

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

SSIP Overview

Page Last Modified: 01/26/2017

1. Please enter the name of the person to contact regarding this submission.

Dr. Edward Fale

1a. Please enter their phone number for follow up questions.

516-434-2830

1b. Please enter their e-mail address for follow up contact.

efale@vs24.org

2. Please indicate below whether this is the first submission, a new or supplemental submission or an amended submission of a Smart Schools Investment Plan.

First submission

3. All New York State public school districts are required to complete and submit a District Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner’s Regulations. Districts that include investments in high-speed broadband or wireless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

By checking this box, you certify that the school district has an approved District Instructional Technology Plan survey on file with the New York State Education Department.

District Educational Technology Plan Submitted to SED and Approved

4. Pursuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with parents, teachers, students, community members, other stakeholders and any nonpublic schools located in the district.

By checking the boxes below, you are certifying that you have engaged with those required stakeholders. Each box must be checked prior to submitting your Smart Schools Investment Plan.

- Parents
- Teachers
- Students
- Community members

4a. If your district contains non-public schools, have you provided a timely opportunity for consultation with these stakeholders?

- Yes
- No
- N/A

5. Certify that the following required steps have taken place by checking the boxes below: Each box must be checked prior to submitting your Smart Schools Investment Plan.

- The district developed and the school board approved a preliminary Smart Schools Investment Plan.
- The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
- The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occurred as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.
- The district prepared a final plan for school board approval and such plan has been approved by the school board.
- The final proposed plan that has been submitted has been posted on the district’s website.

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

SSIP Overview

Page Last Modified: 01/26/2017

- 5a. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

Instructional Technology Plan 2015_2018.pdf
 SSIP.pdf

- 5b. Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.

www.valleystreamschooldistrict24.org

6. Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.

1,308

7. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.

The district plans to participate in a consortium to partner with other school district(s) to implement a Smart Schools project.

8. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code
(No Response)	(No Response)

9. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

(No Response)

10. Your district's Smart Schools Bond Act Allocation is:

\$595,695

11. Enter the budget sub-allocations by category that you are submitting for approval at this time. If you are not budgeting SSBA funds for a category, please enter 0 (zero.) If the value entered is \$0, you will not be required to complete that survey question.

	Sub-Allocations
School Connectivity	0
Connectivity Projects for Communities	0
Classroom Technology	405,676
Pre-Kindergarten Classrooms	0
Replace Transportable Classrooms	0
High-Tech Security Features	0
Totals:	405,676

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

School Connectivity

Page Last Modified: 01/26/2017

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:
 - sufficient infrastructure that meets the Federal Communications Commission’s 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
 - is a planned use of a portion of Smart Schools Bond Act funds, or
 - is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

(No Response)

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required)

	Number of Students	Multiply by 100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	Current Speed in Mb	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)

3. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.

(No Response)

4. Describe the linkage between the district's District Instructional Technology Plan and the proposed projects. (There should be a link between your response to this question and your response to Question 1 in Part E. Curriculum and Instruction "What are the district's plans to use digital connectivity and technology to improve teaching and learning?")

(No Response)

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

School Connectivity

Page Last Modified: 01/26/2017

- 5. **If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.**

Please describe how you have quantified this demand and how you plan to meet this demand.

(No Response)

- 6. **As indicated on Page 5 of the guidance, the Office of Facilities Planning will have to conduct a preliminary review of all capital projects, including connectivity projects. Please indicate on a separate row each project number given to you by the Office of Facilities Planning.**

Project Number
(No Response)

- 7. **Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.**

Was your project deemed eligible for streamlined review?

Yes

- 7a. **Districts that choose the Streamlined Review Process will be required to certify that they have reviewed all installations with their licensed architect or engineer of record and provide that person’s name and license number. The licensed professional must review the products and proposed method of installation prior to implementation and review the work during and after completion in order to affirm that the work was code-compliant, if requested.**

I certify that I have reviewed all installations with a licensed architect or engineer of record.

- 8. **Include the name and license number of the architect or engineer of record.**

Name	License Number
(No Response)	(No Response)

- 9. **If you are submitting an allocation for School Connectivity complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.**

Classroom Learning Technology

Page Last Modified: 01/26/2017

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission’s 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

Our District has sufficient bandwidth for the 607 devices. As per Nassau BOCES, the current bandwidth is sufficient for all devices if used concurrently. With the number of students currently at 1,109 our required speed is 110.9 Mb. We are operating at 100Mbps and the District will meet the minimum speed required by 9/27/17 at a rate of 120 Mb.

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required)

	Number of Students	Multiply by 100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	Current Speed in Mb	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	1,109	110,900	110.9	100	120	09/27/2017

3. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

Our District has a robust Wi-Fi network established with Nassau BOCES. We are Bo Tied with their fiber optic lines. When necessary, the district will continue to work with BOCES to update and upgrade the Wi-Fi network.

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

Classroom Learning Technology

Page Last Modified: 01/26/2017

4. **All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.**

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

5. **Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems. Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.**

Nassau BOCES came to all our facilities to ensure that there is adequate electricity to support the new device purchases. Every classroom has a 20 amp circuit capable of absorbing the electrical needs of all chromebooks, macbooks, tablets, and iPads. We typically will have 15 - 20 students in a room. At any point, there will not be utilization in excess of 1,920 watts or 16 amps drawn. The whiteboard will consume less than 2.5 W. Imacs and HP desktops will have a 65W requirement. The Chromebooks have a 59W battery and will run for 5 hours, Macbooks have a 60W battery and also run for 5 hours. Ipads have a 25W battery and 4.5 hours run time while surface pro tablets will have a 12W battery and a 5 hour run time. All devices can be charged daily and hourly watt consumption is estimated between 2W - 5W. With recent electrical upgrades conducted last year, our buildings are each capable of 800 amp (2400 total) service. Over the past 12 months, current utilization is at an average recorded demand of 892 KWH total for all three buildings combined. All devices being purchased are compatible with existing platforms where laptops can be stored and charged in rolling bank carts.

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

Classroom Learning Technology

Page Last Modified: 01/26/2017

6. **Describe how the proposed technology purchases will:**
- > enhance differentiated instruction;
 - > expand student learning inside and outside the classroom;
 - > benefit students with disabilities and English language learners; and
 - > contribute to the reduction of other learning gaps that have been identified within the district.

The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?")

We would like to provide more in the area of differentiated instruction to meet our student's specific needs. The use of the Chromebooks and iPads will provide us with the means to do this. Many of our students do not attend preschool before they enter our district. They come to us with gaps in their foundational skills. We would like to use the iPads and Chromebooks to address these gaps early on and build a strong foundation for our students with the use of apps and learning programs. The use of these technology supports will allow us to tailor instruction to each student's needs. Our district has identified gaps in several ELA and math areas. We would like to use the Chromebooks and iPads to eliminate these gaps. We will have students work on apps and programs that will help to increase their comprehension skills, fluency, number sense, and problem solving skills. General education students, students with disabilities, and English Language Learners will now be able to increase their academic skills with the use of iPads, Chromebooks, document cameras and SMARTboards. The technology tools will be utilized with computer programs such as Learning Farm, Reading A to Z, Readworks, and other programs to reinforce and enrich their academic skills with the standards. We will utilize programs that will allow for targeting specific needs for every student in the curriculum areas. The students will be able to practice skills independently and in shared groups. These tools will also be utilized with programs such as NWEA to gather information about the targeted instruction that is needed for every student. We will place close reading lessons for Science and Social Studies on each tablet to allow the students to increase their comprehension skills and gain knowledge in the content areas. The SMARTboard will also allow us to meet the learning styles of all the students as it is interactive and will allow us to pair the iPads with it for visual learners and kinesthetic-tactile learners. We are also beginning to focus on blended classrooms. We have a classroom ready to pilot this approach. This would be possible with the purchase of tablets.

The use of the Chrome books will also be utilized to increase our STEAM activities. In music, we are piloting using Garage Band to support sixth grade students with composing their own songs in relation to our Emotional Literacy Program. The use of the Chromebooks and iPads will allow the students to work individually and in small groups to focus on music standards and create their own songs. This will be expanded to other grade levels with the increase in tablets. In addition, our Challenge and Art Program is currently working on projects that use the 3-D printer. The student would be able to create their designs using simple cad lessons on the tablets.

The use of the Chromebooks and iPads will also be used with English Language Learners. We will purchase apps that will reinforce and remediate the students' strengths and weaknesses. In addition, this will allow us to provide more translation to students and parents with the use of the tablets and the "I Translate Voice" app. With the use of the increased technology items, we would like to implement programs such as Skills Navigator for our students with disabilities. This program provides instruction and remediation to students to target their areas of weakness and provide immediate support. The students must work through different levels of instruction and show mastery with the designated topics before moving forward. This will enhance their skill levels in all curriculum areas.

7. **Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.**

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

Classroom Learning Technology

Page Last Modified: 01/26/2017

- 8. Describe the district's plan to provide professional development to ensure that administrators, teachers and staff can employ the technology purchased to enhance instruction successfully.

Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."

Valley Stream School District Twenty-four is committed to on-going professional development for administrators, staff, teachers, and aides to support the use of technology wherever learning takes place. This includes, but is not limited to classrooms, libraries, and other institutional settings in the community. Professional development activity options will include, but are not limited to Superintendent Conference Days, in-service workshops, and on-site coaching of technology integration into curriculum. The technology department will work with the Director of Curriculum, Director of Special Education, Building Principals, and staff to develop technology literacy within the district so that staff members can continue to grow professionally and effectively integrating technology into the curriculum. BOCES, chromebook vendors, the Valley Stream Teachers Center, and on site technology staff are all sources for on-going training and technical assistance to professional staff.

Specifically, the professional development topics will include:

Introduction to Chromebooks

Introduction to iPads

Utilization of SMART Board tools

Utilization of document cameras

Implement special apps to tailor instruction to meet all students' needs with the iPads to enhance student leaning for academic success (such as ELA, Math, Science, and the Arts apps)

Implementing Google apps to allow teachers and students to share documents and lessons with other teachers and students in the district, out of the district, and with the Teacher's Center (In addition, this is critical for our students as they need to know how to use Google apps as they enter the high school district, which is separate from our district.)

Focusing on using simple cad programs and Cubify for the 3-D printer and Garage Band

Focusing on Blended Learning Concepts

We will use outside presenters, in house presenters (technology team), and technology liaisons to present technology topics and to serve as coaches. In addition, we have a partnership with BOCES through Model Schools to provide technology professional development sessions to our staff.

The professional development for our staff is very important as the skills the teachers learn will be transferred to the students. This will allow us to have the students use the tools mentioned above to strengthen their academic areas. Also, it will allow for a smooth academic transition for the students as they move to the high school district. In addition, professional development is needed for staff as they work with students to use these tools as they take diagnostic assessments and field tests.

In addition, professional development will focus on providing technology training to staff to be turn keyed to the students. There will be a focus on blended learning opportunities in the classroom setting. We will be piloting this approach in one of our classrooms.

- 9. Districts must contact the SUNY/CUNY teacher preparation program that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.

By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.

- 9a. Please enter the name of the SUNY or CUNY Institution that you contacted.

Stony Brook University

- 9b. Enter the primary Institution phone number.

631-632-7783

- 9c. Enter the name of the contact person with whom you consulted and/or will be collaborating with on innovative uses of technology and best practices.

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

Classroom Learning Technology

Page Last Modified: 01/26/2017

- 10. A district whose Smart Schools Investment Plan proposes the purchase of technology devices and other hardware must account for nonpublic schools in the district.

Are there nonpublic schools within your school district?

- Yes
- No

- 10a. Describe your plan to loan purchased hardware to nonpublic schools within your district. The plan should use your district's nonpublic per-student loan amount calculated below, within the framework of the guidance. Please enter the date by which nonpublic schools must request classroom technology items. Also, specify in your response the devices that the nonpublic schools have requested, as well as in the in the Budget and the Expenditure Table at the end of the page.

The amount of Classroom Technology totals \$405,676. Non-public Schools include 177 students from Holy Name of Mary. \$44,250 of the Classroom Technology will be loaned to them. Valley Stream Christian Academy has 77 students and \$19,250.00 of the Classroom Technology will be loaned out to their students.
 The District has met with the nonpublic schools. Specific devices have yet to be requested but nonpublic schools will submit expenditures at a later date. The District will require the nonpublic schools to request use of devices annually by June 1st.

- 10b. A final Smart Schools Investment Plan cannot be approved until school authorities have adopted regulations specifying the date by which requests from nonpublic schools for the purchase and loan of Smart Schools Bond Act classroom technology must be received by the district.

By checking this box, you certify that you have such a plan and associated regulations in place that have been made public.

11. Nonpublic Classroom Technology Loan Calculator

The Smart Schools Bond Act provides that any Classroom Learning Technology purchases made using Smart Schools funds shall be lent, upon request, to nonpublic schools in the district. However, no school district shall be required to loan technology in amounts greater than the total obtained and spent on technology pursuant to the Smart Schools Bond Act and the value of such loan may not exceed the total of \$250 multiplied by the nonpublic school enrollment in the base year at the time of enactment.

See:

http://www.p12.nysed.gov/mgtserv/smart_schools/docs/Smart_Schools_Bond_Act_Guidance_04.27.15_Final.pdf.

	1. Classroom Technology Sub-allocation	2. Public Enrollment (2014-15)	3. Nonpublic Enrollment (2014-15)	4. Sum of Public and Nonpublic Enrollment	5. Total Per Pupil Sub-allocation	6. Total Nonpublic Loan Amount
Calculated Nonpublic Loan Amount	405,676	1,100	254	1,354	250	63,500

- 12. To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.

By checking this box, you certify that the district has a sustainability plan as described above.

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

Classroom Learning Technology

Page Last Modified: 01/26/2017

- 13. Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.

By checking this box, you certify that the district has a distribution and inventory management plan and system in place.

- 14. If you are submitting an allocation for Classroom Learning Technology complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Interactive Whiteboards	24,690
Computer Servers	(No Response)
Desktop Computers	18,516
Laptop Computers	159,470
Tablet Computers	139,500
Other Costs	63,500
Totals:	405,676

- 15. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category. This is especially important for any expenditures listed under the "Other" category. All expenditures must be capital-bond eligible to be reimbursed through the SSBA. If you have any questions, please contact us directly through smartschools@nysed.gov.

Please specify in the "Item to be Purchased" field which specific expenditures and items are planned to meet the district's nonpublic loan requirement, if applicable.

NOTE: Wireless Access Points that will be loaned/purchased for nonpublic schools should ONLY be included in this category, not under School Connectivity, where public school districts would list them.

Add rows under each sub-category for additional items, as needed.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be Purchased	Quantity	Cost per Item	Total Cost
Interactive Whiteboards	Interactive NEC Projector Units	15	1,646	24,690
Tablet Computers	iPads	263	500	131,500
Tablet Computers	Surface Pro 3 or 4	10	800	8,000
Laptop Computers	Chrome books	269	400	107,600
Laptop Computers	MacBooks	35	1,482	51,870
Desktop Computers	iMacs	12	1,268	15,216
Desktop Computers	HP Pavilion Desktops	3	1,100	3,300
Other Costs	unspecified non-public allocation	1	63,500	63,500

Smart Schools Investment Plan - Valley Stream UFSD 24 Amended Version

Pre-Kindergarten Classrooms

Page Last Modified: 01/26/2017

1. Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.

(No Response)

2. Describe the district’s plan to construct, enhance or modernize education facilities to accommodate pre-kindergarten programs. Such plans must include:

- Specific descriptions of what the district intends to do to each space;
- An affirmation that pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
- The number of classrooms involved;
- The approximate construction costs per classroom; and
- Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.

(No Response)

4. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

5. If you have made an allocation for Pre-Kindergarten Classrooms, complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct Pre-K Classrooms	(No Response)
Enhance/Modernize Educational Facilities	(No Response)
Other Costs	(No Response)
Totals:	0

6. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category. This is especially important for any expenditures listed under the "Other" category. All expenditures must be capital-bond eligible to be reimbursed through the SSBA. If you have any questions, please contact us directly through smartschools@nysed.gov. Add rows under each sub-category for additional items, as needed.

Replace Transportable Classrooms

Page Last Modified: 01/26/2017

1. Describe the district’s plan to construct, enhance or modernize education facilities to provide high-quality instructional space by replacing transportable classrooms.

(No Response)

2. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

3. For large projects that seek to blend Smart Schools Bond Act dollars with other funds, please note that Smart Schools Bond Act funds can be allocated on a pro rata basis depending on the number of new classrooms built that directly replace transportable classroom units.

If a district seeks to blend Smart Schools Bond Act dollars with other funds describe below what other funds are being used and what portion of the money will be Smart Schools Bond Act funds.

(No Response)

4. If you have made an allocation for Replace Transportable Classrooms, complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct New Instructional Space	(No Response)
Enhance/Modernize Existing Instructional Space	(No Response)
Other Costs	(No Response)
Totals:	0

High-Tech Security Features

Page Last Modified: 01/26/2017

1. Describe how you intend to use Smart Schools Bond Act funds to install high-tech security features in school buildings and on school campuses.

(No Response)

2. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

3. Was your project deemed eligible for streamlined Review?

- Yes
- No

- 3a. Districts with streamlined projects must certify that they have reviewed all installations with their licensed architect or engineer of record, and provide that person’s name and license number. The licensed professional must review the products and proposed method of installation prior to implementation and review the work during and after completion in order to affirm that the work was code-compliant, if requested.

By checking this box, you certify that the district has reviewed all installations with a licensed architect or engineer of record.

4. Include the name and license number of the architect or engineer of record.

Name	License Number
Saverio J. Belfiore	33063

5. If you have made an allocation for High-Tech Security Features, complete this table.

Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Capital-Intensive Security Project (Standard Review)	(No Response)
Electronic Security System	(No Response)
Entry Control System	(No Response)
Approved Door Hardening Project	(No Response)
Other Costs	(No Response)
Totals:	0

6. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category. This is especially important for any expenditures listed under the "Other" category. All expenditures must be capital-bond eligible to be reimbursed through the SSBA. If you have any questions, please contact us directly through smartschools@nysed.gov.

Add rows under each sub-category for additional items, as needed.
