Replace Transportable Classroom Trailers

Select "Show Plan Details" and the row will expand to allow entry of the actual claim data by item. Click on "Add Item" and then choose from the list of allowable expenditures. Then enter a specific description, the quantity and the price per unit. The form will calculate the total cost for that item. Continue adding items, as needed. Of course, the expenditure items must be consistent with the approved budget. Be sure to enter the claims in the correct Approved Plan, if your district has more than one.

Note: The system allows for some expenditure flexibility within the categories of the approved SSIP(s); however, you will not be able to exceed the total budgeted amount. Changes within an eligible expenditure subcategory must be offset by adjustments in other subcategories, so as to stay within the total category budget.

Once all expenditures have been entered under all categories you are claiming reimbursement under at this time, the Superintendent must certify and submit under their credentials.
