn about economic patterns, ways of making a living, social and cultural life, and government and politics. They also should look at important people and events in the local community. At the conclusion of the project, they should share their findings in an OLD HOME DAY presentation.

Teacher Notes
• Important people, places, and major events relevant to the region in which you teach should be included in the study of the region’s history.
• Arrange a walking tour of the historic section of your local community.
• Continue the class timeline.
• Peter Stuyvesant passed strict laws in New Amsterdam. He wanted everyone to follow his religion. He tried to banish the Quakers, but the people protested. This protest is known as the Flushing Remonstrance
• Have students read and discuss sections of the Flushing Remonstrance. (http://www.newsday.com/extras/lihistory/vault/hs301alv.html)

Interdisciplinary Connections

MATHEMATICS
Have students collect population statistics from the period 1620–1775. Then have them make a graph based on this information.

SCIENCE Have students examine settlers’ tools and devices. Make sure they perceive these as examples of simple machines. Invite specialists from a local museum talk to students on this topic.
ENGLISH LANGUAGE ARTS
Provide students with the opportunity to read articles from colonial newspapers and journals.

ARTS
Have students make models of villages, or create a timeline of American artists of the colonial period. Take students to local museums to see the work of colonial artists or hear colonial music.

PHYSICAL EDUCATION
Have students research and play Dutch games.

**Classroom Activities**

Ask students to take the position of patriot, loyalist, or neutral party for a debate of the issues.

- What were the viewpoints of the patriots and the loyalists?

Have students make posters designed to convince others to join the patriots’ or loyalists’ cause.

Have students define the phrase *taxation without representation*. Allow them to create a graph-ic representation, orally or in writing, as a supplement to their definition, if they wish.

- What were the causes of the American Revolution?

Brainstorm with students a list of freedoms that are important to them. Ask them what their reactions would be if one of those freedoms were taken away. Then have them write persuasive essays or speeches explaining their feelings.

- What laws led up to the decision to fight the British and what were the patriots’ reactions to these laws?
- What was the purpose of the Declaration of Independence?

Have students write to King George to explain why, as colonists, they want self-government.

Have students make a Revolutionary War timeline.

- What were the effects of the American Revolution?
- What was important about New York’s role in the American Revolution?

Have students label a map of New York to show important places and events of the American Revolution. Suggest that they label Burgoyne’s three-point plan on a map. Have them show the major battles and color-code the map by victory.

- What battles were fought in New York?
- What events should be included on a Revolutionary War map?

Have students write biographical sketches of important people in the American Revolution. Ask them to write interview questions as if they were a reporter.

- Who were the leaders of the American Revolution?

**Teacher Notes**

- Continue the class timeline.
Interdisciplinary Connections

ENGLISH LANGUAGE ARTS
Have students create an advertisement, using words and pictures, to illustrate an opinion regarding the American Revolution.

ARTS
Have students analyze political cartoons that represented differing points of view regarding the British laws and the decision to become independent.

The New Nation

• The foundations for American democracy and the new government can be traced to the
  Mayflower Compact, the Declaration of Independence, and the Constitutions of the State of New
  York and the United States of America.
• The Bill of Rights lists the fundamental rights that belong to the people.
• Many individuals and groups helped to strengthen democracy in the United States.
• The traditions of people from a variety of groups and backgrounds played important roles in
  establishing the roots of American culture.
• Shared values, practices, and traditions unite all Americans.

Classroom Activities

Have students make a class chart that identifies each of the following documents and explains
their roles in the development of the nation: Mayflower Compact; Declaration of Independence;
and the Constitution of the United States, including the Bill of Rights.
• What are the important documents that relate to democracy in the United States?

Have students list the strengths and weaknesses of the Articles of Confederation.

After studying the parts of the United States Constitution, students can work in groups to write
a class or school constitution. Quill and ink could be used to draft the final copy.

Have students illustrate the right that is guaranteed in each of the amendments of the Bill of
Rights. The responsibilities corresponding to each right should be included in the illustration.

Have students discuss orally or in writing how life in the United States would be different if
one or more of the rights from the Bill of Rights were eliminated.
• What rights and responsibilities are included in the Bill of Rights?

Have students research the contributions of John Hancock, George Washington, John Adams,
Students can role-play a “meet the press” function with the founding fathers.
• Who are the people important to the framing of the Constitution and what were their
  contributions?
Have students study the Pledge of Allegiance to learn the meaning of all the words. Have students rewrite the pledge to simplify the text for younger students.

Have students learn the words to patriotic songs including the “The Star-Spangled Banner.”

As a class, make a mural, posters, or graphic organizers highlighting our patriotic holidays and celebrations.

- What are the values, practices, and traditions that unite all Americans?
- What role did people of different ethnic backgrounds play in the development of American culture?

**Teacher Notes**

- The National Archives and Records Administration (NARA) publication *Teaching with Documents* is a collection of excellent learning experiences. Two such experiences are “Join the Signers” and “Images of the American Revolution.”

---

**Interdisciplinary Connections**

**ARTS**

Have students examine famous paintings and illustrations focusing on individuals and groups that have strengthened democracy in the United States.

**ENGLISH LANGUAGE ARTS**

Have students write essays describing the ratification of the Constitution. Have them role-play the perspectives of various federalists and antifederalists who worked toward or against ratification.

---

**Industrial Growth and Expansion**

- During the 1800s, new inventions changed the ways Americans traveled and communicated with each other.
- In the late 1800s and early 1900s, the number of immigrants coming to New York State and the United States increased dramatically.
- People migrated to the United States for such reasons as poverty, hunger, and/or a lack of freedom in their homelands.
- Immigrants made important contributions to New York State and the United States of America.
- The Industrial Revolution significantly changed the way goods were made, and services delivered.
- There were many geographic reasons why New York State became a leading manufacturing center.

**Classroom Activities**

**Case Study: Transportation Revolution**

- Have students make posters to advertise travel on steamboats, railroads, and the Erie Canal. Compare these different modes of transportation. Have students make diagrams that explain how the steam engine works, and ask them to add captions.
  - How did advances in transportation, communication, and technology in the 19th century change the United States?

- Have students draw and label the Erie Canal and cities along its route on a New York State outline map. Then have them draw and label railroad lines of the 1800s and the cities they connected on another outline map.
  - How did changes in transportation affect industrialization and expansion?

- Have students pretend to be reporters in the 1800s and write articles that describe travel by train, steamboat, or packet boat.

- Have students draw a mural or series of pictures depicting the Erie Canal in the mid-1800s. Include packet boats, line boats, goods shipped, canal-side stores, and bridges.

- Have students make a graphic showing how raw materials become manufactured goods (e.g., how iron ore becomes steel).

**Case Study: Immigration**

- Have students pretend to be newly arrived immigrants living in New York City in the late 1800s. Each student should write a letter describing the trip and recording thoughts about this new nation.
  - What impact did the immigration of the late 19th century have on New York State? On various cities and towns?
  - What contributions did immigrants make to New York State?

- Have students read about Ellis Island as an entry point or gateway for immigrants in the 19th century. Ask students to discuss immigrants’ experiences orally or in writing.
Have students research their families’ ethnic backgrounds and then share customs and traditions of their heritage with classmates. Have them label their countries of origin on a class map.

Help students to organize and conduct an ethnic festival featuring foods, music, and crafts representative of the countries studied. The students can also make and display a flag map for the occasion.

Case Study: Industrialization
Have students find out what factories are located in their local communities and what goods are produced.
- How did the development of factories and industrialization impact New York State?
- What industries grew in New York State?
- What were the relationships between geographic factors, industrialization, and expansion?

Have students analyze the photographs of Lewis Hine (see the National Archives and Records Administration [NARA] website http://www.nara.gov).

Have students make a web or other graphic organizer called THE GROWTH OF NEW YORK.

Teacher Notes
- Note the significance of the development of the Erie Canal to New York State and New York City.
- Make connections between improved transportation and the growth of cities and manufacturing.
- Local history can be taught with this unit or the colonial unit, depending on when your local community was developed. In western New York it might be more appropriate to teach local history during the expansion unit, while in eastern New York it might be more appropriate to teach it during the colonial unit.

Interdisciplinary Connections

MATHEMATICS
Have students graph statistics showing the movement of goods on the Erie Canal in comparison to the movement of goods by train from 1830 to 1900. Indicate mileage and tonnage.
Have students make a graph showing the numbers of immigrants from major countries in the 19th century.

SCIENCE
Have students explore the technology that made industrial growth and expansion possible (steam power, locks, aqueducts). See also “Teaching with Documents” (Digital Classroom Teaching) on the NARA website for articles on Alexander Graham Bell’s patent for the telephone or Thomas Edison’s patent for the electric lamp.

ENGLISH LANGUAGE ARTS
Have students read short stories and diaries that depict the immigrant experience. Stories should be representative of an ethnic background of an immigrant in the 19th century.

ARTS
Have students analyze the photographs of Lewis Hine. NARA provides teachers with a website of a series of document analysis worksheets. Using the photo analysis worksheet, students should explore Lewis Hine’s child labor and immigration photographs.
Have students put on an ethnic festival that includes foods, music, and dance.

Urbanization: Economic, Political, and Social Impacts

- After World War II, thousands of people moved from rural areas to the urban areas of New York State.
- The people of New York State are economically interdependent.
- The labor movement struggled to improve working conditions for children and adults.

Classroom Activities

Have students create a diagram that compares rural, urban, and suburban communities. For bulletin boards or large posters, have students cut out pictures representing life and land in each of the areas.
- What were the economic, political, and social impacts of rural to urban migration?

Have students make ads or posters, or write speeches or persuasive essays, to suggest that people move to or visit each of the areas.

Have students make posters entitled FROM WHEAT TO BREAD. Using these posters, students should explain economic interdependence.

Have students create a timeline featuring important events dealing with education.
- What is the purpose of public education in our State?

Have students make a booklet showing schools from 1800 to the present.

Have students participate in an 1800s school-day program. Some history museums offer these programs.

Have students read some of the American Girl magazines and use them to compare schooling through the years.

Have students investigate the history of their school district and create a display board to share information found.
Have students research one reformer of the period and then role-play him or her giving a speech at a rally or speaking at a “meet the press” function.

Involve students in a discussion about how they would feel if their parents told them they had to work in a factory instead of going to school. A writing activity discussing school attendance versus working in a factory could follow (see *From Forge to Fast Food: A History of Child Labor in New York State: Civil War to the Present, Vol. II*).

- Why did unions fight to limit the working hours of women and children?

Have one half of the class draw a poster of what children should do to grow up healthy. The other half of the class should draw a poster depicting the life of a child laborer.

**Teacher Notes**

- Check with local unions to see if they can provide materials about the labor movement.
- Continue the ongoing class timeline.
- Refer to the NARA website for the document analysis worksheets.

### Interdisciplinary Connections

**MATHEMATICS**

Have students gather data to make graphs showing the population shifts in the different areas over time. Have students look for trends and find reasons for the shifts, and then add short paragraphs of explanation to the graphs.

- What is the impact of economic interdependence?

**ENGLISH LANGUAGE ARTS**

Have students pretend to be newspaper reporters and write articles describing the working conditions pictured in Lewis Hine’s photographs or in photographs from Russell Freedman’s Immigrant Kids collection. As an alternative, students may write editorials representing the viewpoints of concerned citizens or parents who need their children’s wages to survive.

- Why did workers unionize?

**ARTS**

Have students put together a collection of political cartoons and photographs that were used by reformers during this period. Have students discuss the cartoonists’ and photographers’ point of view.

### Suggested Documents and Other Resources Selected by New York State Teachers

Have students explore the document analysis worksheets found on the NARA website to explore Lewis Hine’s photographs. In particular, they should focus on the photo analysis worksheet.

  National Archives and Records Administration
  Lewis Hine
The basic democratic values of American democracy include an understanding of the following concepts: individual rights to life, liberty, property, and the pursuit of happiness; the public or common good; justice; equality of opportunity; diversity; truth; and patriotism.

The fundamental values and principles of American democracy are expressed in the Declaration of Independence, Preamble to the United States Constitution, Bill of Rights, Pledge of Allegiance, speeches, songs, and stories.

Classroom Activities

Provide copies of the Declaration of Independence, the Constitution, and the Pledge of Allegiance to the students or display these documents with other speeches, songs, and poems. Have students recite the Pledge of Allegiance and discuss its meaning.

- What is a democracy?
- What are the fundamental rights of Americans?
- What are the values and principles expressed in our founding documents and speeches and in patriotic songs and stories?

Have students create a timeline featuring events leading up to the writing of the Declaration of Independence.

After studying the meaning of the words in the Preamble of the Constitution, students can rewrite the Preamble in simpler language.

To reinforce their understanding of the Bill of Rights, have students create a windsock using a rectangular strip of blue material with white stars on top and 10 red streamers (with one of the 10 amendments written on each) hanging down from the stars.

Case Study: American Heroes

Have students research the people who helped to define and establish our freedoms: George Washington, John Adams, Thomas Jefferson, James Madison, Alexander Hamilton. Students can then make short speeches to nominate these people to the FREEDOM HALL OF FAME.

- Who are the people who helped to shape and preserve our freedoms?

Have students research people who helped extend our freedoms: Harriet Tubman, Frederick Douglass, Abraham Lincoln, Susan B. Anthony, Martin Luther King, Jr., Cesar Chavez, and Betty Friedan.

- Who are the people who worked to preserve and extend our freedoms?
- Why are they considered heroes?
### Standard Concepts/Themes

<table>
<thead>
<tr>
<th>CONNECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Give students a list of local, county, State, and national government positions and ask them to investigate and categorize these positions as either elected or appointed.</td>
</tr>
<tr>
<td>Have students brainstorm a list of traits that would be found in a worthy candidate.</td>
</tr>
<tr>
<td>Have students hold a mock trial focusing on a situation that embodies concepts such as <em>fairness, justice, or equality</em>.</td>
</tr>
<tr>
<td>Have students compare their classroom constitution with the United Nations Declaration of the Rights of the Child.</td>
</tr>
<tr>
<td>Have students discuss the colors of the American flag and make personal flags as symbols of themselves. Have students research, examine, and display flags of other nations (see Appendix A: Patriotic Customs).</td>
</tr>
</tbody>
</table>

**Teacher Notes**

- Some activities about the founding documents are also listed in the unit on the new nation; these may be taught at an appropriate time.
- Continue the class timeline.

### Interdisciplinary Connections

**MATHEMATICS**

Have students graph the results of elections using election statistics.

**ENGLISH LANGUAGE ARTS**

Have students read patriotic poetry or research the origins and purposes of specific legal holidays. Their reports should include the historical background of various State and federal holidays.

Examine *Living Together Under the Law: An Elementary Education Law Guide*, 1994, prepared by the Law, Youth, and Citizenship Program of the New York State Bar Association and the New York State Education Department. The guide provides many learning experiences related to elementary law. It also provides a wide variety of activities involving the use of trade books. For more information about this publication, call (518) 474-1460 or email [http://www.nysba.org/lyc](http://www.nysba.org/lyc).

**ARTS**

Have students illustrate or make collages for words like *justice, liberty, equality, citizenship, diversity, assembly, patriotism, indivisible, and suffrage*. Have students identify important American symbols and/or use these symbols in a class collage.

Have students write and perform a Bill of Rights rap.

### Suggested Documents and Other Resources Selected by New York State Teachers

- Constitution of the United States
- New York State Constitution
- Declaration of Independence
- Pledge of Allegiance

Lesson Plans: The Bill of Rights
The basic purposes of government in the United States are to protect the rights of individuals and to promote the common good.

### Classroom Activities

Have students role-play participating in a baseball game without rules or attending a school without rules.

Have students create a chart on newsprint, listing the reasons for creating governments and answering the question, “Why do all groups and societies create rules and laws?”

<table>
<thead>
<tr>
<th>Reasons for Creating Rules</th>
<th>Why do all groups and societies create rules and laws?</th>

</tr>
<tr>
<td>Classroom</td>
<td></td>
</tr>
<tr>
<td>Team</td>
<td></td>
</tr>
</tbody>
</table>

Have students develop a class constitution and class rules.

Have students use dramatic play with puppets to investigate the consequences of breaking rules.

Have students collect and discuss newspaper cartoons dealing with rules and laws.

### Teacher Notes

- Additional activities dealing with the purposes of government can be found in Living Together Under the Law: An Elementary Education Law Guide.
Interdisciplinary Connections

**ENGLISH LANGUAGE ARTS/ARTS**

Ask students to write an essay explaining why rules are important. Have students study their own and other communities. Ask them to make a list of all the rules they find and then develop booklets that focus on these rules. Students can illustrate the booklet.

**Suggested Documents and Other Resources Selected by New York State Teachers**

Email for New York State Bar Association
Local and State Government

- New York State and local governments include executive, legislative, and judicial branches.
- Democracy, power, and citizenship are key terms and concepts related to government.
- The United States Constitution and the Constitution of the State of New York with their respective Bills of Rights were developed as written plans for organizing the functions of government and safeguarding individual liberties.
- People elect and/or appoint leaders who make, enforce, and interpret laws.
- Citizenship includes an awareness of the holidays, celebrations, and symbols of our nation, including the flag of the United States of America, its proper display, and use.
- Citizenship includes rights and responsibilities that apply to the classroom, school, home, and local community.
- Effective, informed citizenship involves duties such as voting, jury service, and other service to the local community.
- Citizens can participate in political decision making and problem solving at the local, State, and national levels.

<table>
<thead>
<tr>
<th>Standard</th>
<th>Concepts/Themes</th>

</tbody>
</table>

### Classroom Activities

Discuss with students what a community would be like without a fire department, police force, or school system. Ask students to explain why these departments or services are important.

Have students create a chart showing the structure and functions of the branches of New York State and local governments.

• What are the branches of government?
• What functions, leaders, and institutions are associated with each branch?
• What is meant by the term balance of power in our government?

<table>
<thead>
<tr>
<th>YOUR STATE AND LOCAL GOVERNMENTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHIEF EXECUTIVE</td>
</tr>
<tr>
<td>LEGISLATIVE BODY AND OFFICIALS</td>
</tr>
<tr>
<td>COURTS AND CORONERS</td>
</tr>
</tbody>
</table>

* Fill in only your own local government bodies and officials. Use actual names.
Discuss with students the services provided by the community and list them on a chart. Have students make a collage of words describing these services. They can cut words out of newspapers and magazines.

Using a variety of political maps, students can locate their own community and state.

Ask students to read selected articles in local newspapers and determine which branch of government has jurisdiction over the issues described. Then have class representatives write or email the appropriate officials, asking for descriptions of the roles they play in the community.

Take the class to visit a local government agency or invite an agency representative to speak to the class about local government.

Discuss with students the celebration of holidays such as the Fourth of July. Have students investigate what local laws or ordinances would guide the planning of holiday festivals (e.g., parades, block parties, erection of a statue).

Have students discuss how a person can be a citizen of a locality, a state, a nation, and the world.

Using voting machines borrowed from local election boards, hold a mock election.

- How are leaders at the state and local levels elected?

Have students interview or survey adults in the community to identify some of the ways they participate in political action, volunteer activities, or community service.

Ask students to compile a report for the school newspaper that highlights a citizen who has made outstanding contributions.

- What are the duties and responsibilities of effective, informed citizens?

Have students brainstorm a list of alternative solutions for a real classroom or school problem. Present solutions to the principal or other school personnel. Then discuss their feedback as a class and decide on next steps, if appropriate.
Interdisciplinary Connections

ENGLISH LANGUAGE ARTS
Have students write a play about a local issue such as bicycle safety. The dialogue of the play should discuss the issue and explore possible solutions. The play should conclude with a solution to the issue or problem, and a way to share those issues with the school or a broader community.

Suggested Documents and Other Resources Selected by New York State Teachers

- Newspapers
- Magazines
- Political maps
- Local ordinances
- Voting machines

Trade Books:
- A Look at Our Town, Village, City, County Government published by the New York State Education Department.
- Governing New York: How Local, State, and National Governments Work by Magdalena Alagna

Possible Field Trips:
Take the class on a walking tour near the school. Have students list the government-provided services they become aware of on their walk.
- What would happen if these services were not provided?
- How necessary are these services?
- How much do they cost?
(When planning social studies field trips, keep in mind the social studies standards and the “Linking Cultural Resources to Social Studies” section of the introduction.)
