a/ Estimated

For the current school year, it is estimated that 247,000 professional staff members are employed in the public schools. Of that number, 83.4 percent are classroom teachers while the remainder perform related and supervisory functions.

It should be noted that the above figures do not include professional staff employed by Boards of Cooperative Educational Services (BOCES). In 1992-93, BOCES employed 8,669 professionals, of whom 6,412 were classroom teachers. In 2010-11, these figures were 9,827 and 6,591 respectively.
