Part I

Orientation

Introduction

These guidelines address the evaluation, initial and continuing approval of New York State Home Health Aide Training Programs (HHATPs) under the jurisdiction of the Office of Career and Technical Education (CTE) in the New York State Education Department (NYSED). These programs include secondary and adult level programs in public high schools and Boards of Cooperative Educational Services (BOCES). A HHATP conducted by an educational facility, which is regulated by NYSED, must meet training and competency evaluation requirements established by NYSED. Such requirements are consistent with the standards set forth by the New York State Department of Health (NYSDOH).

Through an agreement with NYSDOH, the training and evaluation requirements and approval processes set forth in this guide are consistent with Part 484 of Title 42 of the Code of Federal Regulations (42 CFR) and Section 700.2 of Title 10 of the New York Code Rules and Regulations (10 NYCRR). The NYSDOH has been identified as the primary agency in New York State responsible for the implementation of these federal regulations. The requirements specify content areas that must be addressed for a program to receive approval (e.g., minimum training hours; qualifications of RN director coordinator and RN nurse instructor; minimum curriculum requirements; methodology for state review; and the competency evaluation program—written and performance skills).

Home Health Aide Certification

In order to provide home health aide services in New York State, a person must successfully complete a HHATP or competency evaluation program conducted only by a NYSED or NYSDOH-approved HHATP. A certificate of completion is issued by the approved program/school through the New York State Home Care Worker Registry (HCWR).

Documentation of Successful Completion of the Home Health Aide Training Program

Home health aide training program certificates are issued by the training program through the HCWR found on the Health Commerce System (HCS). HHATPs must follow the directives and advisories promulgated by the HCWR regarding documentation of completion of training and the issuance of certificates. The original certificate must be issued to the individual who has successfully completed the program within the timeframes required by the HCWR.

The home health aide must also be provided with a copy of the completed Home Health Aide Procedure Performance Evaluation Form (Appendix B). The training program must maintain a copy of each home health aide's training certificate and student evaluation form for at least six years.

Maintaining Home Health Aide Certification

An individual who successfully completes an approved HHATP must be employed as a home health aide in an Article 36 or 40 approved agency within any consecutive 24-month period to be considered qualified to continue to provide home health aide services.

Program Monitoring

All programs are required to have policies and procedures describing their quality management program and the annual evaluation of the training program. Quality management processes should focus on the overall operation of the training program and should address at a minimum the following:

- Monitoring for compliance with the requirements in this guide
- Monitoring of contracts
- Analysis and evaluation of program's educational outcomes that address the effectiveness of the:
 - Instructor(s)
 - Lesson plans
 - Equipment and other materials utilized to achieve learning objectives, e.g. videos, textbooks, etc.
 - Evaluation of the supervised practical training site(s)
 - Student evaluation of the program, including effectiveness of communication between instructor and students
 - Analysis and evaluation of testing results, admission standards and program completion rates
 - Development and implementation of strategies for improvement of the HHATP
- Submission of a continuing application to NYSED every three years, to include the annual summary evaluation (Form F) as outlined above. A summary (Form F) should be included for each year with the continuing application.

Maintaining Training Records

The HHATP must have a procedure to retain, for a period of at least six years, a training record for each student who has successfully completed home health aide training and/or competency evaluation, including:

- Attendance documentation for classroom and supervised practical training
- Each student's completed written tests and evaluation forms
- Copy of the student certificate of completion

Electronic record keeping is acceptable. Records must have the ability to be produced upon request by NYSED or any other regulatory agency. An appropriate electronic backup of these records must be ensured.

Terminology

The following terms related to the home health aide training program are used throughout this document:

Client/Patient	The individual to whom health care services are provided
Competency-based Education	An educational process planned and managed by the teacher that shares with the student specific objectives, including the acceptable conditions and levels of achievement of observable actions or behaviors that the student will be expected to consistently demonstrate to meet those objectives
Home Health Aide	An individual who has successfully completed a NYSDOH/NYSED-approved home health aide training program and has been entered into the HCWR. A home health aide performs appropriate tasks in support of a professional plan of care as delegated by a licensed nurse.
Laboratory	An extension of the classroom that provides adequate contemporary equipment, supplies, and workstations for students to practice skills before demonstrating competency in a clinical patient care setting
RN Director Coordinator	The individual who is approved by NYSED and assigned the administrative responsibility and accountability of the program; must be a currently registered professional nurse in NYS (RN, associate degree or higher), have two years of RN experience, one of which must be in a licensed home care agency.
RN Nurse Instructor	The individual who is approved by NYSED and develops lesson plans and teaches the curriculum; coordinates theory, clinical experiences, and maintains program standards; must be a currently registered professional nurse in NYS (RN, associate degree or higher), have two years of RN experience, one of which must be in a licensed home care agency. Proof of teacher certification is required for secondary programs.
Supervised Clinical Experience or Supervised Practical Training	Training in a client/patient's home or other health care setting in which the student demonstrates knowledge while performing tasks on an individual under the direct supervision of an approved RN Nurse Instructor.

This training time may be dispersed throughout the program, as appropriate, or performed at the end of all classroom and lab training.

During this time, the home health aide student practices, with clients in real situations, the skills learned during the training program, prior to the return demonstration to the program RN Nurse Instructor.

Program Requirements

A HHATP must include classroom and supervised practical training. The student must receive a minimum of 95 hours of training including a minimum of: 65 hours classroom and 30 hours of supervised practical training. Required testing, competency evaluation, and orientation/observation are not included in the 95 hours. Supervised practical training means training in a client/patient home or other health care setting in which the student demonstrates knowledge while performing tasks on an individual under the direct supervision of an approved RN Nurse Instructor (please refer to requirements for RN Nurse Instructor). At a minimum, 15 hours of each student's supervised practical training must be provided in a patient care setting. The setting(s) used for practical training and the number of training hours provided must be additionally based on each student's learning needs. Supervised practical training may take place in any setting where patient care can occur except in nursing homes (long-term care/skilled nursing facilities). A minimum of 16 hours of classroom training is required prior to the start of the supervised practical training.

The maximum number of students to the approved RN Nurse Instructor ratio is 20:1 in the classroom setting and 8:1 for supervised practical training in the skills laboratory and 1:1, 3:1 site dependent, as appropriate for required home care patient settings. The number of students must be consistent with the available space in the classroom and appropriate to the supervised practical training location.

Curriculum

All care given must demonstrate core values. Core values underlie all aspects of care in health sciences, in all care settings, and profoundly influence effectiveness and satisfaction across the full range of performance. All students must incorporate and demonstrate in their skills and knowledge the understanding and integration of the following core values:

- the dignity and worth of each client as an individual;
- respect for the range of diversity of individuals; and
- a demonstration of a therapeutic relationship i.e., the value of autonomy and control, adapting to clients' preferences and routines and limits, maintaining privacy and confidentiality, providing care in a caring, compassionate manner and encouraging individuals to be as independent as possible.

In addition, the impact of the actual setting/environment on the client and the client's adjustment to care must be understood and responded to throughout the program.

The program must address the psychosocial, physical and environmental needs, as well as nursing and medical needs of clients. Students must develop the attitudes and behaviors needed to promote healthy and independent functioning of the client. Secondary level and adult level home health aide programs in BOCES and public schools should identify use of Health Sciences Education Core:

- Legal and ethical responsibilities of the healthcare worker
- Therapeutic communication
- Personal health and wellness
- Infection prevention and control
- Overview of the human body
- The life-cycle

Each HHATP must identify and clearly state its goals and objectives and must include measurable performance criteria specific to both the curricular subject material and clinical content required by the Department.

In order to assure that all HHATPs are teaching comparable content, HHATPs are required to base their instruction, including lesson plans, on the content of the NYSDOH aligned NYSED Home Care Curriculum (HCC), found in Appendix A, and [Health Related Tasks Curriculum \(HRTC\)](#). It is recommended that the curriculum be taught at a sixth-grade reading level.

The training program's teaching staff may exercise discretion in determining the amount of time required to adequately teach each of the subject areas, however, the minimum training time required must be met for each subject area and the training hours must total a minimum of 95 hours.

Other resources may be used at the discretion of the approved RN Nurse Instructor supervising the approved HHATP.

Program Training Hours

The minimum number of hours required by NYSED for the implementation of a home health aide training program:

Secondary and Adult Home Health Aide Training Program: 95 total program hours; 65 hours of theory (NYSDOH home health aide training program required curriculum, health sciences core curriculum, and content hours of home health aide theory); and 30 hours of supervised practical experience. The supervised practical experience must include a minimum of 15 hours of patient care performance skills in an approved setting other than a long-term care facility. Orientation, observational/shadowing, and like experiences are not to be included in the 30 hours.

Hours may be increased, but they cannot be fewer than the prescribed minimums.

Evaluation of the Student

The HHATP is also responsible for ensuring that each home health aide student is competent in each skill and procedure taught in the training program. Health Science Core, skills, and procedures must be reviewed prior to introduction of a student into the client/patient setting however, competency evaluation may be integrated throughout the training program or may be conducted subsequent to classroom and supervised practical training. A minimum of 16 hours of classroom training is required prior to the start of the supervised practical training. Competency must be evaluated by an approved RN Nurse Instructor.

The following methods must be utilized in the evaluation of competency:

- Written and/or oral examinations that demonstrate the student’s knowledge of the information presented in the classroom training; and
- Observation and demonstration by the student of his/her competency in performing the required skills in the laboratory or patient care setting.

All training programs are required to use a published text consistent with the content of the Department’s HCC and HRTC curriculum. To evaluate each home health aide student’s competence in performing the minimally required home health skills, each HHATP must utilize the NYSDOH aligned Procedure Performance Evaluation Form (Appendix B), and written tests obtained from publishers who publish textbooks for the purpose of training home health aides. Test questions must be obtained from a “bank” of test questions. Questions must comprehensively test the student in all areas of the curriculum and questions must be rotated. If a student is retaking a test after an unsuccessful attempt, this test must be a different version from the previous test taken. A minimum score of 80% is required to ensure mastery of subject material.

Confidentiality of Tests and Examinations

The program is required to have procedures for maintaining the confidentiality of all HHATP tests and examinations. All testing materials must be kept strictly confidential.

Screening

Training programs are expected to develop procedures for screening for the appropriateness of students. Students should be selected on the basis of such factors as sympathetic attitude toward the care of the sick; ability to read, write, and carry out directions; maturity and ability to deal effectively with the demands of the job. A minimum age of 18 is recommended but not required.

Documentation of Competency

A Procedure Performance Evaluation Form (Appendix B) shall be maintained for each student. The student evaluation form must include documentation of the proficiently demonstrated competencies, student name, and approved RN Nurse Instructor name along with initials, who

has evaluated the student's performance of each task and the date successfully completed. This record is to include each of the skills, as prescribed by the NYSDOH (Appendix B).

Skills may be added but not removed and consists of, at minimum, clear records of:

- duties/skills expected to be learned in the program;
- date of initial demonstration by RN instructor, with instructor initials;
- date of student successful return demonstration, with initials of RN instructor who supervised the performance; and
- corresponding program RN instructor signature.

Location, Equipment, and Space to be Utilized for the Training

At a minimum, the training site should include a classroom area for didactic presentation of curricular content and a laboratory area with equipment and supplies that enable instructors and students the ability to adequately demonstrate clinical tasks. The training site must have the following: tables/desks and chairs, running water, kitchen and laundry facilities or a mock kitchen, audiovisual equipment, storage space, electrical outlets and lighting. The space should be adequate to suit both the number of students and the equipment.

Suggested equipment list

- Alcohol wipes
- Bed
- Bed pan and fracture pan
- Bedside commode
- Blood pressure cuff and teaching stethoscope
- Cane
- Clothing for dressing demonstration
- Condom catheter
- Dentures and denture cup
- Doll for baby care and bottle
- Dressing supplies - gauze, tape
- Elastic stockings
- Electric razor
- Emesis basin
- Empty medication bottle with label
- Eyeglasses
- Gait belt
- Gloves
- Hand cleanser
- Hydraulic lift
- Incontinence pads
- Linens - sheets, towels, washcloths
- Lotion

- Measuring pitcher/graduate container
- Orange stick/nail file
- Ostomy supplies - skin barrier, sealant, pouch with fastener, adhesive, disc/wafer, and deodorizer
- Oxygen supplies - Nasal cannula, mask, concentrator, portable tank, nebulizer with tubing, reservoir and mouthpiece
- Paper towels
- Pillows
- Razor and shaving cream
- Scale for weights - balance, digital
- Slide board
- Soap
- Thermometer
- Toothbrush and toothpaste
- Tracheostomy care - cannula, inner cannula, trach straps, trach cleaning kit/supplies
- Urinal
- Urinary catheters
- Urinary drainage bag
- Walker
- Wash basin
- Waste bag
- Wheelchair

Each student should have approximately 12-20 square feet of space in the classroom setting and 30 square feet of space in the clinical laboratory setting. Training space can be flexible in nature, meaning used for formal classroom instruction and rearranged for clinical laboratory instruction.

Personal Care Aide

Personal care aides (PCAs) are permitted to perform fewer health-related tasks than home health aides. Personal care aides, who have been trained in approved personal care activities, are issued a certificate from a NYSDOH or NYSED approved training program, which may be accomplished through the completion of the initial 40 hours of an approved HHATP.

The required performance standards, as indicated on the Procedure Performance Evaluation Form (Appendix B), must be successfully demonstrated to and assessed by an approved RN Nurse Instructor. A personal care aide with a valid personal care aide certificate is not required to repeat training in the content and skills learned in the basic personal care aide training program. However, the HHATP must assure that the personal care aide is competent in such skills, through successful demonstration, prior to providing additional training and issuing of a home health aide certificate. Documentation of the successful completion of the 40 hours of training and proof of competency in the content and skills required by the personal care aide training program must be kept in the individual's file.

Personal care aide training program certificates are issued by the training program through the HCWR found on the HCS. HHATPs must follow the directives and advisories promulgated by the HCWR regarding documentation of completion of training and the issuance of certificates. The original certificate must be issued to the individual who has successfully completed the program within the timeframes required by the HCWR.

Certified Nurse Aide Transitioning

Certified nurse aides (CNAs) employed in residential health care facilities (RHCFs, commonly known as nursing homes, long-term care or skilled nursing facilities) provide personal care and health-related services, which in many areas are comparable, to the activities and tasks performed by home health aides. A CNA who is employed in a RHCF is required to be certified in accordance with the provisions of Section 415.26 of Title 10 of NYCRR. In order to obtain nurse aide certification and be listed in the New York State RHCF Nurse Aide Registry, an individual must successfully complete a State-approved nurse aide training program and pass the State-authorized competency examination.

HHATPs must have the capability to augment a nurse aide's training with classroom and supervised practical training in those skills not included in the nurse aide training program. Such skills include but are not limited to: assistance with medications; handling the patient's money; maintaining a clean, safe home environment; safety, accident prevention and responses to emergencies in the home; taking of blood pressure; and observing, recording and reporting in the home care setting.

A CNA who is registered in the New York State RHCF Nurse Aide Registry is not required to repeat training in the content and skills learned in a previous training program. However, the HHATP must assure that the CNA is competent in such skills, through successful demonstration, prior to providing additional training and issuing of a home health aide certificate. Documentation of the successful completion and proof of competency in the content and skills required by must be kept in the individual's file.

Home Health Aide Student Identification

Each home health aide student shall be clearly identified as a student during the supervised practical training portion of the program. This identification must be easily discerned by clients, family members, visitors, and staff.

Program Application and Approval Process

Initial Approval

HHATPs shall submit an application for review and approval by NYSED. After reviewing the completed application package, a representative of the Department may, prior to approval, make a site visit to examine the physical layout of the training site or sites. Subsequent visits may also be made once approval is granted to observe classroom instruction and/or in conjunction with survey visits. Initial HHATP approval is granted for a period of up to three years.

Following approval of the application, the educational institution will receive notification from NYSED and be entered into the HCWR. A program must have submitted an application and received written approval before training begins. A letter denoting approval or disapproval will be sent to the educational facility.

NOTE: If the training program makes any significant changes within the three year approval period, including changes in faculty or sites for training and/or supervised practical training, or a change in the status of RN Director Coordinator or RN Nurse Instructor, the program **MUST** notify the Office of CTE of such changes in writing, in order to obtain prior-approval of the change.

To begin the approval process, the program must submit the Application for a Home Health Aide Training Program Cover Sheet (Form A), RN Director Coordinator Approval (Form B), RN Instructor Approval (Form C), and Curriculum Identification/Verification (Form D), including all attachments and supporting documentation requested. This material will be reviewed by representatives of the appropriate NYSED office for compliance with the federal and state curriculum and program requirements. Applications must be complete in order to be reviewed for approval consideration.

Continuing Approval

Continuing approval of programs will be based on submission of the HHATP Continuing Approval Application (Form A) and HHATP Summary Evaluation (Form F) to the NYSED Office of CTE. Applications for continuing approval must be submitted 90 days prior to expiration of the current three-year approval.

An onsite program review may be conducted every three years to determine approved program's continuing compliance.

Rescinding Approval

NYSED may rescind approval of a HHATP if a training program is found to be out of compliance with the Federal and State training requirements. Egregious, systemic, cumulative, or repetitive deficient findings or failure to submit an acceptable plan of correction may constitute grounds for rescinding approval. The entire training program approval may be revoked for a period of at least two years. The secondary public school or BOCES will then be required to re-apply after the two-year period, for consideration, in order to resume training.

Faculty and Credentials

These requirements, at a minimum, are derived from federal regulation 42 CFR 484.36(a)(2)(ii), as it relates to faculty and credentials.

RN Director Coordinator

A RN Director Coordinator must be designated along with the RN Nurse Instructor(s). The RN Director Coordinator has the administrative responsibility for the coordination of training activities and program oversight.

The HHATP must be provided by or under the direction of a currently licensed NYS registered professional nurse who:

- has two years of nursing experience;
- at least one year of which must be in the provision of home health care services in an Article 36 or Article 40 approved agency; and
- cannot be on the Office of Medicaid Inspector General's (OMIG) list of Restricted, Terminated or Excluded Individuals or Entities or the U.S. Department of Health and Human Services Office of Inspector General's list of Excluded Individuals/Entities.

RN Nurse Instructor

The HHATP must be provided by or under the direction of a currently licensed NYS registered professional nurse who:

- has two years of nursing experience;
- at least one year of which must be in the provision of home health care services in an Article 36 or Article 40 approved agency; and
- cannot be on the Office of Medicaid Inspector General's (OMIG) list of Restricted, Terminated or Excluded Individuals or Entities or the U.S. Department of Health and Human Services Office of Inspector General's list of Excluded Individuals/Entities.

The RN Director Coordinator and RN Nurse Instructor must be approved by NYSED prior to inclusion in the HCWR. The RN Director Coordinator Approval (Form B) and/or RN Nurse Instructor Approval (Form C) for the HHATP must be submitted to NYSED at least 90 days prior to the instructor teaching any classes. The Instructor Approval Form will be reviewed and upon approval entered into the HCWR. NYSED will communicate in writing any RN Director Coordinator or RN Nurse Instructor Approval application(s) that are both approved or disapproved.

The training program must notify the NYSED Office of CTE of any change in the status of approved RN Director Coordinator or RN Nurse Instructor, such as resignations or extended leave within 10 business days of change. Failure to notify the NYSED Office of CTE of a change in status of an approved RN Director Coordinator or RN Nurse Instructor or the addition of a new RN Director Coordinator or RN Nurse Instructor may result in immediate disapproval of the program. It is not necessary to notify the NYSED Office of CTE of substitutions for the instructor as long as the substitute is an approved RN Nurse Instructor for that program in the HCWR.

Approved RN Nurse Instructor(s) responsibilities include:

- Coordinating the didactic portion of the program;
- Conducting the supervised practical training; and
- Performing all competency evaluations.

Adjunct Faculty

The use of other individuals such as a Licensed Physical Therapist or a Registered Dietician to enrich the program is encouraged as long as such individuals provide instruction under the supervision of the approved RN Director Coordinator.

Clinical Affiliation Agreements

An affiliation agreement is a legal contract between the educational institution and the nursing facility and/or health care agency in which the supervised practical training portion of the program is being conducted. The agreement must be written and duly signed by both parties. If the educational institution affiliates with more than one agency, an agreement with each agency must be submitted with the application. (See sample affiliation agreement, Appendix C.)

The contract must:

- specify a starting date;
- be reviewed annually and rewritten as needed;
- state the rights and responsibilities of the educational institution, the affiliating agency, and the students; and
- contain a non-discrimination clause consistent with state and federal regulations.

Record Keeping and Reporting Obligations

Program Records

The agency delivering the program must develop a record-keeping system which will maintain the following information:

- A record of all students admitted to the program, dates of attendance and a record of the skills the students mastered, i.e., a performance evaluation task list.
- The names of the program RN Director Coordinator and RN Nurse Instructor and a record of his or her credentials. (In some instances, these may be the same individual.)

Reporting Changes in Approved Programs

NYSED must be notified of any major proposed changes in a home health aide training program. The following list represents some of the changes and information to be submitted for prior approval:

If there is a change in...	Information needed...
The delivery agency	Submit the Application for Approval of a Home Health Aide Training Program (Form A).
The school/site name	Submit the Application for Approval of a Home Health Aide Training Program, noting change in school/site name (Form A).
The clinical site(s)	Submit a mutually signed affiliation agreement for each new site.
The RN Director Coordinator or RN Nurse Instructor	Submit the RN Director Coordinator Approval (Form B) and/or RN Nurse Instructor Approval (Form C).
The curriculum	Submit the Curriculum Identification/Verification (Form D).

If there is a complete revision of course structure, the agency must resubmit the entire application packet. A separate and complete application is required for the request of an additional site/program.

Part II

Application Forms and Instructions

General Instructions

The forms found in this section constitute a complete application for approval of a HHATP. Make sure that all forms are complete and that all attachments and supporting documents are included as missing information will delay review and consideration for program approval.

Three months prior to the anticipated start date of the HHATP, submit the completed application to the appropriate office found below. *Retain copies for your records.*

Program type	Send application to:
Secondary and Adult HHATP in public secondary and BOCES agencies	New York State Education Department Office of Career and Technical Education 89 Washington Avenue, Room 315 EB Albany, New York 12234

Application Forms and Attachments

A complete application packet is comprised of the following forms and attachments:

- Form A:** Application Cover Sheet
- Copy of Clinical Affiliation Agreement(s)
- Form B:** RN Director Coordinator Approval
- Copy of current New York State Professional Nurse Registration
 - Acceptable professional work experience
- Form C:** RN Nurse Instructor Approval
- Copy of current New York State Professional Nurse Registration
 - Acceptable professional work experience
- Form D:** Curriculum Identification/Verification
- Curriculum, if indicated

Forms and Attachment Completion Reminders

Submit the following application form(s). Retain copies for your records.

Form	Remember to...
Form A: Application Cover Sheet	Supply <i>all</i> information requested. Submit an individual application (Application Cover Sheet - Form A) for each program (multiple sites, secondary and adult programs, e.g., a BOCES with multiple campuses that use a common curriculum).
Form B: RN Director Coordinator Approval Form C: RN Nurse Instructor Approval	<ul style="list-style-type: none"> • Individuals must be hired and approved prior to the program’s start in order for the program to receive approval. • Prior to the submission of forms, programs are to verify all criteria for a RN Director Coordinator and/or RN Nurse Instructor are met. • Collect required documentation for RN Director Coordinator and/or RN Nurse Instructor(s). • Program RN Director Coordinator or RN Nurse Instructor must complete and sign the forms, then have forms signed by the school administrator. • Send Form B and Form C with required documentation.
Form D: Curriculum Identification/ Verification	Indicate which curriculum is being used. If a locally developed curriculum is used, submit the curriculum and performance objectives.
Form E: Program Changes	This form must be submitted, along with relevant documentation, to request approval of program changes.
Form F: Summary Evaluation	This form must be submitted, along with the continuing approval (Form A), every three years.

FORM A: HHATP Initial/Continuing Approval Application Cover Sheet

Submit an individual application for each program (multiple sites, secondary and adult).

FORM F: HHATP Summary Evaluation

All programs are required to have policies and procedures describing their quality management program and the annual evaluation of the training program. Submission of a continuing application to NYSED every three-years, to include this form. The summary should address each year of the approval period.

Program Summary Evaluations (for each year of approval period)

Quality management processes should focus on the overall operation of the training program and should address at a minimum the following:

- Monitoring for compliance with the requirements in this guide
- Monitoring of contracts
- Analysis and evaluation of program’s educational outcomes that address the effectiveness of the:
 - Instructor(s)
 - Lesson plans
 - Equipment and other materials utilized to achieve learning objectives, e.g. videos, textbooks, etc.
 - Evaluation of the supervised practical training site(s)
 - Student evaluation of the program, including effectiveness of communication between instructor and students
 - Analysis and evaluation of testing results, admission standards and program completion rates
 - Development and implementation of strategies for improvement of the HHATP

Supervised Practical Training

Training in a client/patient’s home or other health care setting in which the student demonstrates knowledge while performing tasks on an individual under the direct supervision of an approved RN Nurse Instructor.

This training time may be dispersed throughout the program, as appropriate, or performed at the end of all classroom and lab training.

During this time, the home health aide student practices, with clients in real situations, the skills learned during the training program, prior to the return demonstration to the program RN Nurse Instructor.

Appendix C
Sample Affiliation Agreement

School
Address

AGREEMENT OF AFFILIATION WITH

The [name of school] has been approved to start a home health aide training program which requires supervised practical experience in a home care agency. The [name of facility]- has agreed to provide this supervised clinical experience. Therefore, the facility now referred to as the affiliating institution, and the school enter into the following agreement:

The agreement will begin on [date] and will be reviewed annually by both parties before the agreement is renewed.

The school will arrange for a maximum of students to affiliate at [name of facility] for a period of days. The specific days will be agreed upon by a designee of each party and each will keep a copy of the schedule.

The student and the instructor will carry liability insurance and a signed statement indicating that they have a policy which covers this.

The school recognizes that the affiliating agency has a service responsibility to the client. If the student jeopardizes this in any way, the affiliating institution has the right to ask that the student be removed from the clinical experience.

Before the student begins the supervised clinical experience, he or she will show evidence of physical requirements deemed necessary by agreement of both parties.

The student will be under the direct supervision of the RN instructor employed by the school and will have received classroom instruction before being authorized to perform patient care. The RN instructor will make assignments and evaluate each student's performance.

The affiliating institution and the school agree to accept and place students in clinical assignments without regard to sex, race, color, national origin or disability.
