The grade 5 social studies core curriculum:

- stresses geographic, economic, and social/cultural understandings related to the Western Hemisphere—the United States, Canada, and nations in Latin America.
- builds on and reinforces historical and political content about the United States included in the grade 4 social studies program.
- uses contemporary case studies rather than a chronological approach, with the content understandings guiding selection of specific case studies and factual information.
- focuses on contemporary examples, whenever appropriate, to help students learn the grade five content understandings.

**FOCUS QUESTIONS**

- How have the key geographic and environmental characteristics of nations and regions in the Western Hemisphere affected the history, economies, and cultures of its nations?
- What changes in the population of Western Hemisphere nations have taken place across time and place, and what has been the effect of these changes?
- What historical experiences have nations of this hemisphere shared? How have different people and nations seen these similar or shared experiences?
- What are similarities and differences among governments of the Western Hemisphere, such as governmental structures and functions, civic values and principles, and views of the role and rights of citizens?
- Why have some Western Hemisphere nations been more successful than others in meeting their needs and wants?
- How are nations in the Western Hemisphere economically and geographically interdependent?
Content Understandings

History of the United States, Canada, and Latin America
Different ethnic, national, and religious groups, including Native American Indians, have contributed to the cultural diversity of these nations and regions by sharing their customs, traditions, beliefs, ideas, and languages. Different people living in the Western Hemisphere may view the same event or issue from different perspectives. The migration of groups of people in the United States, Canada, and Latin America has led to cultural diffusion because people carry their ideas and ways of life with them when they move from place to place. Connections and exchanges exist between and among the peoples of Europe, sub-Saharan Africa, Canada, Latin America, the Caribbean, and the United States. These connections and exchanges include social/cultural, migration/immigration, and scientific/technological. Key turning points and events in the histories of Canada, Latin America, and the United States can be organized into different historical time periods. For example, key turning points might include: 15th- to 16th-century exploration and encounter; 19th-century westward migration and expansion; 20th-century population movement from rural to suburban areas. Important historic figures and groups have made significant contributions to the development of Canada, Latin America, and the United States. Industrial growth and development and urbanization have had important impacts on Canada, Latin America, and the United States.

Geography of the United States, Canada, and Latin America
Maps and other geographic representations, tools, and technologies such as aerial and other photographs, satellite-produced images, and computer models can be used to gather, process, and report information about the United States, Canada, and Latin America. Political boundaries change over time. The nations and regions of the Western Hemisphere can be analyzed in terms of spatial organization, places, regions, physical settings (including natural resources), human systems, and environment and society. The physical and human characteristics of places in the United States, Canada, and Latin America are diverse. Culture and experiences influence people’s perceptions of places and regions in the United States, Canada, and Latin America. Human actions modify the physical environments of the United States, Canada, and Latin America.

The economies of the United States, Canada, and Latin American nations
Concepts such as scarcity, supply and demand, markets, opportunity costs, resources, productivity, economic growth, and systems can be used to study the economies and economic systems of the United States, Canada, and Latin America. Individuals and groups in the United States, Canada, and Latin America attempt to satisfy their basic needs and wants by utilizing scarce capital, natural, and human resources. Types and availability of resources are important to economic development in the United States, Canada, and Latin America. Production, distribution, exchange, and consumption of goods and services are economic decisions that the nations of North and South America must make. Science and technology have influenced the standard of living in nations in North, Central, and South America. Exchanges of technologies, plants, animals, and diseases between and among nations of the Americas, Europe, and sub-Saharan Africa have changed life in these regions. Nations in North, Central, and South America form organizations and make agreements to promote economic growth and development. As the economic systems of the global community have become more interdependent, decisions made in one nation or region in the Western Hemisphere have implications for all nations or regions.
Across time and place, the people of the Western Hemisphere have held differing assumptions regarding power, authority, governance, citizenship, and law. Basic civic values such as justice, honesty, self-discipline, due process, equality, and majority rule with respect for minority rights are expressed in the constitutions and laws of the United States, Canada, and nations of Latin America. Constitutions, rules, and laws are developed in democratic societies in order to maintain order, provide security, and protect individual rights. The rights of citizens in the United States are similar to and different from the rights of citizens in other nations of the Western Hemisphere. Governmental structures vary from place to place, as do the structure and functions of governments in the United States of America, Canada, and Latin American countries. Concepts such as civic values, politics, and government can be used to answer questions about what governments can and should do, how people should live their lives together, and how citizens can support the proper use of authority or combat the abuse of political power. (Adapted from Civics Framework for the 1998 NAEP, p. 19.) Legal, political, and historic documents define the values, beliefs, and principles of constitutional democracy. In the United States these documents include the Declaration of Independence, the United States Constitution, and the Bill of Rights. In Canada these documents include the British North America Act and the Canadian Bill of Rights. Citizenship in the United States, Canada, and nations of Latin America includes an awareness of the patriotic celebrations of those nations. In the United States, Federal holidays include: New Year’s Day, Martin Luther King, Jr. Day, Presidents Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving, and Christmas.
History of the United States, Canada, and Latin America

- Different ethnic, national, and religious groups, including Native American Indians, have contributed to the cultural diversity of these nations and regions by sharing their customs, traditions, beliefs, ideas, and languages.
- Different people living in the Western Hemisphere may view the same event or issue from different perspectives.
- The migration of groups of people in the United States, Canada, and Latin America has led to cultural diffusion because people carry their ideas and ways of life with them when they move from place to place.
- Connections and exchanges exist between and among the peoples of Europe, sub-Saharan Africa, Canada, Latin America, the Caribbean, and the United States. These connections and exchanges include social/cultural, migration/immigration, and scientific/technological.
- Key turning points and events in the histories of Canada, Latin America, and the United States can be organized into different historical time periods. For example, key turning points might include: 15th- to 16th-century exploration and encounter; 19th-century westward migration and expansion; 20th-century population movement from rural to suburban areas.
- Important historic figures and groups have made significant contributions to the development of Canada, Latin America, and the United States.
- Industrial growth and development and urbanization have had important impacts on Canada, Latin America, and the United States.

Classroom Activities

### Case Study: The Encounter

Have students complete a chart that shows the effects of the Encounter on different groups of participants. Include European’s, Native American Indians, and Africans.

#### THE ENCOUNTER

<table>
<thead>
<tr>
<th>Those Involved</th>
<th>Their Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>European’s</td>
<td></td>
</tr>
<tr>
<td>Native American Indians</td>
<td></td>
</tr>
<tr>
<td>Africans</td>
<td></td>
</tr>
</tbody>
</table>

Have students answer a document-based question on the Encounter. The question should contain documents that include information on the Exchange, the impact of diseases, Native American Indian groups, and slavery and the slave trade.
Display historical maps of North and South America and the Caribbean from different time periods, and ask students to create a graphic organizer showing changes in control of parts of this hemisphere from the period of the Encounter through the 19th century. Students should determine what nations were located in the areas where political control changed. Students should also examine maps of key nations in different time periods. Ask questions such as:

- How do the maps explain cultural differences between Brazil and neighboring nations?
- How did Spain lose control of the lands it claimed in what is now the United States? in Latin America?
- How did the Louisiana Purchase change the map of North America? of the United States?
- How did the map change as the United States grew to its present boundaries?
- How did the United States acquire Alaska? Hawaii?
- Why is Canada a bilingual nation?

Have students make multitiered timelines comparing time periods of major turning points and events in the history of the United States, Canada, and selected Latin American nations. If students have Latin American ancestry, choose the countries their families came from as examples. Ask students to predict and then research points on the timeline where there is a relationship between and among events.

Ask students to compare two accounts of an historic event or current issue showing different points of view. Topics to consider may include the Mexican War, the Panama Canal, the clash over Oregon, the Spanish American War, and the French Canadian separatist movement.
Have students create a graphic organizer showing the causes and effects of a turning point in the history of one or more Western Hemisphere nations. Make sure that students can answer the following questions:

<table>
<thead>
<tr>
<th>CAUSE</th>
<th>EFFECT</th>
</tr>
</thead>
<tbody>
<tr>
<td>The British North America Act forms the written part of Canada’s Constitution</td>
<td>Created a federation</td>
</tr>
<tr>
<td></td>
<td>Governed vast and diversified regions</td>
</tr>
<tr>
<td></td>
<td>Left greatest part of the Canadian Constitution unwritten</td>
</tr>
</tbody>
</table>

- What is a turning point in history?
- Why is a particular event, such as the Industrial Revolution or the Encounter, a turning point?
- What are some turning points in the history of the Western Hemisphere? Why?

Have students write brief biographies of important figures in the history of Canada and Mexico.

**Case Study: Industrialization**

Have students compare the process of industrial growth and development with the process of urbanization in the United States, Canada, and selected Latin American nations. Discussion should focus on these questions:

- What led to industrial development?
- When and where did industrialization take place?
- What factors helped and/or hindered a nation’s process of industrialization?
- Why have there been differences in the ability of nations of the Western Hemisphere to industrialize?
- What is the relationship between industrialization and urbanization?
- What is the relationship between industrialization and immigration/migration?
- What have been the effects of industrial growth and urbanization on the nations of the Western Hemisphere?
- How has industrialization increased the interdependence of Western Hemisphere nations?

Have students compare accounts of life in a Western Hemisphere nation today, from the standpoint of people who play different roles in society. Students may instead opt to make comparisons during the time of the Encounter or Industrial Revolution.

Have students create a collage that shows examples of cultural diffusion in the Western Hemisphere today.

**Teacher Notes**

In Grade 5 the emphasis is on:

- the contemporary time period.
- geography, economics, and social/cultural understandings, rather than history.
- different viewpoints about events and issues among peoples and/or nations of the Western Hemisphere.
The first decision you must make is how to organize your study of the nations of the Western Hemisphere.

1. You may choose to examine the United States, Canada, and selected nations of Latin America separately.
2. You may decide to study North America as an entity, and then study selected nations of South America, Central America, and the Caribbean.
3. You may decide to study the United States and Canada together and then examine selected nations of Latin America, including Mexico.
4. You may decide to examine the Western Hemisphere as a whole through its geography, history, economies, and governments.

Depending on what you selected as your organizational pattern for the grade 5 social studies program, some titles for units of study on the history of Western Hemisphere nations might include:

- The United States Becomes a World Political and Economic Power.
- The History of Canada in Modern Times.
- The History of Mexico in Modern Times.
- The History of Argentina (and/or other Latin American nations) in Modern Times.
- Turning Points in the History of the United States, Canada, and Mexico.
- Turning Points in the History of Selected Latin American Nations.
- Turning Points in the History of the United States and Canada.
- Turning Points in the History of Mexico and Selected Latin American Nations.
- Historic Turning Points of North and South American Nations.
- Shared and Similar Turning Points in the History of North and South American Nations.

Using any organizational pattern, consider centering student activities on case studies of key turning points and events in the histories of Canada, Latin America, and the United States. Some suggestions for case studies appear in the history understandings. They include:

1. Cultural diversity of the peoples of the hemisphere.
2. Social/cultural connections and exchanges.
5. 15th- to 16th-century exploration and encounter.
6. 19th-century westward migration and expansion.
7. 20th-century population movement from rural to suburban areas.
8. Industrial growth and development.
9. Important historic figures and groups that contributed to the development of Canada, Latin America, and the United States.

Case Studies

Many case studies include content understandings from several social studies disciplines. A study of industrial development, for instance, includes understandings from history, economics, and geography. The question “Why is industrialization a turning point in a nation’s history?” illustrates this interdisciplinary nature of this case study. (See Appendix C: Effects of Industrialization and Appendix D: Characteristics of Developed and Less Developed [Developing] Nations.)

You may want to do a case study on cultural diversity of the peoples of the Western Hemisphere and/or migration/immigration connections in your geography unit. Or you may decide to extend a case study of the PreColumbian period to the Encounter, focusing either on slavery or on the exchange of technologies, plants, animals, and diseases.

- How have historic events affected the cultures of the United States, Canada, and selected nations of Latin America?
A case study of westward migration and expansion in the 19th and 20th centuries could include understandings from history, geography, government, and even economics. Consider events that led to interaction among the nations of the hemisphere such as the Mexican War, the clash over Oregon, the development of the Monroe Doctrine, the Spanish American War, the Panama Canal, and the Cuban missile crisis. Consider also having students compare the effects of similar events in different nations (e.g., the effects of the Gold Rush in the United States and in Canada, the building of the transcontinental railroad and the Canadian Pacific Railway).

A case study of industrial growth and development in the United States and other nations of the Western Hemisphere could include the role of migration and immigration, science and technology, and 20th-century population movement from rural to urban to suburban areas.

For additional guidance in selecting content, evaluation questions, and resources, consult *Social Studies Program: 5* published by the New York State Education Department, 1982.

### Interdisciplinary Connections

#### ENGLISH LANGUAGE ARTS

Have students write a journal entry from the viewpoint of a Native American Indian affected by the Encounter, and another from the viewpoint of a European participant. Students may choose instead to base their journal entries on a contemporary event.

In their study of the Encounter, have students assess primary and secondary source materials, as well as works of fiction, to determine fact versus opinion and accuracy of information. Students may also look for examples of different perspectives.

A similar activity can focus on the immigrant experience, slavery, and/or the urban experience in the United States, Canada, and selected Latin American nations.

Have students compare factual and fictional narratives about turning points in the history of nations of the Western Hemisphere. They should address such questions as:

- In what country’s history is the event a turning point?
- Why is the event a turning point?
- Is the event connected to more than one Western Hemisphere nation? How?
- Who has different points of view about the event? Why?
- Are there major differences between the fictional and factual accounts of the event?

Have students read a biography of a leader who brought about change in a Western Hemisphere nation. They should take events from the biography and put them in chronological order. They should also compare different points of view about the leader’s achievements. In a group discussion, students should compare the leader’s beliefs, motivations, actions, methods, and results.

#### ARTS

Have students analyze songs, posters, and paintings about major historic events. They should discuss the accuracy of the music or visual, as well as its point of view. Posters from World War I or II are examples of visuals, as are paintings of battle scenes.
Suggested Documents and Other Resources Selected by New York State Teachers

Historical maps
Paintings
Posters
Photographs
Primary source materials showing different perspectives on historic events
Biographies of historic figures

**Geography of the United States, Canada, and Latin America**

- Maps and other geographic representations, tools, and technologies such as aerial and other photographs, satellite-produced images, and computer models can be used to gather, process, and report information about the United States, Canada, and Latin America.
- Political boundaries change over time.
- The nations and regions of the Western Hemisphere can be analyzed in terms of spatial organization, places, regions, physical settings (including natural resources), human systems, and environment and society.
- The physical and human characteristics of places in the United States, Canada, and Latin America today are diverse.
- Culture and experiences influence people’s perceptions of places and regions in the United States, Canada, and Latin America.
- Human actions modify the physical environments of the United States, Canada, and Latin America.

---

**Classroom Activities**

What can we learn from maps, charts, graphs, and other data about the nations of the Western Hemisphere? Provide different types of maps, aerial and other photographs, tables, and graphs, as well as satellite-produced and computer models, for students to use in gathering and processing information about the nations of the Western Hemisphere. Ask students to:

- Identify the key physical and human characteristics of the hemisphere and its nations.
- Identify geographic features that nations and regions share.
- Locate major political centers of government (as well as physical features).
- Differentiate between political and physical features of the hemisphere.
- Use different scales to measure distances and to find absolute and relative locations, in order to learn more about the hemisphere and its nations.
- Identify the effects of climate due to elevation.
- Recognize reversal of seasons in the Southern Hemisphere.
- Answer geographic questions such as:
  - Where are places located?
  - Why are they located where they are?
  - What is important about their locations?

Ask students to identify regions of the Western Hemisphere. They should be able to answer questions such as:

- What is a region?
- What common characteristics of geography—physical and human—unify and distinguish the major regions of the Western Hemisphere?
- What other common characteristics—economic, political, cultural—unify and distinguish the major regions of the United States, Canada, and selected nations of the Western Hemisphere?
- What are the major causes of change in regions?
Have students apply what they have learned by comparing the major regions of the United States, Canada, and Latin America.

- How do the characteristics of a specific region affect the way people earn a living? How do these characteristics affect lifestyles? population distribution?
- What are examples of change in the characteristics of a region?
- What are examples of interdependence between and among regions?

For the United States, Canada, and the Latin American nations selected, have students make a national profile or data file that includes information such as natural resources, climate, topography, vegetation, land use, population centers, major cities, key harbors, and major ethnic groups in the population. Tables or graphs, as well as a map of the nation, could be part of the data file. Ask students to identify similarities and differences among the nations as they are studied.

<table>

</tr>
<tr>
<td>Major Ethnic Groups</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Have students research major cities of Western Hemisphere nations and answer questions such as:

- Why did this city develop where it did?
- What was the effect of geographic and environmental factors on development?
- How have human actions modified the physical environment of the city?
- How has the past been preserved in the city?
- What geographic and environmental features would determine where you would locate a new city? Compare your answer to the location selected for the city of Brasilia.

Have students collect pictures that show how lifestyles are influenced by geographical and environmental factors and then use them to make a collage. Have students write a brief caption explaining the influence of the environment.

Ask students to compare a population distribution map of a Western Hemisphere nation with other information about the climate, landforms, bodies of water, and natural resources of that nation, and draw conclusions about the pattern of population distribution.

Have the class make a travel brochure or public announcement for radio or television that features a community in the Western Hemisphere.
Case Study: The Peoples of the Western Hemisphere

Have students collect information about the populations of the Western Hemisphere nations. They should be able to answer questions such as:

- Who are the people of the Western Hemisphere?
- What changes in population have taken place across time and place?
- Where do most of the people in the nations of the Western Hemisphere live?
- What factors influence where people choose to live?
- Why don’t large numbers of people live in the Canadian Shield?
- Why don’t large numbers of people live in deserts?
- What do you predict the population density in mountainous areas to be?
- Why is United States population density highest in the Northeast and in California?
- What major population shifts have taken place in the United States in the last three decades? Why?
- Why do people migrate or emigrate? What are some examples of population migration in different times and places in the Western Hemisphere? For example, in the 20th-century, Central Americans, Mexicans, Cubans, and Vietnamese, among others, came to the United States; Brazilians and others moved from rural to urban areas.
- What are the key periods of immigration to the United States? to Canada? Who came? Why?
- What were some effects of these migrations?
- What examples of cultural diffusion in the nations of the Western Hemisphere are due to migration and/or immigration?

For a case study, ask students to select one group of people who have migrated to the Western Hemisphere or within the Western Hemisphere. They should trace their movement over time and from place to place, and identify some of the customs or other aspects of their culture that have become part of the larger culture of a Western Hemisphere nation. Have students map the migration patterns within the hemisphere of the group(s) selected.

Have students examine historical maps showing changes in the political boundaries of nations in the Western Hemisphere such as the United States, Mexico, and Canada. Ask students to read about the reasons for these changes and to make a graphic organizer indicating these reasons.
Have students create travel posters urging people to visit different nations in the Western Hemisphere. They should use different landforms and bodies of water on each poster and/or political landmarks, and include a brief report on the importance of the physical features and/or places for the particular nation.

As part of a case study, students should identify and then classify the activities, accomplishments, and contributions of selected Native American Indian cultures in the Western Hemisphere.

Work with students to create a timeline showing the time periods of some of the major early cultures of the Western Hemisphere such as the Mayas, Aztecs, and Incas.

Ask students to map the migration routes that are believed to have been used by the earliest peoples who came to the Western Hemisphere.

Develop a document-based question that focuses on key physical and human characteristics of nations and regions in the Western Hemisphere.

Have students research the origin of names of physical and political features in the Western Hemisphere to see the connection between geography and history. They should also research reasons for changes in names of places. Names often indicate the relationship between geography/environment and history/culture.

Ask students to collect articles about nations of the Western Hemisphere and explain how geography is linked to economics, government, or history in the articles.

Help students create a web organizer that shows patterns of human activity affecting the environment and the environment affecting human activity.

One effect of industrialization is pollution. Have students use readings, charts, and pictures about key environmental issues such as acid rain in the northeastern United States, air quality in Mexico City, and destruction of the Brazilian rain forest. Create a web organizer as students determine the causes of the environmental problems, including the role of industry, government, and geography. Add to the web the ways the problems can be solved and the effects of the solutions.

**Teacher Notes**

Titles for units of study on the geography of Western Hemisphere nations depend on the organizational pattern you select. Titles might include:

- Geography: The Land and People of the United States
- Geography: The Land and People of Canada
- Geography: The Land and People of Mexico
- Geography: The Land and People of Argentina (and/or other Latin American nations)
- The Land and People of North America
- The Land and People of Latin America
- Regions and Peoples of the United States and Canada: Two Multicultural Nations
- Latin America: Its Regions and Culture
- Physical Geography of the Western Hemisphere: Regions and Nations
- Human Geography of the Western Hemisphere: The People—Past and Present
Include ongoing comparisons of the geography, demography, and cultures of the nations of the Western Hemisphere in your social studies program, whether or not you select a nation-by-nation approach or a broader regional approach.

The geography understandings imply some case studies such as:
1. An analysis of the United States, Canada, and Latin America today by using information from maps and other geographic representations, tools, and technologies such as aerial and other photographs, satellite-produced images, and computer models. This case study would include recognizing the physical and human characteristics of places and regions of the Western Hemisphere.
2. Understanding the characteristics, distribution, and complexity of cultures found in the United States, Canada, and Latin America.

To help students recognize the characteristics, distribution, and complexity of cultures found in the United States, Canada, and Latin America, establish a linkage between geography and history. This case study is related to geography and history, as well as economics. You may choose to begin with a case study of some of the Native American Indians of the hemisphere. You may want to select another ethnic, national, or religious group as well. Plan a case study by asking questions such as:
- What is a culture?
- What is a civilization?
- How do cultures develop? Why?
- How and why do cultures change?
- What influences shaped the cultures of the United States, Canada, and selected Latin American nations?
- How are these influences alike and different?
- What cultures in the hemisphere can be traced to a period of time before the Encounter?
- How have different peoples contributed to the cultural diversity of the nations of the Western Hemisphere?
- What connections and exchanges exist between and among the peoples of Europe, sub-Saharan Africa, Canada, Latin America, the Caribbean, and the United States?
- What is cultural diffusion?
- How has the migration of groups of people in the United States, Canada, and Latin America led to cultural diffusion?
- How do culture and experiences influence people’s perceptions of places and regions in the United States, Canada, and Latin America today?
- Why do different people living in the Western Hemisphere sometimes view the same event or issue from different perspectives?

Interdisciplinary Connections

ENGLISH LANGUAGE ARTS

Have students research and then write about the importance of a physical feature to a specific place in the Western Hemisphere. For example, they may write about the importance of the Amazon River to Brazil.

Have students select a nation of the Western Hemisphere and research why people live where they do in that nation. Ask them to note major changes in where people have lived over time. Have them give an oral report on the subject. Note-taking skills during the research phase, preparing the oral report, and listening to the reports of others are parts of the evaluation.
Have students write a persuasive essay on the positive or negative effects of human activity on the environment. Have students select an actual example from a Western Hemisphere nation or region. Students should identify the audience to whom they are writing and choose an appropriate way to reach that audience (e.g., a letter to the editor).

Have students engage in a comparative research project on the cultures of Western Hemisphere Native American Indians. Include Native American Indian groups from different nations and different geographic regions of the Western Hemisphere.

Read folktales, legends, myths, and other narratives about the cultures of the United States, Canada, and selected Latin American nations with the students. What important beliefs, ideas, and values can be learned from their literature?

**ARTS**

Collect paintings and artifacts that depict lifestyles and cultural values of various peoples of Western Hemisphere nations. Have students analyze what can be learned about a culture from art and artifacts. In addition, they may contribute a drawing or painting, photograph, or artifact for analysis.

Collect photographs of physical features of Western Hemisphere nations. Include photographs of rural and urban life as well as photographs of economic activity. Have students analyze the photographs to make connections between geographic and economic activities and to identify various aspects of a nation's culture.

**MATHEMATICS**

Have students collect data on the composition of the population of the United States, Canada, and selected Latin American nations at the present time, and incorporate the data into a graph for each nation.

**LANGUAGES OTHER THAN ENGLISH**

Ask students where north, south, east, and west are in the building. Walk to different walls of the room and say I am going north, I am going south. Place labels on the walls of the room. Select students to act out going to the four areas. Places cut outs of the target country in different spots of the rooms. Have students repeat the question, Where are you going? Then answer, I am going to ____________, using the statement It is north or It is south. Have students return to their seats. Distribute a map with the target country, other countries, and the cardinal directions. Ask questions about which country is north, south, etc. of the target country while they color in the map.

**Suggested Documents and Other Resources Selected by New York State Teachers**

Maps, aerial and other photographs, satellite-produced images, computer models of the world and particularly of the United States, Canada, and Latin America
Photographs of physical, political, and human characteristics of the United States, Canada, and Latin America
Artifacts and pictures of lifestyles of cultures in the United States, Canada, and Latin America as well as examples of cultural diffusion
News articles

Historical maps of the United States
The Economies of the United States, Canada, and Latin American Nations

• Concepts such as scarcity, supply and demand, markets, opportunity costs, resources, productivity, economic growth, and systems can be used to study the economies and economic systems of the United States, Canada, and Latin America.
• Individuals and groups in the United States, Canada, and Latin America attempt to satisfy their basic needs and wants by utilizing scarce capital, natural, and human resources.
• Types and availability of resources are important to economic development in the United States, Canada, and Latin America.
• Production, distribution, exchange, and consumption of goods and services are economic decisions that the nations of North and South America must make.
• Science and technology have influenced the standard of living in nations in North, Central, and South America.
• Exchanges of technologies, plants, animals, and diseases between and among nations of the Americas, Europe, and sub-Saharan Africa have changed life in these regions.
• Nations in North, Central, and South America form organizations and make agreements to promote economic growth and development.
• As the economic systems of the global community have become more interdependent, decisions made in one nation or region in the Western Hemisphere have implications for all nations or regions.

Standard Concepts/Themes

Economics
- Economic Systems
- Factors of Production
- Interdependence
- Needs and Wants
- Science and Technology

Classroom Activities

Have students collect data on the geography of a community or nation, including its location, topography, climate, land use, and natural resources. Ask them to predict how successful industrial development would be in the nation they are considering.

Have students create a graphic organizer that shows the positive and negative effects of technological innovations in a Western Hemisphere nation in two different time periods. They should indicate the effects on other aspects of the nation’s history/culture. For example, exchanges of technologies, plants, animals, and diseases in the Encounter influenced life in Western Hemisphere nations in the past, while nowadays science and technology continue to influence the standard of living.

- How have science and technology influenced the standard of living in Western Hemisphere nations?
- What exchanges of technologies have taken place and with what effects?

INFLUENCES OF TECHNOLOGY

<table>
<thead>
<tr>
<th>Name of Technology</th>
<th>When It Had an Effect</th>
<th>The Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

212
Have students make a picture chart of an economy of a Western Hemisphere nation that shows examples of economic terms such as scarcity, supply and demand, markets, goods and services, capital resources, human resources, natural resources, opportunity costs, productivity, distribution, exchange, consumption, economic system, and economic growth. Students should consider including news articles and advertisements in the chart. A definition of each term should be provided.

In a Venn diagram or other type of graphic organizer, show how two nations of the Western Hemisphere, such as Canada and Cuba, have made different decisions regarding production, distribution, exchange, and consumption of goods and services.

Have students discuss how nations with different types of economic systems, such as Canada and Cuba, answered the three basic economic questions today and in the past.

- What goods and services shall be produced and in what quantities?
- How shall these goods and services be produced?
- For whom shall these goods and services be produced?

Have students make a product map of the regions of the United States and Canada and for selected Latin American nations. They should discuss the relationship between a region’s and/or nation’s products and jobs. They should also discuss the relationship between a region’s and/or nation’s products and its exports and imports.

- What can be learned about the strength of an economy by examining products?
- What is meant by the term one-crop economy (or one-resource economy)?
- What other economic data is needed to determine the strength of a national and/or regional economy?
- What might bring about a change in a region’s and/or nation’s products?
- How might that affect the economy?
What products are purchased by families in the United States to meet their needs and wants? Have students find out by surveying different types of products found at home. They should include food, clothing, furnishings, transportation, and electronic goods. The students should make a chart showing where the product came from and whether it is a need or a want, and then locate where the products were produced on a world map. Have students form generalizations about economic interdependence in the world today.

<table>
<thead>
<tr>
<th>Product</th>
<th>Where did it come from</th>
<th>Is it a want or a need?</th>
</tr>
</thead>

<td>________________________</td>
</tr>
</tbody>
</table>

Have students map trading partners among the nations of the Western Hemisphere. The thickness of the line should indicate the amount of trade. A key containing more specific data should be included.

**Teacher Notes**

Titles for units of study on the economies of Western Hemisphere nations depend on the organizational pattern you select. Titles might include:

- The Economic Development of the United States as an Industrial Nation
- The Economic Development of Canada
- The Economic Development of Mexico
- The Economic Development of Argentina (and/or other Latin American nations)
- The Economic Development of the United States, Canada, and Mexico
- The Economic Development of Selected Latin American Nations
- The Economic Development of the United States and Canada
- Differences in the Economic Development of Mexico and Other Latin American Nations
- The Economic Interdependence of the Western Hemisphere

Consider these examples of case studies centered on economics, but involving other social studies disciplines.

**Industrialization in Western Hemisphere: Geography/History/Economics Meet**

- How can economic data be used to understand the strengths and weaknesses of the economies of Western Hemisphere nations?
- How can economic terminology be used to understand the strengths and weaknesses of the economies of Western Hemisphere nations?
- What are the characteristics of a strong economic system?
- What are the effects of natural, capital, and human resources, as well as other geographic factors, on industrialization in the United States, Canada, and selected nations of Latin America?
- What other factors can have a positive or negative influence on the economic development of the United States, Canada, and selected nations of Latin America?
<table>
<thead>
<tr>

### Science, Technology, and Industrialization

- How did scientific and technological advancements lead to industrialization?
- How have technological advancements in transportation and communication increased global interdependence?
- How have science and technology affected the standard of living in nations in North, Central, and South America?

### Interdisciplinary Connections

#### ENGLISH LANGUAGE ARTS

Have students read the story *The Ox-Cart Man* and answer these questions:
- What goods were produced by this family?
- How did the family produce these goods?

Have students also answer these questions on the basis of a story or television program about family life today to show differences in the two time periods.

Have students write a brief essay answering these questions about a current advertisement for goods or services:
- What audience is the advertiser trying to reach in the ad?
- What is the evidence for your answer?
- How successful or persuasive is the advertiser? Would you buy the goods or services offered? Why or why not?

Have students write a poem called a *cinquain* about a producer or consumer of goods and services. Ask students to consider producers and consumers of goods and services, in the past as well as the present, in the United States and in other Western Hemisphere nations.

In this five-line poem:
- Line 1 is a single noun (the name of a person, place, or thing).
- Line 2 is two words that describe the noun.
- Line 3 is three words that describe actions of the noun.
- Line 4 is four words that express a feeling or opinion about the noun.
- Line 5 is one word that means the same as the noun.

#### MATHEMATICS

Ask students to create comparative graphs and charts with economic data about trade among Western Hemisphere nations.

### Suggested Documents and Other Resources Selected by New York State Teachers

- Pictures of families, supplied by students or clipped from magazines.
- Items that illustrate a family’s customs, traditions, or beliefs: clothing, recipes, religious artifacts, etc.
**Trade Books:**

  - [http://www.usmint.gov](http://www.usmint.gov)
Across time and place, the people of the Western Hemisphere have held differing assumptions regarding power, authority, governance, citizenship, and law.

Basic civic values such as justice, due process, equality, and majority rule with respect for minority rights are expressed in the constitutions and laws of the United States, Canada, and nations of Latin America.

Constitutions, rules, and laws are developed in democratic societies in order to maintain order, provide security, and protect individual rights.

The rights of citizens in the United States are similar to and different from the rights of citizens in other nations of the Western Hemisphere.

Governmental structures vary from place to place, as do the structure and functions of governments in the United States of America, Canada, and Latin American countries.

Concepts such as civic values, politics, and government can be used to answer questions about what governments can and should do, how people should live their lives together, and how citizens can support the proper use of authority or combat the abuse of political power. (Adapted from Civics Framework for the 1998 NAEP, p. 19.)

Legal, political, and historic documents define the values, beliefs, and principles of constitutional democracy. In the United States these documents include the Declaration of Independence, the United States Constitution, and the Bill of Rights. In Canada these documents include the British North America Act and the Canadian Bill of Rights.

Classroom Activities

Have students use a graphic organizer to study the structure and functions of a government in a Western Hemisphere nation. Then ask them to make comparisons with the structure and functions of other governments in the hemisphere.

- What are some of the different types of governments of Western Hemisphere nations?
- What is a democracy?
- What characteristics do you look for in a democracy?
- What are the different types of democracies found in Western Hemisphere nations?
- What are other types of governments of Western Hemisphere nations?
- Why does a nation have a constitution?
- Do all constitutions make a nation a democracy?
- How are constitutions of Western Hemisphere nations alike and different?
- What is the function of each branch of government?
- How do governments affect the lives of people in different nations of the hemisphere?

Ask students to compare the Bill of Rights of the United States Constitution with the Canadian Bill of Rights.

- What is the purpose of each document?
- When was each created?
- Who created each document?
- Why was each created?
- How are the two documents alike and different?
Ask students to illustrate the United States Bill of Rights to help a younger child understand the meaning of each amendment.

Ask students to write a letter to a younger brother or sister explaining what we in the United States today mean by the terms **power**, **authority**, **governance**, **citizenship**, and **law**. Tell students to use the Declaration of Independence, the Preamble to the Constitution, and the Bill of Rights in their explanations.

Have students create a chart indicating what the terms **power**, **authority**, **governance**, **citizenship**, and **law** have meant in different time periods and in different nations of the Western Hemisphere. They should describe how these concepts can affect the lives of people in a nation. Ask students to look for news articles to support the conclusions shown on the chart.

Divide students into two groups. Have one group make a collage or chart of the important holidays of the United States, Canada, and selected nations of the Western Hemisphere. They should identify the holidays’ similarities and differences.

- What do the major holidays and festivals of a nation tell us about that nation’s beliefs and values?

Involves the second group of students in a similar activity for the symbols of the United States, Canada, and selected nations of the Western Hemisphere. They should include flags, anthems, monuments, memorials, and important public buildings.

- What is the meaning of the symbols of each nation?
- What do the symbols of a nation tell us about that nation’s beliefs and values?
- What is the purpose of the different monuments or memorials?
- What do they symbolize?

Ask students to identify important leaders in the independence movements of Western Hemisphere nations and compare their leadership characteristics. Also have students identify leaders in the 20th century; they should include government leaders in periods of crisis, and leaders who did not hold office but who influenced a government. Students should make comparisons between the two groups of leaders. Leaders of Western Hemisphere independence movements include:

<table>
<thead>
<tr>
<th>United States</th>
<th>George Washington, Thomas Jefferson, Benjamin Franklin, John Adams, James Madison</th>
</tr>
</thead>
<tbody>
<tr>
<td>Canada</td>
<td>William Lyon Mackenzie King, Louis Papineau, John A. Macdonald, Lord Durham</td>
</tr>
<tr>
<td>Haiti</td>
<td>Toussaint L’Ouverture</td>
</tr>
<tr>
<td>Venezuela</td>
<td></td>
</tr>
<tr>
<td>Colombia</td>
<td>Simón Bolívar</td>
</tr>
<tr>
<td>Ecuador</td>
<td></td>
</tr>
<tr>
<td>Peru</td>
<td></td>
</tr>
<tr>
<td>Bolivia</td>
<td></td>
</tr>
<tr>
<td>Argentina</td>
<td>José de San Martín</td>
</tr>
<tr>
<td>Chile</td>
<td>Bernardo O’Higgins, José de San Martín</td>
</tr>
<tr>
<td>Mexico</td>
<td>Father Miguel Hidalgo, Agustín de Iturbide</td>
</tr>
</tbody>
</table>

- What differences are there in the ways nations of the hemisphere became independent?
- What roles did different leaders play in the establishment of their nations?
- What leaders in modern times or in other times of national crisis have been considered successful?
- Are the same leadership qualities needed today as those found in leaders in the past?
- What symbols show how leaders are honored in their nations today?
- What words of a leader in the past or present express the views of that leader and/or show his/her leadership qualities? See biography project under Interdisciplinary Connections: English Language Arts.
CONNECTIONS

Have students create a graphic organizer to compare the rights and responsibilities of citizens in different nations of the Western Hemisphere.

Create a GUIDE TO GOOD CITIZENSHIP pamphlet for a citizen of the United States at home, in school, in the community, and in the nation. Include the rights and responsibilities of citizenship, as well as illustrations of actions of good citizens.

Teacher Notes

Depending on what you select as your organizational pattern for the grade 5 social studies program, some titles for units of study on the economics of Western Hemisphere nations include:

- The Government of Argentina (and/or other Latin American nations: Parliamentary Democracy: Its Values and Principles, Structure and Function in Modern Times
- The Governments of the United States, Canada, and Mexico: Three Different Democracies
- Comparing the Governments of Selected Latin American Nations
- Comparing the Governments of the United States and Canada
- Comparing the Governments of Mexico and Selected Latin American Nations
- Governments of the Western Hemisphere

Some questions to consider in any study of the governments of the United States, Canada, and Latin American nations include:

- Why do nations have governments?
- What differing assumptions regarding power, authority, governance, citizenship, and law have been held by Western Hemisphere nations across time and from place to place?
- How did the colonial experience under the French, Spanish, Portuguese, or English affect modern governments of Western Hemisphere nations?
- How did these colonial governments differ in their views of citizenship, justice, due process, equality, majority rule with respect for minority rights, civic life, politics, power, authority, governance, democracy, and law?
- Who held the power in these early governments of Western Hemisphere nations?
- What are the different types of governments of Western Hemisphere nations?
- What are similarities and differences in the structure and functions of the governments of Western Hemisphere nations?
- Who holds the power in different governments of Western Hemisphere nations today?
- What are similarities and differences in the views of citizenship of Western Hemisphere nations?
- How do governments affect the lives of the nation’s citizens?

The topic “Government and Citizenship in Western Hemisphere Nations Today” is an example of a case study based on the government understandings.

- How are the rights of citizens in the United States similar to and different from the rights of citizens in other nations of the Western Hemisphere?
• How are the responsibilities of a citizen in the United States similar to and different from the rights of citizens in other nations of the Western Hemisphere?
• How do governments affect the lives of the nation’s citizens?
• How have citizens in nations of the Western Hemisphere acted in modern times to preserve, protect, and expand their rights? (Examples are the civil rights movements of the 1960s in the United States, the Quebec movement in Canada, the Native American Indian movements throughout the Hemisphere, and actions against Latin American dictatorships.)

Interdisciplinary Connections

ENGLISH LANGUAGE ARTS
Have students read biographies of leaders of Western Hemisphere nations who served in the government or influenced the government. They should compare these leaders’ beliefs, motivations, actions, methods, and results. Then ask students to take events from the biography they are reading and place them on a timeline, along with events that were happening in the nation at the same time. Ask students to compare different points of view about the achievements of the political leader, and to look for cartoons or other visuals that express an opinion about the leader.

Have students read both fictional and nonfictional accounts of the internments of Japanese Americans during World War II.
• What does the Constitution tell us about the nation’s values and principles?
• What is the view of the United States on the role and rights of its citizens?
• How can the rights of a citizen clash with the need for national security?
• Why did Canada have Japanese internment camps?
• When and how did the United States government change its position on its actions toward these Japanese Americans?

ARTS
Have students compare the “Star-Spangled Banner,” “O Canada,” and the Mexican national anthem. Lyrics for these anthems can be found in the Using the Internet section.

Suggested Documents and Other Resources Selected by New York State Teachers
The Constitution of the United States
Bill of Rights
British North America Act
Canadian Bill of Rights
Biographies of government leaders
“Star-Spangled Banner,” “O Canada,” and the Mexican national anthem
