In order to ensure consistent data across indicators, provide the number of districts in this field and the data will be loaded into the applicable indicator data tables.

679

This data will be prepopulated in indicators B3A, B4A, B4B, B9, and B10.

**General Supervision System:**

The systems that are in place to ensure that IDEA Part B requirements are met, e.g., monitoring, dispute resolution, etc.

The New York State Education Department (NYSED) provides general supervisory oversight of special education programs and services through various approaches including data collection and review, fiscal monitoring, self-reviews, on-site monitoring reviews, desk audits, State complaints and impartial hearing decisions. Various monitoring protocols are used to conduct both self reviews and on-site reviews of the special education programs provided by public school districts, Boards of Cooperative Educational Services (BOCES), approved private day and residential schools, State supported and State operated schools, other State agency educational programs, correctional facilities, and approved preschool programs. Districts and programs are selected for on-site reviews based on a variety of information, including but not limited to, State Performance Plan (SPP) data related to graduation rates, drop out rates and performance on elementary and middle level English language arts and mathematics State assessments and the number of founded State complaints during the last three years. Information from regional partners (e.g., technical assistance providers, District Superintendents) is also considered in the selection of schools and programs to be reviewed. NYSED's five regional Special Education Quality Assurance (SEQA) Offices coordinate the monitoring review process and also provide technical assistance to parents, school district personnel, and private providers. Selected SEQA Regional Associates are also assigned as State complaint investigators.

NYSED uses a data based computer system, Comprehensive Special Education Information System (CSEIS), to track all monitoring reviews conducted by each Regional Office across the State. Each review is individually logged as soon as selections are made and data is entered at all critical stages (date of initiation, final report issued, compliance issues identified, compliance assurance plans and due dates, status of each issue, date of corrective action(s), date of resolution, etc). Regional Office supervisors use a variety of means to monitor timelines (internal logs, CSEIS, status reports). NYS also uses CSEIS to track all written signed complaints.

Special Education mediation, by State law, is conducted by regional community dispute resolution centers. Through contract with the New York State Dispute Resolution Association, NYSED ensures data collection, recruitment and training of special education mediators and that mediation is a cost to the State, and not to families or schools.

NYSED has a two tier due process system with independent hearing officers at Tier 1 and a State Review Office at Tier 2. For Tier 1, NYSED has regulatory procedures for conducting hearings and appeals, and it certifies, trains and investigates complaints against impartial hearing officers. NYSED monitors timeliness of impartial hearing decisions through the data-based Impartial Hearing Reporting System. The Office of State Review within NYSED is responsible to hear appeals of decisions of the impartial hearing officers.

**Technical Assistance System:**

The mechanisms that the State has in place to ensure the timely delivery of high quality, evidenced based technical assistance and support to LEAs.

NYSED Office of Special Education Policy, Preschool, Due Process, Program Development and Special Education Quality Assurance staff provide ongoing technical assistance to parents, school personnel and others. The Office ensures State laws and regulations are consistent with federal requirements and that policy guidance documents are developed and disseminated and these documents serve to ensure consistency in guidance.

NYSED's largest investment of IDEA funds support 10 Regional Special Education Technical Assistance Support Centers (RSE-TASC) .

## **FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

RSE-TASCs are staffed with teams of highly trained special education specialists, which include special education school improvement specialists, behavior specialists, regional special education trainers, nondistrict specialists, bilingual special education specialists and transition specialists, who provide regional training and embedded professional development to school personnel on research-based instructional strategies, particularly in the areas of literacy, behavior, and specially designed instruction and IEP development to support students with disabilities in participating and progressing in the curriculum to meet the New York State Learning Standards. NYSED has provided ongoing professional development to the RSE-TASC specialists on research-based instructional practices for students with disabilities. RSE-TASC school improvement specialists participate in the reviews of low performing schools identified based on results for students with disabilities and use research-based tools to guide instructional improvements. Through a regional planning process, which includes participation from RSE-TASC representatives, supervisors from NYSED's Special Education Quality Assurance Offices and District Superintendents, the resources of each RSE-TASC are deployed.

NYSED provides a comprehensive array of other professional development and technical assistance resources. These include, but are not limited to:

[Accessible Instructional Materials \(AIM\)](#) - IDEA requires school districts to provide accessible versions of instructional materials to students who are blind or otherwise unable to use printed materials.

[Center for Autism and Related Disabilities \(CARD\)](#) provides evidence-based training and support to families and professionals, and through ongoing research, contributes knowledge to the field of autism spectrum disorders.

[Positive Behavioral Interventions and Supports \(PBIS\) Technical Assistance Center](#) provides high quality training, technical assistance and support to the New York State (NYS) RSE-TASC Behavioral Specialists and other Office of Special Education providers.

[Intensive Teacher Institute in Bilingual Special Education \(ITI-BSE\)](#) was created to assist with the shortage of certified bilingual and English as a second language (ESL) special education teachers, bilingual teachers of the speech and hearing handicapped, and bilingual pupil personnel professionals. This State-funded program provides tuition assistance for fifteen credits of specialized coursework and facilitates the certification process for these professionals who are currently working in NYS public schools or approved preschools.

[New York City Preschool Bilingual/ESL Technical Assistance Center](#) - The purpose of the Bilingual/ESL Preschool TAC is to increase the capacity of section 4410 preschools located in New York City to serve preschool students with disabilities with limited English proficiency by providing services in the following two areas: training and referrals to ITI-BSE.

[Speech-Language and Bilingual Speech-Language Personnel Development Technical Assistance Center \(SLPD-TAC\)](#) - provides online coursework and other supports needed to obtain initial or professional certification in teaching students with speech and language disabilities and licensure in Speech-Language Pathology for individuals who are committed to work in New York City Public Schools.

[Technical Assistance Center on Disproportionality \(TACD\) at New York University](#) - TACD's work includes building the capacity of regions and districts in understanding the root cause and systemically addressing the disproportionate assignment of various subgroups in special education to develop, implement, and assess a process of providing comprehensive technical assistance and professional development trainings to NYS school districts that are addressing issues of disproportionality.

[Early Childhood Direction Centers](#) (ECDCs) provide information about programs and services for young children, ages birth through five, who have physical, mental, or emotional disabilities and help families obtain services for their children.

[Impartial Hearing Officers](#) - NYSED and Special Education Solutions, L.L.C., have partnered to provide the training and resources needed to serve as a Special Education Impartial Hearing Officer.

[Mediation Services for Special Education](#) - The New York State Dispute Resolution Association (NYS DRA), under a contract with the Office of Special Education, provides special education mediation for parents and school districts throughout NYS.

Fourteen (14) [Special Education Parent Centers](#) across NYS. These centers provide parents of children with disabilities with information, resources, and strategies to communicate effectively and work collaboratively with schools and stakeholders to advocate and actively participate in their children's education program.

[Response to Intervention \(RtI\)- Technical Assistance Center](#) supports capacity-building efforts of NYS schools to implement proven and promising practices within a RtI model and provides indirect technical assistance and professional development to NYS schools on RtI-related topics.

[Response to Intervention Personnel Development Project](#) includes four regional professional development teams supporting the development of RtI in approximately 500 schools across the State.

[Transition Services Professional Development Support Center](#) provides a web-based resource for transition services and planning for all school districts, as well as training for NYSED's RSE-TASC transition specialists.

[Intensive Teacher Institute for Teachers of the Blind and Visually Impaired](#) (ITI-TVI) is designed to provide tuition assistance to students and teachers interested in becoming TVIs, to address the shortage across the State, and who are willing to serve as TVIs in NYS for two years following completion of the program.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

To ensure that support to LEAs is timely, of high quality and is based on evidence-based practices, NYSED's Office of Special Education has developed research-based tools to guide our work (for examples see Quality Indicator Review and Resource Guides at <http://www.p12.nysed.gov/specialed/techassist/QIcover.htm>; Explicit and Specially Designed Instructional Walk Through Tool at <http://www.p12.nysed.gov/specialed/spp/Walkthroughtool-LAPSelfReview.pdf> and Diagnostic Tool of School District Effectiveness (DTSDE) at <http://www.p12.nysed.gov/accountability/diagnostic-tool-institute/home.html>).

NYSED ensures its technical assistance providers receive high quality ongoing professional development through three funded technical assistance centers:

- Transition Services Professional Development Support Center <http://www.p12.nysed.gov/specialed/techassist/announcePDSC.htm>
- New York State PBIS Technical Assistance Center <http://nyspbis.org/>
- Professional Learning Center (RSE-TASC PLC) <http://www.nys-rse-tasc.com/>

Other TACs meet periodically throughout the year with NYSED staff to share evidence-based practices and results and review current policy.

The deployment of technical assistance resources is determined annually through a regional planning process to ensure coordination and best uses of our resources. Current year data is considered in selecting LEAs where our resources would be best targeted.

In addition to State IDEA-funded technical assistance centers, NYSED established a **Network Team structure**, supported by ongoing professional development by NYSED, to assist districts and schools to implement the New York State Learning Standards with fidelity in all classrooms across the State. Network Teams generally consist of three persons with expertise in curriculum, data analysis, and instruction that serve approximately 25 schools. The purpose of the Network Teams is to work directly with educators in schools to deliver sustained, intensive professional development, which includes strategies for English Language Learners and students with disabilities; to support implementation of new standards, curriculum and assessments; and provide comprehensive, ongoing support. The Network Teams:

- Assist schools in implementing the NYS Learning Standards and aligning instruction to the new standards and curricula.
- Provide schools with support in adopting or adapting Pre-K – Grade 2 ELA curriculum and Grade 3-12 curriculum modules in ELA and Pre-K - Grade 12 curriculum modules in Mathematics.
- Support schools in implementing the State’s comprehensive assessment program and adapting to more rigorous performance-based assessments.
- Support school-based inquiry teams to analyze student performance data (both quantitative and qualitative) and make adjustments to instructional practices.
- Support schools and districts in the implementation of evidence-based observations and the Annual Professional Performance Review.
- Support reviews of persistently lowest-achieving schools.
- Facilitate professional development to support the implementation of the turnaround plan.

**Technical Assistance Sources and Actions**

In its June 28, 2016 Determination Letter to the State, OSEP required the State to report on the technical assistance sources from which the State received assistance and the actions the State took as a result of that technical assistance.

Technical Assistance	Outcome/Actions Taken
English Language Learners Alliance documents: • “Patterns of English Learner Student Reclassification Over Time: Evidence from New York City Schools” – Michael Kieffer • “Home Language Survey Data Quality Self-Assessment Tool” – Susan Henry	To inform work of RSE-TASC Bilingual Specialists in providing professional development to New York State school districts.
US Departments of Education and Justice – Joint Guidance to Ensure English Learner Students Have Equal Access to High-Quality Education; US Department of Education – English Learners Tool Kit	To inform work of RSE-TASC Bilingual Specialists in providing guidance to school districts.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

Technical Assistance	Outcome/Actions Taken
National Center on Education Outcomes	Inform updates to guidance on testing accommodations for students with disabilities.
Webinar: Technical Assistance for Test Accommodations - 12/16/15  Webinar: Assistive Technology and Accommodations in Post-Secondary Education, Supporting Successful Transition - 4/20/16	To provide guidance to the field on testing accommodations for students with disabilities.
National Education Technology Plan, USDOE Office of Educational Technology	Informed collaboration with NYSED's Office of Education Technology and Design on incorporating the needs of students with disabilities in technology plans submitted to NYS by each LEA.
Effective Literacy Instruction for ELLs with Disabilities	Used in developing a training module to be used by the RSE-TASC across the State.
National Center on Learning Disabilities - Understood.org	Informed planning related to future initiatives for students with learning disabilities.
Every Student Succeeds Act of 2015: What it Means for Students with Disabilities - 1/13/16	To inform the work of the Office of Special Education.
Webinar: A Snapshot of Youth-Focused Technical Assistance Centers – 6/24/2016	To inform guidance and technical assistance to the field.
Webinar: Work Based Learning and Work Experiences – 5/12/2016	
Webinar: Developing a Memorandum of Understanding – 2/11/2016	
Webinar: Preparing Youth to Thrive: Promising Practices for Social & Emotional Learning - 1/26/16	
Webinar: NTAET Evidence Based and Promising Practices – 12/10/2015	
Creating School & Community Business Partnerships - 11/12/2015	

Technical Assistance	Outcome/Actions Taken
Connecting Partners and Resources to Prepare Youth for Careers: A Federal Partners in Transition - 11/10/15	
Privacy Technical Assistance Center (PTAC) - <a href="http://ptac.ed.gov">http://ptac.ed.gov</a>	
National Association for the Education of Homeless Children and Youth (NAEH CY) - <a href="http://www.naehcy.org/">http://www.naehcy.org/</a>	
National Center for Education Statistics - <a href="https://nces.ed.gov/">https://nces.ed.gov/</a>	
National Secondary Transition Technical Assistance Centers (NSTTAC)	<p>Used to inform training of RSE-TASC Transition Specialists to recognize and build effective practices around transition.</p> <p>“Speak Out, Listen Up! Including Student Voice in School Improvement” – used to inform the work of our Youth Advisory Panel.</p> <p>“Determined to Succeed: Preparing for Postsecondary Education and Employment” – advising the work of the Higher Education Advisory Committee.</p>
National Technical Assistance Center for Transition (NTACT)	<p>Resources used to inform training of RSE-TASC Transition Specialists to recognize and build effective practices around transition.</p> <ul style="list-style-type: none"> <li>• Capacity Building Institute</li> <li>• Technical assistance on data-based decision making</li> <li>• "Predictors of Post-School Success and Culturally-Linguistically Diverse Populations"</li> </ul>
Federal Partners in Transition Webinar: Connecting Partners and Resources to Prepare Youth for Careers - 11/10/15	Inform training of RSE-TASC Transition Specialists to recognize and build effective practices around transition.
National Post School Outcomes Center	Technical assistance on "The College and Career Readiness and Success Organizer" used to inform work of RSE-TASC Transition Specialists and NYS Special Education Parent Centers to recognize and build effective practices around transition.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

Technical Assistance	Outcome/Actions Taken
IDEA Partnership National Secondary Transition Community of Practice	Monthly meetings to inform work of the State on best practices in transition.
Collaboration for Effective Educator Development Accountability and Reform (CEEDAR)	Resources used by RSE-TASC Transition Specialists to inform development of trainings, tools and self-assessments for schools/districts, Indicator 13 guidance materials, RSE-TASC newsletter articles and School Tools.
College and Career Readiness Center (CCRC)	Resources used by RSE-TASC Transition Specialists to inform development of trainings, tools and self-assessments for schools/districts, Indicator 13 guidance materials, RSE-TASC newsletter articles and School Tools.
The IRIS Center	Use of research briefs and modules to inform training developed by the RSE-TASC Regional Special Education Training Specialists and the Special Education Parent Centers.
National Drop Out Prevention Center for Students with Disabilities	Used to inform training of RSE-TASC Transition Specialists to recognize and build effective practices around transition.
Accessible Education Materials Center (AEM)	Utilize resources to conduct trainings around State and develop new information on Accessible Instructional Materials.
Webinar: The National Center on Deaf-Blindness – 9/30/2015	Used to inform State policy and guidance.
Coherent and Comprehensive Assessment Systems for College and Career Readiness - 10/15/15	
Webinar for Assessment Peer Review Guidance - 10/08/15	
State Implementation and Scaling-Up of Evidence-based Practices (SISEP)	Resources and materials for NYSED staff and RSE-TASC Coordinators to inform the work of the RSE-TASC network and other NYS special education technical assistance centers.
National Center for Intensive Interventions	Resources to inform the work of RSE-TASC Behavior Specialists and Nondistrict Specialists.

**Professional Development System:**

The mechanisms the State has in place to ensure that service providers have the skills to effectively provide services that improve results for students with disabilities.

NYSED's professional development system overlaps with the information provided above under "Technical Assistance."

NYSED's technical assistance centers provide ongoing regional professional development to parents and schools to enhance parent participation in the special education process and to enhance the knowledge and skills of educators to improve results for students with disabilities. Following are examples of the various types of professional development available on an ongoing basis, and offered at the regional level throughout the State. Selected training programs are vetted by NYSED to ensure statewide consistency in the information provided.

**Response to Intervention** (see <http://www.nysrti.org/page/on-site-trainings/>), regional training, webinars, past regional training, archived webinars.

**Positive Behavioral Interventions and Supports (PBIS) Regional Forums** ([www.nyspbis.org](http://www.nyspbis.org)): "Strengthening Classroom Systems within the Context of PBIS - Using the Behavior Pathway as a Guide" are professional development workshops designed to inform schools about the use of the "behavior pathway" as a tool for understanding and managing behavior.

**The Special Education Process for Principals** is designed to deepen a school principal's understanding of the special education process. Key information regarding special education law and regulations is included to ensure each principal understands his or her role and responsibility in relation to the education of students with disabilities.

**Transition Assessments to Inform the Development of the Individualized Education Program (IEP)** provides school personnel with information on identification and selection of transition assessments and how information from such assessments relates directly to IEP development.

**Accessible Instructional Materials (AIM)** is designed to inform schools, students and families about AIM and provides in-depth information about what accessible instructional materials are, who can benefit from them, and how to get them.

**Developing a Quality Individualized Education Program (IEP)** provides in-depth information about the State's IEP form and IEP development.

**Testing Accommodations** provides detailed information about the decision-making process and types of testing accommodations.

**Training of the Parent Member** of the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE) provides the background and tools necessary to be an effective parent member of the CPSE/CSE, and assists in building an effective relationship between the parent member and other members of the Committee.

**Committee on Preschool Special Education (CPSE) and Committee on Special Education (CSE) Chairperson Training** is a multi-day

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

training program for CPSE and CSE chairpersons with a best practices approach to the CPSE/CSE process and their role as a chairperson.

**Stakeholder Involvement:**  apply this to all Part B results indicators

The mechanism for soliciting broad stakeholder input on targets in the SPP, including revisions to targets.

Throughout the year, NYSED works with its Commissioner's Advisory Panel for Special Education (CAP), which is the IDEA State Advisory Panel, to review Annual Performance Report (APR) data results, obtain input on proposed targets and revisions to the SPP and discuss improvement activities. The Advisory Panel is continuously kept apprised regarding progress and issues reflected in the APR in order to obtain its insights and input in determining improvement strategies and need for revisions.

In each of its meetings in 2015-16, staff met with CAP to discuss the federal requirements for Phase I and Phase II development of the State Systemic Improvement Plan (SSIP) and SPP/APR indicator targets for FFY 2013-18 and to engage CAP in discussions regarding proposed actions for Phase II SSIP.

Two meetings were held, in December 2016 and January 2017, with selected stakeholders from within and outside of NYSED to discuss possible revisions to the State Identified Measureable Result (SiMR) for New York's SSIP.

At other meetings throughout the year with technical assistance providers, including but not limited to meetings with RSE-TASC, Special Education Parent Centers and Early Childhood Direction Centers, the State shares APR outcomes on compliance and outcome indicators to discuss improvement strategies.

**Reporting to the Public:**

How and where the State reported to the public on the FFY 2014 performance of each LEA located in the State on the targets in the SPP/APR as soon as practicable, but no later than 120 days following the State's submission of its FFY 2014 APR, as required by 34 CFR §300.602(b)(1)(i)(A); and a description of where, on its Web site, a complete copy of the State's SPP, including any revision if the State has revised the SPP that it submitted with its FFY 2014 APR in 2016, is available.

**Public Reports**

As required under section 616 of IDEA, the State publicly reports annually on the performance of each LEA on indicators 1 through 14 against the State's targets. This report is found at <http://data.nysed.gov/lists.php?type=district>. Click on 2014-15 for last year's posted data. District reports for 2015-16 will be posted as soon as possible following final submission of the SPP/APR, but no later than 120 days following the State's submission of its APR, as required by 34 CFR §300.602(b)(1)(i)(A).

The complete copy of the State Performance Plan can be found at [www.p12.nysed.gov/specialed/spp/aprhome.html](http://www.p12.nysed.gov/specialed/spp/aprhome.html).

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

No APR attachments found.

### Actions required in FFY 2014 response

The State's IDEA Part B determination for both 2015 and 2016 is Needs Assistance.

In the State's 2016 determination letter, the Department advised the State of available sources of technical assistance, including OSEP-funded technical assistance centers, and required the State to work with appropriate entities. The Department directed the State to determine the results elements and/or compliance indicators, and improvement strategies, on which it will focus its use of available technical assistance, in order to improve its performance.

The State must report, with its FFY 2015 SPP/APR submission, due February 1, 2017, on: (1) the technical assistance sources from which the State received assistance; and (2) the actions the State took as a result of that technical assistance.

### Responses to actions required in FFY 2014 response

#### OSEP Response

The State's determinations for both 2015 and 2016 were Needs Assistance. Pursuant to section 616(e)(1) of the IDEA and 34 C.F.R. § 300.604(a), OSEP's June 28, 2016 determination letter informed the State that it must report with its FFY 2015 SPP/APR submission, due February 1, 2017, on: (1) the technical assistance sources from which the State received assistance; and (2) the actions the State took as a result of that technical assistance. The State provided the required information.

Please refer to the Progress Page for OSEP's response to the State's prior Part B Indicator 15 findings.

### Required Actions

The State's IDEA Part B determination for both 2016 and 2017 is Needs Assistance. In the State's 2017 determination letter, the Department advised the State of available sources of technical assistance, including OSEP-funded technical assistance centers, and required the State to work with appropriate entities. The Department directed the State to determine the results elements and/or compliance indicators, and improvement strategies, on which it will focus its use of available technical assistance, in order to improve its performance. The State must report, with its FFY 2016 SPP/APR submission, due February 1, 2018, on: (1) the technical assistance sources from which the State received assistance; and (2) the actions the State took as a result of that technical assistance.

Key:

**Explanation of Changes**

OSEP requires the annual graduation rate targets under IDEA to be the same as the annual graduation rates under Title I of the ESEA. In New York, annual graduation rate targets under Title I of ESEA are 80% or a 10% gap reduction over the prior year for the 4-year graduation rate. The adjusted targets reflect the 10% gap reduction.

**Targets: Description of Stakeholder Input** - Please see the Stakeholder Involvement section of the [introduction](#).

Enter additional information about stakeholder involvement

OSEP requires the annual graduation rate targets under IDEA to be the same as the annual graduation rates under Title I of the ESEA. In New York, annual graduation rate targets under Title I of ESEA are 80% or a 10% gap reduction over the prior year for the 4-year graduation rate. Targets reflect the 10% gap reduction.

Targets may need to be adjusted annually based on the calculation of the gap reduction, which is based on the current year's data.

Since the targets for this indicator must be the same as the annual graduation rate targets under Title I of the ESEA, meaningful stakeholder input on target setting for this indicator consisted of informing stakeholders of OSEP's requirement. However, CAP did discuss and recommend improvement activities that will support the State to meet these targets.

**Graduation Conditions Field**

### FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Provide the four-year graduation cohort rate. The four-year graduation rate follows a cohort, or a group of students, who begin as first-time 9th graders in a particular school year and who graduate with a regular high school diploma in four years or less. An extended-year graduation rate follows the same cohort of students for an additional year or years. The cohort is "adjusted" by adding any students transferring into the cohort and by subtracting any students who transfer out, emigrate to another country, or die during the years covered by the rate.

Under 34 C.F.R. §200.19(b)(1)(iv), a "regular high school diploma" means the standard high school diploma awarded to students in a State that is fully aligned with the State's academic content standards and does not include a GED credential, certificate of attendance, or any alternative award. The term "regular high school diploma" also includes a "higher diploma" that is awarded to students who complete requirements above and beyond what is required for a regular diploma.

Graduation rate data for students with disabilities is calculated the same as for all students. In New York State, students with disabilities must earn a Regents or local diploma to be included in the counts of graduating students. Students with disabilities who earn an individualized education program (IEP) diploma or other nondiploma graduation credential are not considered high school graduates. Detailed information on graduation requirements can be found at:

<http://www.p12.nysed.gov/ciai/gradreq/Documents/CurrentDiplomaCredentialSummary.pdf>

Graduation requirements for students who first entered 9th grade in 2011 can be found at:

<http://www.p12.nysed.gov/ciai/gradreq/2011GradReqDetails.html>.

**Provide additional information about this indicator (optional)**

In order to align with ED Facts reporting, beginning with the FFY 2013 State Performance Plan/Annual Performance Report, the State reported on the 2009 Total Cohort graduation as of August. The methodology used in prior years identified cohort years one year later than the year they were identified for ED Facts reporting.

#### Actions required in FFY 2014 response

none

#### OSEP Response

The State revised its FFY 2015-2018 targets for this indicator, and OSEP accepts those targets.

**Targets: Description of Stakeholder Input** - Please see the Stakeholder Involvement section of the [introduction](#).

Enter additional information about stakeholder involvement

FFY 2013 - FFY 2018 targets were developed in consultation with stakeholders. The State relies on its Commissioner's Advisory Panel (CAP) (see introduction section) as its primary stakeholder group for purposes of target discussions. For this indicator, an internal workgroup analyzed historical targets and actual data and shared draft targets with CAP.

CAP discussed historical trends and the State's new policies that are expected to engage students to remain in school including, but not limited to, the Skills and Achievement Commencement Credential; the Career Development and Occupational Studies Commencement Credential; initiatives to increase student access to Career and Technical Education courses and work-based learning; and alternative pathways to a regular high school diploma. CAP suggested targets for drop out considering regional disparities and disparities by Need/Resource Capacity districts.

Change numerator description in data table

Change denominator description in data table

Please explain the methodology used to calculate the numbers entered above.

New York State's (NYS) Measurement: Percent of "total cohort" of students with disabilities who drop out as of August after four years of first entering 9th grade or, for ungraded students with disabilities, after four years of becoming 17 years of age.

In NYS' Calculation for Drop Out Rate for FFY 2015 Reporting for this FFY 2015 APR, the 2011 district total cohort is the **denominator**.

The 2011 district total cohort consists of all students, regardless of their current grade level, who met one of the following conditions:

First entered 9th grade at any time during the 2011-12 school year (July 1, 2011 through June 30, 2012); or, in the case of ungraded students with disabilities, reached their 17th birthday during the 2011-12 school year; or

Ungraded students are included in the 2011 cohort if their birth date is between July 1, 1993 and June 30, 1994 (inclusive).

Students who have spent at least one day in district schools or out-of-district placements during year 1, 2, 3, or 4 of high school are

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

included in the district total cohort unless they transferred to another diploma-granting program outside the district. For the 2011 Total Cohort, years 1, 2, 3, and 4 are the 2011-12, 2012-13, 2013-14 and 2014-15 school years, respectively.

A student will be included in the district total cohort if the student's enrollment record in the district shows that the student was enrolled for at least one day (not including July and August) and the reason for ending enrollment in the district was not one of the following: transferred to a school in another district, a nonpublic school, or a school outside New York; died; transferred by court order; or left the U.S.

The **numerator** for the computation of the rate of dropping out is the number of total cohort students with disabilities who dropped out as of August after four years of first entering 9th grade or, for ungraded students with disabilities, after four years of becoming 17 years of age.

Definition of Dropout: Information pertaining to the rules for reporting dropout data can be found throughout the SIRS Manual at <http://www.p12.nysed.gov/irs/sirs/>. The definition of "dropout" may be found on pages 285-286 in Appendix VI: Terms and Acronyms:

"A dropout is any student, regardless of age, who left school prior to graduation for any reason except death or leaving the country and has not been documented to have entered another program leading to a high school diploma or an approved program leading to a high school equivalency diploma. The NYSED reports an annual and cohort dropout rate. A student who leaves during the school year without documentation of a transfer to another program leading to a high school diploma or to an approved high school equivalency program or to a high school equivalency preparation program is counted as a dropout unless the student resumes school attendance before the end of the school year. The student's registration for the next school year does not exempt him or her from dropout status in the current school year. Students who resume and continue enrollment until graduation are not counted as dropouts in the cohort dropout calculation. In computing annual dropout rates, students who are reported as having been counted by the same school as a dropout in a previous school year are not counted as a dropout in the current school year."

Indicator 3A: Districts Meeting AYP/AMO for Disability Subgroup**

Monitoring Priority: FAPE in the LRE

Results indicator: Participation and performance of children with IEPs on Statewide assessments:

- A. Percent of the districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AYP/AMO targets for the disability subgroup.
- B. Participation rate for children with IEPs.
- C. Proficiency rate for children with IEPs against grade level, modified and alternate academic achievement standards.

**FFY 2015 SPP/APR Data: Reading Assessment**

Group Name	Number of Children with IEPs	Number of Children with IEPs Participating	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
A Grade 3-8	220,163	167,726	80.80%	95.00%	76.18%
B HS	27,260	24,723	90.94%	95.00%	90.69%

**Explanation of Group A Slippage**

According to State data, approximately 75 percent of all eligible test takers participated in the 2016 Grades 3-8 ELA and Math Tests; about 25 percent of eligible test takers did not participate in these tests and did not have a recognized, valid reason for not participating. Department data show that students who did not take the 2016 Grades 3-8 ELA and Math Tests and did not have a recognized, valid reason for not doing so were more likely to be White, more likely to be from a low or average need district, and slightly more likely to have scored at Levels 1 or 2 in 2015. The movement to opt out of State assessments had a significant impact on all populations of students, not just students with disabilities. Individual district data on participation rates for all students and students with disabilities can be

# FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR) Indicator 4A: Suspension/Expulsion

Monitoring Priority: FAPE in the LRE

Results indicator: Rates of suspension and expulsion:

- A. Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
- B. Percent of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

(20 U.S.C. 1416(a)(3)(A); 1412(a)(22))

**Targets: Description of Stakeholder Input** - Please see the Stakeholder Involvement section of the [introduction](#).

Enter additional information about stakeholder involvement

An internal workgroup analyzed historical targets and actual data to create proposed FFY 2013- FFY 2018 targets. The draft targets were shared with the State's Commissioner's Advisory Panel for Special Education, which is the IDEA State Advisory Panel. Results for this indicator were also shared with the State's technical assistance providers, including TAC-D and behavior specialists from the RSE-TASC (see Introduction section). Discussions in target setting included a review of historical trends and the State's resources dedicated to improve behavior practices in schools, including but not limited to the State funded PBIS technical assistance center, regional behavior specialists who are assigned to schools with high suspension rates, and the Technical Assistance Center on Disproportionality. Also considered was the State's work, through the Office of Student Support Services, relating to "Safe Schools". Stakeholder input stressed that, because the State has targeted technical assistance to address suspension concerns, we should set our targets to be more rigorous than historical trend analysis alone would lead us to.

## FFY 2015 SPP/APR Data

Please indicate the type of denominator provided

- Number of districts in the State
- Number of districts that met the State's minimum n-size

Number of districts that have a significant discrepancy	Number of districts in the State	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
29	679	4.12%	4.50%	4.27%

Choose one of the following comparison methodologies to determine whether significant discrepancies are occurring (34 CFR §300.170(a)):

- Compare the rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs among LEAs in the State
- The rates of suspensions and expulsions of greater than 10 days in a school year for children with IEPs in each LEA compared to the rates for nondisabled children in the same LEA

## State's definition of "significant discrepancy" and methodology

In NYS, the rates of suspensions and expulsions of students with disabilities out of school for more than 10 days in a school year are compared among the school districts in the State. For the baseline year 2004-05 through 2006-07, significant discrepancy was defined as a suspension rate of greater than three times the baseline statewide average (i.e., a rate of 4.0 percent or higher). Beginning in 2007-08, significant discrepancy was defined as a suspension rate of greater than two times the baseline statewide average (i.e., a rate of 2.7 percent or higher). The 2004-05 baseline statewide average suspension rate was 1.34 percent. School districts with at least 75 school-age students with disabilities that had a suspension rate of 4.0 percent or higher were identified as having significant

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

discrepancy in their rate among school districts. A minimum number of 75 students with disabilities was used since small numbers of students with disabilities may distort percentages.

The State uses a minimum of 75 students with disabilities "n" size requirement in its formula to compute significant discrepancy. However, it does not exclude school districts from the denominator when calculating results for this indicator.

### Provide additional information about this indicator (optional)

In the calculation of significant discrepancy, NYSED does not remove districts from the numerator or denominator, but rather calculates the discrepancy based on all districts. Then, districts that do not have at least 75 students overall are removed from identification.

However, the application of the 75 student minimum criteria did not result in any districts being removed from identification and had no effect on the numerator. Of the 116 districts that had fewer than 75 students with disabilities, even if the minimum n-size was 10, none of these 116 districts would have met the definition of significant discrepancy for either 4A or 4B (97 had zero students with disabilities suspended out of school for more than ten days, 13 only had one student with a disability suspended out of school for more than ten days, 4 only had two students with disabilities suspended out of school for more than ten days, 1 only had three students with disabilities suspended out of school for more than ten days, and 1 only had four students with disabilities suspended out of school for more than ten days). These low numbers of suspensions would not have met the criteria for identification, regardless of the n-size of number of students with disabilities.

### Actions required in FFY 2014 response

none

Note: Any actions required in last year's response that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

### FFY 2014 Identification of Noncompliance

#### Review of Policies, Procedures, and Practices (completed in FFY 2015 using 2014-2015 data)

Description of review

For each school district identified by its data as having a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year of students with disabilities, the State ensures that a review is conducted of the district's policies, procedures and practices related to the development and implementation of IEPs, the uses of positive behavioral interventions and supports, and procedural safeguards among students with disabilities subject to discipline. The State provides for the review of policies, procedures and practices each year a school district's data shows a significant discrepancy in its suspension rates for students with disabilities, as follows:

The first year a district's data indicates a significant discrepancy, the State requires the district to complete a State-developed self-review monitoring protocol, which requires the review of specific policies, practices and procedures related to discipline of students with disabilities, including requirements relating to the development and implementation of IEPs, use of positive behavioral interventions and supports, and procedural safeguards. The monitoring protocol for this review is available at <http://www.p12.nysed.gov/specialed/spp/indicators/4.htm>. A report of the results of this review is submitted by the district to the State. At the time of submission, school districts that identify issues of noncompliance are notified through a written finding of noncompliance that they must correct all instances of noncompliance immediately, but not later than the prescribed due date contained in the district's notification (always within one year).

The results from this review are reported to the State for follow-up and corrective actions if compliance issues are identified within one year or sooner. Fifteen (15) of the 28 school districts identified based on 2014-15 data had their review of policies, procedures and practices conducted in this manner.

For subsequent years in which a school district's data indicates significant discrepancies, the State conducts the monitoring review of the district's policies, procedures and practices as identified above. Thirteen (13) of the 28 school districts identified based on 2014-15 data had a review of their policies, procedures and practices conducted in this manner.

- The State DID NOT identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b)
- The State DID identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b). If YES, select one of the following:
  - The State DID ensure that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

Describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

Of reviews conducted in FFY 2015, 23 of the 28 school districts were identified as having one or more inappropriate policies,

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

procedures and/or practices relating to the development and implementation of IEPs, the use of positive behavioral supports and interventions, and/or procedural safeguards. These school districts were notified through written findings of noncompliance that they must correct their policies, practices and procedures immediately, but not later than the prescribed due date in their notification (within one year of being notified of noncompliance).

The State has verified that each noncompliant district is correctly implementing the specific regulatory requirements (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system, and had corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memorandum 09-02, dated October 17, 2008 (OSEP Memo 09-02). Verification included, but was not limited to, the review of revised policies and procedures, IEPs, behavioral intervention plans and other documents as related to the findings of noncompliance, showing the correction of noncompliance for individual students and all students.

 The State did NOT ensure that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

**Correction of Findings of Noncompliance Identified in FFY 2014**

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
177	175	2	0

**FFY 2014 Findings of Noncompliance Verified as Corrected**

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

When the State identifies school district policies, procedures and practices that are not consistent with State and federal requirements, the State requires the school district to (1) document the steps the district will take (i.e., corrective actions required and improvement activities recommended) to correct findings of noncompliance; (2) correct all instances of noncompliance immediately, but not later than the prescribed due date contained in the State's notification to the district (within one year); and (3) provide the State with an assurance and documentation that the school district has corrected all issues of noncompliance.

The State verified that the districts with one or more findings of noncompliance had revised their policies, procedures and practices to ensure that the district is correctly implementing the requirements. Verification of the correction of noncompliance included, but was not limited to, review of subsequent year data, review of revised policies and procedures and a sample of revised IEPs, behavioral intervention plans and other documents showing the correction of noncompliance.

*Describe how the State verified that each individual case of noncompliance was corrected*

If the school district identified individual student cases of noncompliance, the State notified the district that it must correct the noncompliance for the individual case(s) immediately, but not later than the prescribed due date contained in the State's notification to the district (within one year). The district was required to provide an assurance and documentation to the State that the school district has corrected all issues of noncompliance.

The State verified that the districts with one or more findings of noncompliance had made corrections to noncompliance for all individual cases. Verification of the correction of noncompliance included, but was not limited to, the review of revised IEPs, behavioral intervention plans, manifestation determination reviews and other documents showing the correction of noncompliance for individual students.

**OSEP Response**

The State must report, in the FFY 2016 SPP/APR, on the correction of noncompliance that the State identified in FFY 2015 as a result of the review it conducted pursuant to 34 CFR §300.170(b). When reporting on the correction of this noncompliance, the State must report that it has verified that each district with noncompliance identified by the State: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

**Required Actions**

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)  
Indicator 4B: Suspension/Expulsion**

Monitoring Priority: FAPE in the LRE

Compliance indicator: Rates of suspension and expulsion:

- A. Percent of districts that have a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and
- B. Percent of districts that have: (a) a significant discrepancy, by race or ethnicity, in the rate of suspensions and expulsions of greater than 10 days in a school year for children with IEPs; and (b) policies, procedures or practices that contribute to the significant discrepancy and do not comply with requirements relating to the development and implementation of IEPs, the use of positive behavioral interventions and supports, and procedural safeguards.

FFY	2015	2016	2017	2018
Target	0%	0%	0%	0%

**FFY 2015 SPP/APR Data**

Please indicate the type of denominator provided

- Number of districts in the State
- Number of districts that met the State's minimum n-size

Number of districts that have a significant discrepancy, by race or ethnicity	Number of those districts that have policies, procedures, or practices that contribute to the significant discrepancy and do not comply with requirements	Number of districts in the State	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
21	21	679	2.06%	0%	3.09%

**Explanation of Slippage**

In FFY 2014, State data determined that 16 districts had significant discrepancy by race or ethnicity in the suspension of students with disabilities. Fourteen (14) of the 16 districts reported having inappropriate policies, practices and procedures.

In FFY 2015, State data determined that 21 districts had significant discrepancy by race or ethnicity in the suspension of students with disabilities. Eight (8) of the 21 districts were newly identified and 13 districts had been identified for consecutive years. In all 21 districts, inappropriate policies, practices and procedures were reported.

Due to the increase of five districts over those that were identified in FFY 2014; the use of a more rigorous on-site monitoring protocol by the State for those districts with consecutive years of identification; and the inability of the 13 districts who found noncompliance in FFY 2014 to make timely changes to their policies, practices and procedures before the collection of the FFY 2015 data, the State is reporting an increase in the number of districts with inappropriate policies, practices and procedures. To clarify, the completion of the review of a district's policies, practices and procedures occurs only within a month of the collection of the next year's data.

- All races and ethnicities were included in the review

**State's definition of "significant discrepancy" and methodology**

NYS compares the number of students suspended in each race/ethnicity category with the statewide number of all students with disabilities suspended and computes a standard deviation to determine if there is significant discrepancy in suspensions. The State uses the following definition of "significant discrepancy":

- At least 75 students with disabilities enrolled on the first Wednesday in October;
- At least 10 students with disabilities in the particular race/ethnicity category were suspended;
- The suspension rate of the particular race/ethnicity was greater than two standard deviations above the mean of all suspensions of students with disabilities in the State.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

For the school district calculations, the minimum numbers of students with disabilities is used because of the potential for small numbers of students with disabilities to distort percentages. NYS includes the total number of school districts in the State in the denominator. The statewide calculation does not exclude school districts from the denominator calculation as a result of this minimum "n" size.

Reports include significant discrepancies of children in the "two or more races" category for Indicator 4B.

For each school district identified by its data as having a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year of students with disabilities, the State ensures that a review is conducted of the district's policies, procedures and practices relating to the development and implementation of IEPs, the use of positive behavioral supports, and procedural safeguards among students with disabilities subject to discipline. The State provides for the review of policies, procedures and practices each year a school district's data shows a significant discrepancy in its suspension rates for students with disabilities as follows:

The first year a district's data indicates a significant discrepancy, the State requires the district to complete a State-developed self-review monitoring protocol, which requires the review of specific policies, practices and procedures related to discipline of students with disabilities, including requirements relating to the development and implementation of IEPs, use of positive behavioral supports and procedural safeguards. The monitoring protocol for this review is available at <http://www.p12.nysed.gov/specialed/spp/indicators/4.htm>. A report of the results of this review is submitted by the district to the State. At the time of submission, school districts that identify issues of noncompliance are immediately notified through a written finding of noncompliance that they must correct all issues of noncompliance immediately, but not later than the prescribed due date in the district's notification (always within 12 months). The results from this review are reported to the State for follow-up and corrective actions if compliance issues are identified. Districts that are identified with inappropriate policies, procedures and/or practices are identified for purposes of reporting in the APR for indicator 4B.

For subsequent years in which a school district's data indicates significant discrepancies, the State conducts the monitoring review of the district's policies, procedures and practices in the areas as identified above.

**Data Source:**

For 4B, NYS uses data collected for Table 5 of Information Collection 1820-0621 (Report of Children with Disabilities Unilaterally Removed or Suspended/Expelled for More than 10 Days) and reported in the annual 618 report to USDOE. For 4B, NYS also includes data from reviews of policies, practices and procedures as defined in the above measurement for this indicator.

**Provide additional information about this indicator (optional)**

In the calculation of significant discrepancy, NYSED does not remove districts from the numerator or denominator, but rather calculates the discrepancy based on all districts. Then, districts that do not have at least 75 students overall are removed from identification.

However, the application of the 75 student minimum criteria did not result in any districts being removed from identification and had no effect on the numerator. Of the 116 districts that had fewer than 75 students, even if the minimum n-size was 10, none of these 116 districts would have met the definition of significant discrepancy for either 4A or 4B (97 had zero students with disabilities suspended out of school for more than ten days, 13 only had one student with a disability suspended out of school for more than ten days, 4 only had two students with disabilities suspended out of school for more than ten days, 1 only had three students with disabilities suspended out of school for more than ten days, and 1 only had four students with disabilities suspended out of school for more than ten days). These low numbers of suspensions would not have met the criteria for identification, regardless of the n-size of number of students with disabilities.

NYSED has a strong interest in redesigning its approach to monitoring and supporting districts in order to affect a significant impact on the suspension of students with disabilities by race and ethnicity. NYSED will seek OSEP's guidance and assistance in the redesign of its approach to Indicator 4B.

**Actions required in FFY 2014 response**

none

Note: Any actions required in last year's response that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

**FFY 2014 Identification of Noncompliance**

**Review of Policies, Procedures, and Practices** (completed in FFY 2015 using 2014-2015 data)

Description of review

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

During FFY 2015, 21 school districts were identified by the State as having data showing significant discrepancy based on race/ethnicity in the percent of students with disabilities suspended out of school for more than 10 days based on their 2014-15 school year data. For each school district identified by its data as having a significant discrepancy in the rate of suspensions and expulsions of greater than 10 days in a school year of students with disabilities, the State ensures that a review is conducted of the district's policies, procedures and practices relating to the development and implementation of IEPs, the use of positive behavioral supports, and procedural safeguards among students with disabilities subject to discipline. The State provides for the review of policies, procedures and practices each year a school district's data shows a significant discrepancy in its suspension rates for students with disabilities as follows:

The first year a district's data indicates a significant discrepancy, the State requires the district to complete a State developed self-review monitoring protocol, which requires the review of specific policies, practices and procedures related to discipline of students with disabilities, including requirements relating to the development and implementation of IEPs, use of positive behavioral supports and procedural safeguards. The monitoring protocol for this review is available at <http://www.p12.nysed.gov/specialed/spp/indicators/4.htm>. A report of the results of this review is submitted by the district to the State. Eight of the 21 school districts were sent notifications with directions to use a State-developed self-review monitoring protocol to review their policies, practices and procedures.

At the time of submission, school districts that identify issues of noncompliance are immediately notified through a written finding of noncompliance that they must correct all issues of noncompliance immediately, but not later than the prescribed due date in the district's notification (always within 12 months). The results from this review are reported to the State for follow-up and corrective actions if compliance issues are identified. Districts that are identified with inappropriate policies, procedures and/or practices are identified for purposes of reporting in the APR for Indicator 4B.

For subsequent years in which a school district's data indicates significant discrepancies, the State conducts the monitoring review of the district's policies, procedures and practices in the areas as identified above. Thirteen (13) school districts received focused or comprehensive reviews by the State's special education monitoring office to review the district's policies, procedures and practices because these school districts had two or more consecutive years of data with significant discrepancies.

- The State DID NOT identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b)
- The State DID identify noncompliance with Part B requirements as a result of the review required by 34 CFR §300.170(b).

Describe how the State ensured that such policies, procedures, and practices were revised to comply with applicable requirements consistent with OSEP Memorandum 09-02, dated October 17, 2008.

Twenty-one (21) of the 21 school districts (3.09 percent of all school districts in the State) had one or more inappropriate policies, procedures and/or practices that contributed to the significant discrepancy and did not comply with requirements relating to the development and implementation of IEPs, the use of PBIS, and/or procedural safeguards. These school districts have been notified through written findings of noncompliance that they must correct their policies, practices and procedures immediately, but not later than the prescribed due date in the district's notification (always within one year from being notified of noncompliance).

**Correction of Findings of Noncompliance Identified in FFY 2014**

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
156	122	9	25

**FFY 2014 Findings of Noncompliance Verified as Corrected**

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

The State verified that each noncompliant district (1) was correctly implementing the specific regulatory requirements (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) had corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memorandum 09-02, dated October 17, 2008 (OSEP Memo 09-02). The State verified, by review of revised policies and procedures and a review of documentation from a sample of student records, that the district is correctly implementing the specific regulatory requirements.

Describe how the State verified that each individual case of noncompliance was corrected

The State verified that each noncompliant district (1) was correctly implementing the specific regulatory requirements (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) had corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memorandum 09-02, dated October 17, 2008 (OSEP Memo 09-02).

The State verified the findings of noncompliance for each individual case were corrected by review of documentation related to the findings, including but not limited to corrected individualized education programs (IEPs), behavioral intervention plans, manifestation reviews and documentation that procedural safeguards notices were sent to parents. For noncompliance identified based on self-reviews, when the school district reported correction of noncompliance to the State, the State required an assurance and documentation from the school superintendent that each instance of noncompliance was corrected and that the information reported is

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

accurate.

### FFY 2014 Findings Not Yet Verified as Corrected

*Actions taken if noncompliance not corrected*

There are 25 findings of noncompliance from 3 districts that are not yet verified as corrected. In the first district (18 findings), NYSED met with the administration and completed additional on-site reviews to address the outstanding noncompliance. Technical assistance was provided, and the district is making progress in updating its policies, practices and procedures in order to resolve its noncompliance. NYSED will continue to provide on-site targeted technical assistance in order to assist the district to reach full compliance on its remaining 18 findings. If the district is unable to verify compliance in the coming months, NYSED will place the district under enforcement and require the development of an action plan to resolve the remaining outstanding noncompliance.

In the second district (6 findings), NYSED met with the administration and required the district to develop an action plan to resolve its outstanding noncompliance. NYSED has also completed on-site reviews in the district to address the outstanding noncompliance. Technical assistance was provided and the district submitted documentation to demonstrate compliance in one of the six findings. NYSED will continue to assist the district in reaching full compliance on these issues by providing targeted technical assistance.

In the third district (1 finding), one of the two citations that the district identified as noncompliant during its 2014-15 self-review was verified as corrected during an on-site review by NYSED. For the remaining citation, NYSED conducted another on-site review to monitor the district's progress on the resolution of this noncompliance. NYSED will continue to assist the district in reaching full compliance on the remaining issue. If the district is unable to verify compliance in the coming months, NYSED will place the district under enforcement action consistent with its Procedures for the Resolution of Noncompliance.

### Explanation of Alternate Data

### FFY 2013 Findings of Noncompliance Verified as Corrected

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

The State verified that each noncompliant district (1) was correctly implementing the specific regulatory requirements (i.e., achieved 100 percent compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) had corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memorandum 09-02, dated October 17, 2008 (OSEP Memo 09-02). The State verified, by review of revised policies and procedures and a review of documentation from a sample of student records, that the district is correctly implementing the specific regulatory requirements.

*Describe how the State verified that each individual case of noncompliance was corrected*

The State verified that each noncompliant district (1) was correctly implementing the specific regulatory requirements (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) had corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memorandum 09-02, dated October 17, 2008 (OSEP Memo 09-02).

The State verified that the findings of noncompliance for each individual case were corrected by review of documentation related to the findings, including but not limited to corrected individualized education programs (IEPs), behavioral intervention plans, manifestation reviews and documentation that procedural safeguards notices were sent to parents. For noncompliance identified based on self-reviews, when the school district reported correction of noncompliance to the State, the State required an assurance and documentation from the school superintendent that each instance of noncompliance was corrected and that the information reported is accurate.

### FFY 2013 Findings Not Yet Verified as Corrected

*Actions taken if noncompliance not corrected*

In one school district, six findings of noncompliance remain uncorrected. The district was identified under IDEA as needing intervention for the first year. NYSED met with the administration and completed an on-site review of the district's policies, practices and procedures. NYSED reviewed individual student records, provided technical assistance and encouraged the district to participate in training available from one of NYSED's technical assistance centers. If the district is unable to verify compliance in the coming months, NYSED will place the district under further enforcement.

### FFY 2009 Findings Not Yet Verified as Corrected

*Actions taken if noncompliance not corrected*

In one school district, three findings of noncompliance remain uncorrected. NYSED met with administration and required the district to develop an action plan to resolve the outstanding noncompliance. NYSED completed a focused review, as well as a follow-up review, in the district to address the outstanding noncompliance. Technical assistance was provided and the district is making progress on updating its policies, practices and procedures in order to verify compliance. NYSED will continue to provide on-site targeted technical

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**  
assistance in order to assist the district in reaching full compliance on these three findings.

**OSEP Response**

Because the State reported less than 100% compliance (greater than 0% actual target data for this indicator) for FFY 2015, the State must report on the status of correction of noncompliance identified in FFY 2015 for this indicator. The State must demonstrate, in the FFY 2016 SPP/APR, that the districts identified with noncompliance in FFY 2015 have corrected the noncompliance, including that the State verified that each district with noncompliance: (1) is correctly implementing the specific regulatory requirement(s) (i.e., achieved 100% compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

The State reported that noncompliance identified in FFY 2013 and FFY 2014 as a result of the review it conducted pursuant to 34 CFR §300.170(b) was partially corrected. When reporting on the correction of noncompliance, the State must demonstrate, in the FFY 2016 APR, that it has verified that each district with remaining noncompliance identified in FFY 2013 and FFY 2014: (1) is correctly implementing the specific regulatory requirement(s) (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

The State reported that noncompliance identified in FFY 2009 as a result of the review it conducted pursuant to 34 CFR §300.170(b) was not corrected. When reporting on the correction of this noncompliance, the State must demonstrate, in the FFY 2016 SPP/APR, that it has verified that each district with remaining noncompliance identified in FFY 2009: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

**Required Actions**

Enter additional information about stakeholder involvement

An internal workgroup analyzed historical targets and actual data to create proposed FFY 2013 - FFY 2018 targets. The draft targets were shared in the fall of 2014 with the State's Commissioner's Advisory Panel for Special Education, which is the IDEA State Advisory Panel. Discussions regarding target setting included a review of historical trends, regional variations in least restrictive environment (LRE) data and data disaggregated by Need/Resource capacity. CAP noted the need to target improvement strategies to increase the percentage of students who are in regular classes for 40 to 80% of the school day. Final targets were determined following this annual meeting in consideration of stakeholder comments.

**Provide additional information about this indicator (optional)**

NYSED discussed the state's least restrictive environment (LRE) data with its Board of Regents in the fall of 2015, reported publicly on each district's LRE data, and discussed strategies for improvement. NYSED staff, in collaboration with stakeholders, is in the process of developing a district self-review LRE tool to assist districts in assessing their practices around LRE and developing a plan for improvement.

An internal workgroup analyzed historical targets and actual data to create proposed FFY 2013 - FFY 2018 targets. The draft targets were shared with the State's Commissioner's Advisory Panel for Special Education, which is the IDEA State Advisory Panel, at one of its 2014 meetings. Discussions on target setting included a review of historical trends and variations in regional least restrictive environment (LRE) data; statewide initiatives to expand Universal PreKindergarten programs; technical assistance resources added to the RSE-TASC to improve behavior supports for preschool children with disabilities; and information obtained from stakeholders from stakeholder meetings conducted by NYSED in collaboration with Early Childhood Direction Centers in regions of the State where data show disproportionate rates of separate school placements for preschool children with disabilities. (Stakeholders from these regional meetings included special education preschool providers, special education directors from the public schools, municipality representatives, early intervention providers, regular early childhood providers, parents, and technical assistance providers.)

**FFY 2015 SPP/APR Data**

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

	Number of children with IEPs aged 3 through 5 attending	Total number of children with IEPs aged 3 through 5	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
A. A regular early childhood program and receiving the majority of special education and related services in the regular early childhood program	28,127	67,067	43.19%	43.50%	41.94%
B. Separate special education class, separate school or residential facility	16,000	67,067	22.65%	21.00%	23.86%

**Explanation of A Slippage**

The percent of children aged three through five with IEPs attending a regular early childhood program and receiving the majority of special education and related services in the regular early childhood program varied across the different geographic regions of the state.

In New York City (NYC), the percent of children attending a regular early childhood program and receiving the majority of special education and related services in the regular early childhood program decreased by 2.4 percent, from 52.7 percent in FFY 2014 to 50.3 percent in FFY 2015. Many integrated preschool programs in NYC have closed because of the inability to attract nondisabled students into their integrated classrooms. The efforts of districts to enroll nondisabled preschoolers into their Universal Prekindergarten (UPK) programs has contributed to this issue. In addition, preschool children who were previously recommended for multiple hours of special education itinerant services (SEIS) are now being placed in programs that are more closely aligned with their instructional needs, such as special class programs.

Outside of New York City, there was no slippage and the rate increased from 34.6 percent in FFY 2014 to 35.2 percent in FFY 2015.

**Explanation of B Slippage**

The percent of children aged three through five with IEPs attending a separate special education class, separate school or residential facility also varied across the different geographic regions of the state.

In NYC, the percent of children attending separate special education classes increased by 3.5 percent, from 29.1 percent in FFY 2014 to 32.6 percent in FFY 2015. Many integrated preschool programs in NYC have closed because of the inability to attract nondisabled students into their integrated classrooms. The efforts of districts to enroll nondisabled preschoolers into their Universal Prekindergarten (UPK) programs has contributed to this issue. In addition, preschool children who were previously recommended for multiple hours of special education itinerant services (SEIS) are now being placed in programs that are more closely aligned with their instructional needs, such as special class programs.

Outside of NYC, there was no slippage and the rate decreased from 16.8 percent in FFY 2014 to 16.7 percent in FFY 2015.

**Provide additional information about this indicator (optional)**

A least restrictive environment (LRE) district self assessment tool is under development to assist districts in assessing their practices around LRE and developing a plan for improvement. This tool focuses on both preschool and school-age settings.

Enter additional information about stakeholder involvement

Proposed targets for preschool outcomes were discussed with the Commissioner's Advisory Panel for Special Education. Outcomes for this indicator were also shared with the Early Childhood Direction Centers and other technical assistance providers, including parent center representatives.

Considerations discussed by stakeholders included the experience of districts in reporting this data; preschool LRE data and regional meeting/planning initiatives (see Indicator 6); the new addition of preschool behavior specialists to the RSE-TASC; the expansion of Universal PreKindergarten programs and access by students with disabilities; and the focus on the NYS PreKindergarten State Standards.

The preschool outcome results that less than 50% of children with disabilities, by the time they turn age 6 or exit preschool special education services, are functioning at the same level as their nondisabled peers in outcome B - acquisition and use of knowledge and skills (including early language/ communication and early literacy) was discussed from the perspective of the gap in early literacy achievement. This outcome, and the need to focus the State's improvement initiatives in this area, were discussed in the development of Indicator 17.

# FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

## FFY 2015 SPP/APR Data

Number of preschool children aged 3 through 5 with IEPs assessed	3760.00
--	---------

### Outcome A: Positive social-emotional skills (including social relationships)

	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	14.00	
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	279.00	
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	1670.00	
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	1359.00	
e. Preschool children who maintained functioning at a level comparable to same-aged peers	438.00	

	Numerator	Denominator	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
A1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome A, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program. $(c+d)/(a+b+c+d)$	3029.00	3322.00	87.00%	92.00%	91.18%
A2. The percent of preschool children who were functioning within age expectations in Outcome A by the time they turned 6 years of age or exited the program. $(d+e)/(a+b+c+d+e)$	1797.00	3760.00	47.02%	48.00%	47.79%

### Outcome B: Acquisition and use of knowledge and skills (including early language/communication)

	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	13.00	
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	291.00	
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	1643.00	
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	1379.00	
e. Preschool children who maintained functioning at a level comparable to same-aged peers	434.00	

	Numerator	Denominator	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
B1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome B, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program. $(c+d)/(a+b+c+d)$	3022.00	3326.00	88.64%	93.50%	90.86%
B2. The percent of preschool children who were functioning within age expectations in Outcome B by the time they turned 6 years of age or exited the program. $(d+e)/(a+b+c+d+e)$	1813.00	3760.00	47.40%	48.00%	48.22%

### Outcome C: Use of appropriate behaviors to meet their needs

	Number of Children	Percentage of Children
a. Preschool children who did not improve functioning	12.00	
b. Preschool children who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	289.00	
c. Preschool children who improved functioning to a level nearer to same-aged peers but did not reach it	1466.00	
d. Preschool children who improved functioning to reach a level comparable to same-aged peers	1290.00	
e. Preschool children who maintained functioning at a level comparable to same-aged peers	703.00	

	Numerator	Denominator	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
C1. Of those preschool children who entered or exited the preschool program below age expectations in Outcome C, the percent who substantially increased their rate of growth by the time they turned 6 years of age or exited the program. $(c+d)/(a+b+c+d)$	2756.00	3057.00	87.60%	92.00%	90.15%
C2. The percent of preschool children who were functioning within age expectations in Outcome C by the time they turned 6 years of age or exited the program. $(d+e)/(a+b+c+d+e)$	1993.00	3760.00	53.72%	52.00%	53.01%

Was sampling used? Yes

Has your previously-approved sampling plan changed? No

The State provides assurance that it is using its currently approved sampling plan for this indicator and only changing the years for which it is used.

**Process to collect entry and exit information**

Entry assessments:

All preschool children who were initially evaluated on or after March 1, 2006 and found eligible for preschool special education programs and/or services are required to have entry assessment results. All preschool children suspected of having a disability must have entry assessments. These assessments are conducted by approved preschool evaluators. Results are reported to the Committee on Preschool Special Education (CPSE), which determines if the child is eligible for preschool special education programs and services and the entry levels of functioning in three early childhood outcome areas. Approved preschool evaluators are required to include specific assessment information on the Preschool Student Evaluation Summary Report and fill out the supporting evidence for questions 1a, 2a and 3a of the Child Outcomes Summary Form. CPSEs are required to meet to determine a preschool child's eligibility for preschool special education programs and/or services and, if determined eligible, review the summary evaluation results and reports from the approved evaluator. For preschool children found to be eligible, the CPSEs rate the child's functioning across settings in each of the three outcome areas identified in questions 1a, 2a and 3a of the Child Outcomes Summary Form. Annually, a representative sample of school districts are required to collect and submit entry and exit data to NYSED through SIRS for preschool children who leave preschool special education services anytime during the school year. All school districts are required to maintain entry level assessment data on all preschool children who are determined to be eligible for preschool special education programs or services.

Exit assessments:

While all preschool children who were initially evaluated on or after March 1, 2006 and found eligible for preschool special education programs and/or services are required to have entry assessment results, exit assessments only need to be conducted for preschool children with disabilities who stop receiving preschool special education services due to program completion or declassification during the school year in which the school district is required to report exit data on this indicator. The only children in sample school districts who require exit assessments are those who received an entry assessment and participated in preschool special education for at least six months prior to exiting.

In order to collect exit assessment data on the progress preschool children with disabilities have made as a result of receiving preschool special education programs and/or services, the Committee on Special Education (CSE) must arrange for exit assessment(s) in the three early childhood outcome areas to be conducted as part of the reevaluation process to determine the child's eligibility for school age special education. Whenever possible and appropriate, the exit assessment instruments should be the same assessment instruments used by the preschool evaluator for the entry assessment process. The results of these assessments must be provided to the CSE. The CSE will review the exit assessment results and determine the child's progress rating in the three identified areas based on rating criteria provided by the State. Some preschool children with disabilities may be referred to the CPSE for possible declassification prior to aging out of preschool special education programs and/or services. When considering declassification of a preschool child with a disability, the CPSE must arrange for a reevaluation by an approved evaluator selected by the parent. The reevaluation process must include conducting exit assessments that measure the child's progress in the three early childhood outcome areas. Whenever possible, the exit assessment instruments should be the same assessment instruments used by the initial approved preschool evaluator for the entry assessment process. The results of the reevaluation and exit assessments must be provided to the CPSE, including the child's parents and the person designated by the municipality in which the child resides. The CPSE must review the reevaluation and assessment results and determine the child's progress rating in each of the three identified areas.

Did you use the Early Childhood Outcomes Center (ECO) Child Outcomes Summary Form (COSF)? Yes

Provide additional information about this indicator (optional)

**Data Source**

Since the 2007-08 school year, these data are collected at the individual student level through the State's Student Information Repository System (SIRS). The most current SIRS manual is posted at: <http://www.p12.nysed.gov/irs/sirs/>. The data is based on using the federally developed Child Outcomes Summary Form (COSF).

The State provides directions for completing the Child Outcomes Summary Form; see: <http://www.p12.nysed.gov/specialed/spp/7summaryform0809.html>.

**Overview of Issue/Description of System or Process:**

In New York State, preschool children suspected of having a disability are referred to their local school districts through their district's Committee on Preschool Special Education (CPSE). In accordance with State statute, parents maintain the right to select an evaluator from a list of state-approved evaluators. If, based on the evaluation, the CPSE determines that a child is eligible for special education

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

services, an IEP is developed that identifies the recommended special education services for the child. Preschool students with disabilities may receive related services only (RSO), Special Education Itinerant Services (SEIS), or be placed in a special class program for either a half or full day, including integrated programs with students without disabilities, when appropriate. New York State's system allows for the provision of related services and SEIS within a regular early childhood program, home, other setting or daycare environments. In New York State, preschool children with disabilities receive their special education services from approved private preschool providers or appropriately qualified related service providers on a list maintained by the municipality.

**Identification of assessment measures in preschool outcome areas**

The most frequently administered assessments for 3- and 4-year old children used in the State to assess preschool children with disabilities in the three outcome areas are provided below.

Enter additional information about stakeholder involvement

Results for this indicator were shared and discussed with the State's technical assistance providers, including but not limited to the Parent Centers. Targets for this indicator were drafted in consideration of historical data trends and improvements in rates of survey completion as a result of outreach to parents by districts and Special Education Parent Centers. Proposed targets were shared and discussed with the Commissioner's Advisory Panel for Special Education.

**FFY 2015 SPP/APR Data**

Number of respondent parents who report schools facilitated parent involvement as a means of improving services and results for children with disabilities	Total number of respondent parents of children with disabilities	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
8197.00	8772.00	93.93%	94.00%	93.45%

Since the State did not report preschool children separately, discuss the procedures used to combine data from school age and preschool surveys in a manner that is valid and reliable.

NYSED directs school districts to include every preschool and school-age student with a disability who is provided special education programs and services in the eligible population of students from which a random sample must be selected. Based upon this pool of eligible students, districts must use a sampling calculator. Each school district in the sample is required to over-sample by sending the survey to all the parents of preschool and school-age students with disabilities or by sending the survey to ten times the required minimum sample size. The sampling calculator used to determine minimum sample sizes is available at <http://eservices.nysed.gov/pdsystem/samplecalculator.jsp>.

While all districts have a choice to either report data on all eligible students for this indicator or submit data on a randomly selected sample of minimum number of students using the sampling guidelines provided by the Department, the vast majority of school districts submit data on behalf of all eligible students in order to meet the required minimum number.

Describe how the State has ensured that any response data are valid and reliable, including how the data represent the demographics of the State.

NYSED includes in the contract deliverables for its 14 special education parent centers (most of which are also federal OSEP funded parent centers), activities to encourage parents of students with disabilities to complete and return the parent survey when requested by their school districts.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

In addition to English, the surveys are made available by the State in the six predominant languages in this State (Spanish, Russian, Simplified Chinese, Haitian Creole, Bengali, and Urdu). NYSED requires the districts to provide translations to ensure parents who do not read or understand one of these languages have an opportunity to participate in the survey.

Surveys are returned directly to an independent research firm working with NYSED to print, disseminate, collect, analyze and report on the parent survey information. A parent's individual responses are confidential.

The totally random sampling methodology and required documentation (which districts must maintain for seven years) should minimize selection bias. School districts are encouraged to provide the surveys in a variety of ways to improve the response rate. NYSED attempts to prevent missing data by first describing precisely what the State needs to collect, providing technical assistance and then following up with school districts to request missing data.

School districts are directed to employ a variety of methods to encourage parents to complete the survey, including but not limited to using paper surveys, telephone surveys, interview surveys and web-based surveys. Parents are also able to complete the survey through an internet website made available by the Department. School districts will be responsible to ensure a statistically sound return rate.

The results for FFY 2015 accurately represent the disability type classification demographics of the State, but are less representative of the race/ethnicity demographics of the State. Hispanic and Black/African American students are underrepresented while White students are overrepresented. The issue may be the overall response rate being lower in districts with a larger non-White population and higher in districts with a larger White population. NYSED will explore strategies to increase parent survey response rates in districts that are known to have a larger non-White population of students.

Was sampling used?  Yes

Has your previously-approved sampling plan changed?  No

Was a collection tool used?  Yes

Is it a new or revised collection tool?  No

Yes, the data accurately represent the demographics of the State

No, the data does not accurately represent the demographics of the State

Describe the sampling methodology outlining how the design will yield valid and reliable estimates.

The State provides assurance that it is using its currently approved sampling plan and only changed the years for which it is used.

Provide additional information about this indicator (optional)

**Survey Instrument**

New York State uses a modified version of the survey developed by the National Center for Special Education Accountability Measures (NCSEAM). Twenty-five (25) items from NCSEAM's Parent Survey - Part B have been selected based on the rules established for item selection to ensure reliability and validity of the use of the survey. The directions, format and wording of some questions were revised slightly. A copy of the survey used by New York State can be found at <http://www.p12.nysed.gov/specialed/spp/2013/ParentSurvey.pdf>.

**Timelines for Data Collection and Reporting**

The surveys may be distributed between September 1st and August 31st of the year in which a school district is required to report on Indicator 8. Surveys must be postmarked by August 31st of the reporting year.

**Report Criteria**

The criteria used to determine if a parent has rated his or her school district positively for parental involvement will be as follows:

The survey must be completed with a minimum of 15 responses and at least 51 percent of the responses must receive a positive rating of either agree, strongly agree, or very strongly agree. For district reporting, districts that do not have the minimum number of parent surveys returned as indicated in the sampling methodology will be reported as not having positive parent involvement, with the reason noted.

**Technical Assistance**

Information to assist districts in meeting their responsibilities for data collection for this indicator is publicly posted at:

[http://parentsurvey.potsdam.edu/index\\_school.htm](http://parentsurvey.potsdam.edu/index_school.htm), and

<http://www.p12.nysed.gov/specialed/spp/indicators/8.htm>.

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

### Actions required in FFY 2014 response

none

### OSEP Response

The State reported that the data for this indicator were collected from a response group that was not representative of the population. OSEP notes that the State included strategies or improvement activities to address this issue in the future.

### Required Actions

In the FFY 2016 SPP/APR, the State must report whether its FFY 2016 data are from a response group representative of the population, and, if not, the actions the State is taking to address this issue.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)  
Indicator 9: Disproportionate Representation**

Monitoring Priority: Disproportionate Representation

Compliance indicator: Percent of districts with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification.

(20 U.S.C. 1416(a)(3)(C))

8	4	679	0.15%	0%	0.59%

**Explanation of Slippage**

In FFY 2014, State data determined that six school districts had significant disproportionality in representation by race and ethnicity in special education. Four of the six districts were reviewed by the State because of their consecutive years of identification. Of these six districts, only one was found to have inappropriate policies, practices and procedures. Four of the six districts identified by their data in FFY 2014 improved such that they were not identified by their data in FFY 2015.

In FFY 2015, State data determined that eight school districts had significant disproportionality in representation; two more districts than were identified in FFY 2014. Six of the eight school districts were newly identified as having disproportionate representation and two of the districts were identified for consecutive years, requiring the State to use a more rigorous on-site monitoring protocol. The more rigorous State monitoring, as well as the identification of two more districts, contributed to the slippage in FFY 2015.

All races and ethnicities were included in the review

Describe how the State made its annual determination that the disproportionate overrepresentation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification

The State provides for the review of policies, procedures and practices each year a school district's data shows a disproportionate representation based on race/ethnicity, as follows:

The first year a district's data indicates disproportionality, the State requires the district to complete a State-developed self-review monitoring protocol, which requires the review of specific policies, practices and procedures to determine whether the disproportionate representation was the result of inappropriate identification. The monitoring protocol for this review is available at <http://www.p12.nysed.gov/specialed/spp/9selfreview-Oct12.pdf>. A report of the results of this review is submitted by the district to the State. At the time of submission, school districts that identify issues of noncompliance are notified through written findings of noncompliance that they must correct all issues of noncompliance immediately, but not later than the prescribed due date in the district's notification (always within one year).

For subsequent years in which a school district's data indicates significant discrepancies, the State conducts the monitoring review of the district's policies, procedures and practices, as identified above.

**Definition of Disproportionate Representation and Methodology:**

NYS uses the relative risk and weighted relative risk ratios, with minimum "n" sizes to identify school districts whose data indicate disproportionate representation of racial and ethnic groups in special education. The minimum "n" size requirement used to compute disproportionate representation does not exclude school districts from the denominator when calculating results for this indicator, but only districts that meet the minimum "n" size are included in the numerator. All districts are included in the denominator. Parentally placed students attending nonpublic schools are excluded from the calculation.

**Disproportionate Over-Representation in Special Education:**

- At least 75 students with disabilities enrolled on the first Wednesday in October;
- A minimum of 30 students (disabled and nondisabled) of particular race/ethnicity enrolled on the first Wednesday in October;
- At least 75 students (disabled and nondisabled) of all other race/ethnicities enrolled on the first Wednesday in October;
- At least 10 students with disabilities of particular race/ethnicity enrolled in district on the first Wednesday in October; and

Either:

- Both the relative risk ratio and weighted relative risk ratio for any race/ethnic group is 2.5 or higher; **or**
- All students with disabilities in special education are of only one race/ethnic group regardless of the size of the relative risk ratio and weighted relative risk ratio.

**New York State's Measurement:****Step One:**

NYS compares the percent of total enrollment of each race/ethnic group in special education with the percent of total enrollment of all other race/ethnic groups in special education combined. For identification of school districts since the 2005-06 school year, the State has used the following definition of "disproportionate representation" and in subsequent years may revise the definition by lowering the relative risk ratio, weighted relative risk ratio, and the minimum numbers of students. The State's definition of significant disproportionality is the same as its definition of disproportionality.

NYS uses the relative risk and weighted relative risk ratios, with minimum "n" sizes to identify school districts whose data indicate disproportionate representation of racial and ethnic groups in special education. See the definition of "Disproportionate Representation and Methodology" described above.

**Step Two:**

The State provides for the review of policies, procedures and practices each year a school district's data shows a disproportionate representation based on race/ethnicity as follows:

The first year a district's data indicates disproportionality, the State requires the district to complete a State-developed self-review monitoring protocol, which requires the review of specific policies, practices and procedures to determine whether the disproportionate representation was the result of inappropriate identification. The monitoring protocol for this review is available at <http://www.p12.nysed.gov/specialed/spp/9selfreview-Oct12.pdf>. A report of the results of this review is submitted by the district to the State. At the time of submission, school districts that identify issues of noncompliance are notified through written findings of noncompliance that they must correct all issues of noncompliance immediately, but not later than the prescribed due date in the district's notification (always within one year).

For subsequent years in which a school district's data indicates significant discrepancies, the State conducts the monitoring review of the district's policies, procedures and practices as identified above.

**Step Three:**

When calculating the results for this indicator, the State divides the number of school districts with disproportionate representation and inappropriate policies, procedures and/or practices that indicate inappropriate identification by the total number of school districts in the State.

**Actions required in FFY 2014 response**

none

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Note: Any actions required in last year's response that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

### Correction of Findings of Noncompliance Identified in FFY 2014

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
14	14	null	0

### FFY 2014 Findings of Noncompliance Verified as Corrected

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

To verify the correction of noncompliance, the State verified that each noncompliant district (1) is correctly implementing the specific regulatory requirement(s) (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with Office of Special Education Programs (OSEP) Memo 09-02.

*Describe how the State verified that each individual case of noncompliance was corrected*

To verify the correction of noncompliance identified through onsite monitoring, the State followed up with each district to ensure that the compliance assurance plan (CAP) was fully implemented, and reviewed the district's revised policies, procedures and practices, including a sample of student records to verify correction of noncompliance and that individual instances of noncompliance had been corrected.

### OSEP Response

Because the State reported less than 100% compliance for FFY 2015 (greater than 0% actual target data for this indicator), the State must report on the status of correction of noncompliance identified in FFY 2015 for this indicator. The State must demonstrate, in the FFY 2016 SPP/APR, that the 4 districts identified in FFY 2015 with disproportionate representation of racial and ethnic groups in special education and related services that was the result of inappropriate identification are in compliance with the requirements in 34 CFR §§300.111, 300.201, and 300.301 through 300.311, including that the State verified that each district with noncompliance: (1) is correctly implementing the specific regulatory requirement(s) (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2015, although its FFY 2015 data reflect less than 100% compliance (greater than 0% actual target data for this indicator), provide an explanation of why the State did not identify any findings of noncompliance in FFY 2015.

### Required Actions

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)  
Indicator 10: Disproportionate Representation in Specific Disability Categories**

Monitoring Priority: Disproportionate Representation

Compliance indicator: Percent of districts with disproportionate representation of racial and ethnic groups in specific disability categories that is the result of inappropriate identification.

All races and ethnicities were included in the review

Describe how the State made its annual determination that the disproportionate overrepresentation it identified of racial and ethnic groups in specific disability categories was the result of inappropriate identification

The State provides for the review of policies, procedures and practices each year a school district's data shows a disproportionate representation based on race/ethnicity in the disability category of students with disabilities as follows:

- The first year a district's data indicates disproportionality, the State requires the district to complete a State-developed self-review monitoring protocol, which requires the review of specific policies, practices and procedures to determine whether the disproportionate representation was the result of inappropriate identification. The monitoring protocol for this review is available at <http://www.p12.nysed.gov/specialed/spp/indicators/10.htm>. A report of the results of this review is submitted by the district to the State. At the time of submission, school districts that identify issues of noncompliance are immediately notified through written findings of noncompliance that they must correct all issues of noncompliance immediately, but not later than the prescribed due date in the district's notification (always within one year).
- For subsequent years in which a school district's data indicates significant discrepancies, the State conducts the monitoring review of the district's policies, procedures and practices as identified above.

Define "disproportionate representation" and describe the method(s) used to calculate disproportionate representation

**Definition of Disproportionate Representation and Methodology:** (title added February 2010)

NYS uses the relative risk and weighted relative risk ratios, with minimum "n" sizes to identify school districts whose data indicate disproportionate representation of racial and ethnic groups in specific disability categories. The minimum "n" size requirement used to compute disproportionate representation does not exclude school districts from the denominator when calculating results for this indicator, but only districts that meet the minimum "n" size are included in the numerator. All districts are included in the denominator. Parentally placed students attending nonpublic schools are excluded from the calculation. The definition of "Disproportionate Representation" and the methodology for calculating it is as follows:

*Disproportionate Over-representation in Specific Disability Categories (Emotional Disturbance, Learning Disability, Intellectual Disability, Other Health Impairment, Speech or Language Impairment and Autism):*

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

- At least 75 students with disabilities enrolled on child count date (the first Wednesday in October);
- A minimum of 30 students (disabled and nondisabled) of particular race/ethnicity enrolled on the child count date;
- At least 75 students of all other race/ethnicities enrolled in the district on child count date;
- At least 10 students with disabilities of particular race/ethnicity and disability enrolled in district on the child count date; and
- Either:
  - Both the relative risk ratio and weighted relative risk ratio for any race/ethnic group is 4.0 or higher; or
  - All students with disabilities in a specific disability category are of only one race/ethnic group regardless of the size of the relative risk ratio and weighted relative risk ratio.

In the calculation of disproportionate representation, NYSED does not remove districts from the numerator or denominator, but rather calculates the disproportionality based on all districts. Then, districts that do not have at least 75 students with disabilities overall are removed from identification.

The application of the 75 student minimum criteria did not result in any districts being removed from identification and had no effect on the numerator. Of the 116 districts that had less than 75 students with disabilities, none of these 116 districts would have met the definition of disproportionate representation.

### Data Source:

Data on students' race/ethnicity and special education classification are collected through the Student Information Repository System (SIRS) at an individual student level. Results of self-review monitoring protocols are submitted by school districts through the PD web-based data collection system.

NYS uses data collected and reported to the United States Department of Education (USDOE) in the annual 618 report on Table 1 of Information Collection 1820-0043 (Report of Children with Disabilities Receiving Special Education Under Part B of the Individuals with Disabilities Education Act (IDEA), as amended) and the State's analysis to determine if the disproportionate representation of racial and ethnic groups in specific disability categories was the result of inappropriate identification. These data are also provided to USDOE in the corresponding ED*Facts* files.

The method to calculate disproportionate representation is provided below:

#### Step One:

NYS compares the percent of total enrollment of each race/ethnic group identified by particular disabilities to percent of total enrollment of other race/ethnic groups combined. For identification of school districts since the 2005-06 school year, the State has used the following definition of "disproportionate representation" and in subsequent years may revise the definition by lowering the relative risk ratio, weighted relative risk ratio, and the minimum numbers of students. The State's definition of significant disproportionality is the same as its definition of disproportionality.

NYS uses the relative risk and weighted relative risk ratios with minimum "n" sizes to identify school districts whose data indicate disproportionate representation of racial and ethnic groups in specific disability categories of Emotional Disturbance, Learning Disability, Intellectual Disability, Other Health Impairment, Speech or Language Impairment and Autism. See the definition of "Disproportionate Representation and Methodology" described below.

#### Step Two:

The State provides for the review of policies, procedures and practices each year a school district's data shows a disproportionate representation based on race/ethnicity in the disability category of students with disabilities as follows:

- The first year a district's data indicates disproportionality, the State requires the district to complete a State-developed self-review monitoring protocol, which requires the review of specific policies, practices and procedures to determine whether the disproportionate representation was the result of inappropriate identification. The monitoring protocol for this review is available at <http://www.p12.nysed.gov/specialed/spp/indicators/10.htm>. A report of the results of this review is submitted by the district to the State. At the time of submission, school districts that identify issues of noncompliance are immediately notified through written findings of noncompliance that they must correct all issues of noncompliance immediately, but not later than the prescribed due date in the district's notification (always within one year).
- For subsequent years in which a school district's data indicates significant discrepancies, the State conducts the monitoring review of the district's policies, procedures and practices as identified above.

#### Step Three:

When calculating the results for this indicator, the State divides the number of school districts with disproportionate representation and inappropriate policies, procedures and/or practices by the total number of school districts in the State.

### Actions required in FFY 2014 response

none

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

Note: Any actions required in last year's response that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

**Correction of Findings of Noncompliance Identified in FFY 2014**

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
21	21	0	0

**FFY 2014 Findings of Noncompliance Verified as Corrected**

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

The State verified that the school district is correctly implementing the regulatory requirements based on a review of revised policies, procedures and practices relating to individual evaluations and/or the eligibility determination process, as applicable, and upon a review of a sample of student records to verify compliance, consistent with Office of Special Education Programs (OSEP) Memo 09-02.

*Describe how the State verified that each individual case of noncompliance was corrected*

All individual student cases have been verified as corrected. To verify the correction of noncompliance the State verified through record reviews that the district had corrected each individual case of noncompliance, unless the child was no longer within the jurisdiction of the district, consistent with Office of Special Education Programs (OSEP) Memo 09-02.

**FFY 2010 Findings Not Yet Verified as Corrected**

*Actions taken if noncompliance not corrected*

Two findings of noncompliance remain uncorrected from one school district. The district was identified as a District in Need of Intervention for the 2015-16 school year and special conditions were placed on their use of IDEA funds. The State completed a coordinated monitoring visit that involved several offices within the NYSED with general supervision responsibility which resulted in an action plan that required the district take immediate action on specific issues. The action plan required the district to appoint a director of special education and develop written policies, procedures and practices that hold individuals in the district accountable for compliant practices.

**OSEP Response**

Because the State reported less than 100% compliance for FFY 2015 (greater than 0% actual target data for this indicator), the State must report on the status of correction of noncompliance identified in FFY 2015 for this indicator. The State must demonstrate, in the FFY 2016 SPP/APR, that the 3 districts identified in FFY 2015 with disproportionate representation of racial and ethnic groups in specific disability categories that was the result of inappropriate identification are in compliance with the requirements in 34 CFR §§300.111, 300.201, and 300.301 through 300.311.

If the State did not identify any findings of noncompliance in FFY 2015, although its FFY 2015 data reflect less than 100% compliance (greater than 0% actual target data for this indicator), provide an explanation of why the State did not identify any findings of noncompliance in FFY 2015.

Further, the State must demonstrate, in the FFY 2016 SPP/APR, that the remaining 2 districts identified in FFY 2010 with disproportionate representation of racial and ethnic groups in specific disability categories that was the result of inappropriate identification, are in compliance with the requirements in 34 CFR §§300.111, 300.201, and 300.301 through 300.311. In demonstrating the correction of the noncompliance identified in FFY 2010, the State must report, in the FFY 2016 SPP/APR, that the State verified that each district with noncompliance: (1) is correctly implementing the specific regulatory requirement(s) (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the district, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

**Required Actions**

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)  
Indicator 11: Child Find**

Monitoring Priority: Effective General Supervision Part B / Child Find

Compliance indicator: Percent of children who were evaluated within 60 days of receiving parental consent for initial evaluation or, if the State establishes a timeframe within which the evaluation must be conducted, within that timeframe.

(20 U.S.C. 1416(a)(3)(B))

**Historical Data**

Baseline Data: 2005

FFY	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014

(a) Number of children for whom parental consent to evaluate was received	(b) Number of children whose evaluations were completed within 60 days (or State-established timeline)	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
14,614	12,174	83.84%	100%	83.30%

Number of children included in (a), but not included in (b) [a-b]	2,440
---	-------

Account for children included in (a) but not included in (b). Indicate the range of days beyond the timeline when the evaluation was completed and any reasons for the delays.

There are 2,440 students in (a) and not in (b) of the following table. These are students for whom evaluations were not completed within State-established timelines for reasons which are not in compliance with State requirements. The chart below provides information regarding the extent of delays and reasons for not completing the initial evaluations of children within the State-established timelines.

Reasons for Delays, FFY 2015	Number of Children by Number of Days of Delay in Completing Evaluations, FFY 2015				Total	Percent of Total
	1-10	11-20	21-30	Over 30		
An approved evaluator was not available to provide a timely evaluation.	325	185	98	180	788	32.3%

Delays in scheduling CPSE or CSE meetings.	127	134	82	367	710	29.1%
Total	674	516	324	926	2440	
Percent of Total	27.6%	21.1%	13.3%	38.0%		100%

**Indicate the evaluation timeline used**

- The State used the 60 day timeframe within which the evaluation must be conducted.
- The State established a timeline within which the evaluation must be conducted.

**What is the source of the data provided for this indicator?**

- State monitoring
- State database that includes data for the entire reporting year

**Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.**

The State provides assurance that it is using its previously approved sampling methodology and only changed the years for which it is used.

NYSED collects individual student data through SIRS. School districts report specific dates when special education events occur, such as the date of referral, date of written parent consent for an initial individual evaluation and the date of the Committee on Preschool Special Education (CPSE) or Committee on Special Education (CSE) meeting to discuss evaluation results. The State does not have an event for the date the evaluation is completed. Therefore, for purposes of monitoring for this indicator, districts report the date the CPSE or CSE meeting is held to discuss the evaluation results. If the number of days exceeds the State-established timelines, reasons for delays are collected. Some reasons are considered to be in compliance with State requirements and other reasons are not in compliance. If the district has documentation that shows that the evaluation was completed within 60 calendar days from parental consent, but the meeting to discuss the evaluation results was delayed, the district is determined to have timely evaluated such students. However, absent such documentation, the district is reported as having untimely evaluations.

**Provide additional information about this indicator (optional)**

Identification of noncompliance: Each year a school district has data indicating one or more students did not receive their evaluations within the required timeline, the State identifies the school district with (1) noncompliance with section 200.4(b) for timely evaluations of school-age students; and/or (2) noncompliance with section 200.16(c)(2) for timely evaluations of preschool children. Correction of noncompliance is not verified unless the State determines that (1) each student whose evaluation was not timely administered has subsequently received his/her evaluation and (2) based on a sample of records, the district is now timely evaluating all students.

In the State's annual monitoring of New York City, the State sends notification to the district each year citing noncompliance if all students did not receive their initial evaluations on time. The State verifies every year that each student has subsequently received his/her evaluation (individual student correction of noncompliance). However, the State has not been able to verify every year that the district is timely evaluating all students. In the 2012 Annual Performance Report, the State reported findings not yet corrected for all students (see Correction of Findings of Noncompliance Identified Prior to FFY 2013). Beginning with the FFY 2014 Annual Performance Report, if the State cannot verify the correction of noncompliance for all students, it will report this noncompliance in the current year only, as it is a continuation of the same systemic noncompliance that was identified prior to FFY 2014. Therefore, the findings of noncompliance for Prior to FFY 2014 have been changed to 0.

NYSED has accessed, and will continue to access, guidance from OSEP through its engagement in the Differentiated Monitoring and Support process, on ways to improve results for Indicator 11 .

New York has two findings of noncompliance from FFY 2012 that are not identified as being corrected in GRADS for FFY 2015. The findings identified as corrected for FFY 2012 should be two, but are shown as "null". OSEP provided the following response in New York's FFY 2014 SPP/APR:

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

*"In addition, the State must demonstrate, in the FFY 2015 SPP/APR, that the remaining two uncorrected findings of noncompliance identified in FFY 2012 were corrected. When reporting on the correction of noncompliance, the State must report in the FFY 2015 SPP/APR, that it has verified that each LEA with findings of noncompliance identified in FFY 2014 and each LEA with remaining noncompliance identified in FFY 2012: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2015 SPP/APR, the State must describe the specific actions that were taken to verify the correction."*

New York's response is as follows:

**Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements**

NYS has verified that each LEA with noncompliance identified in FFY 2012 for this indicator: (1) is correctly implementing 34 CFR §300.301(c)(1) (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) has completed the evaluation, although late, for any child whose initial evaluation was not timely, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02.

The State verified the correction of noncompliance by requiring submission of the specific date that the individual evaluation was completed, although late, for each individual student whose evaluation was not timely. To verify the correction of noncompliance for all students through the review of subsequent data demonstrating compliance, the districts were required to report to the State the percent of students who had a timely evaluation over a specified period of time. See <http://www.p12.nysed.gov/sedcar/forms/vr/1213/html/verif11.htm>. For NYC, the State verifies the correction of noncompliance through annual monitoring. For NYC, the State has verified that all individual students who continued to reside in the jurisdiction of the LEA and who did not have timely evaluations have subsequently received their evaluations.

**Describe how the State verified that each individual case of noncompliance was corrected**

To verify the correction of noncompliance for all students through the review of subsequent data demonstrating compliance, the districts were required to report to the State the percent of students who had a timely evaluation over a specified period of time and identify the date in which the evaluation for each student was completed. See <http://www.p12.nysed.gov/sedcar/forms/vr/1213/html/verif11.htm>.

**Actions required in FFY 2014 response**

none

Note: Any actions required in last year's response that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

**Correction of Findings of Noncompliance Identified in FFY 2014**

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
55	52	3	0

**FFY 2014 Findings of Noncompliance Verified as Corrected**

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

NYS has verified that each LEA with noncompliance identified in FFY 2014 for this indicator: (1) is correctly implementing 34 CFR §300.301(c)(1) (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) has completed the evaluation, although late, for any child whose initial evaluation was not timely, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02.

The State verified the correction of noncompliance by requiring submission of the specific date that the individual evaluation was completed, although late, for each individual student whose evaluation was not timely. To verify the correction of noncompliance for all students through the review of subsequent data demonstrating compliance, the districts were required to report to the State the percent of students who had a timely evaluation over a specified period of time. See <http://www.p12.nysed.gov/sedcar/forms/vr/1415/html/verif11.htm>. For NYC, the State verifies the correction of noncompliance through annual monitoring. For NYC, the State has verified that all individual students who continued to reside in the jurisdiction of the LEA and who did not have timely evaluations have subsequently received their evaluations. The district, however, has outstanding systemic noncompliance that has not yet been verified as corrected from prior years.

*Describe how the State verified that each individual case of noncompliance was corrected*

To verify the correction of noncompliance for all students through the review of subsequent data demonstrating compliance, the districts were required to report to the State the percent of students who had a timely evaluation over a specified period of time and identify the

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

date in which the evaluation for each student was completed. See:

<http://www.p12.nysed.gov/sedcar/forms/vr/1415/html/verif11.htm>.

### Explanation of Alternate Data

Data was revised due to a typographical error.

### FFY 2012 Findings of Noncompliance Verified as Corrected

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

NYSED has verified that each LEA with noncompliance identified in FFY 2012 for this indicator: (1) is correctly implementing 34 CFR §300.301(c)(1) (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) has completed the evaluation, although late, for any child whose initial evaluation was not timely, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02.

The State verified the correction of noncompliance by requiring submission of the specific date that the individual evaluation was completed, although late, for each individual student whose evaluation was not timely. To verify the correction of noncompliance for all students through the review of subsequent data demonstrating compliance, the districts were required to report to the State the percent of students who had a timely evaluation over a specified period of time. See:

<http://www.p12.nysed.gov/sedcar/forms/vr/1213/html/verif11.htm>.

For New York City, the State verifies the correction of noncompliance through annual monitoring. The State verified that all individual students who continued to reside in the jurisdiction of the LEA and who did not have timely evaluations have subsequently received their evaluations.

*Describe how the State verified that each individual case of noncompliance was corrected*

To verify the correction of noncompliance for all students through the review of subsequent data demonstrating compliance, the districts were required to report to the State the percent of students who had a timely evaluation over a specified period of time and identify the date in which the evaluation for each student was completed. See:

<http://www.p12.nysed.gov/sedcar/forms/vr/1213/html/verif11.htm>.

### OSEP Response

Because the State reported less than 100% compliance for FFY 2015, the State must report on the status of correction of noncompliance identified in FFY 2015 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2016SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2015 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2015, although its FFY 2015 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2015.

### Required Actions

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**  
**Indicator 12: Early Childhood Transition**

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Compliance indicator: Percent of children referred by Part C prior to age 3, who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays.

(20 U.S.C. 1416(a)(3)(B))

**Historical Data**

Baseline Data: 2014

FFY	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
Target			100%	100%	100%	100%	100%	100%	100%	100%	100%
Data		86.50%	73.80%	78.20%	74.75%	64.50%	70.30%	87.50%	82.40%	97.00%	75.26%

Key:  Gray – Data Prior to Baseline  Yellow – Baseline

**FFY 2015 - FFY 2018 Targets**

FFY	2015	2016	2017	2018
Target	100%	100%	100%	100%

**FFY 2015 SPP/APR Data**

a. Number of children who have been served in Part C and referred to Part B for Part B eligibility determination.	2,172
b. Number of those referred determined to be NOT eligible and whose eligibility was determined prior to third birthday.	125
c. Number of those found eligible who have an IEP developed and implemented by their third birthdays.	165
d. Number for whom parent refusals to provide consent caused delays in evaluation or initial services or to whom exceptions under 34 CFR §300.301(d) applied.	1,788
e. Number of children who were referred to Part C less than 90 days before their third birthdays.	14

	Numerator (c)	Denominator (a-b-d-e)	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
Percent of children referred by Part C prior to age 3 who are found eligible for Part B, and who have an IEP developed and implemented by their third birthdays. $[c/(a-b-d-e)] \times 100$	165	245	75.26%	100%	67.35%

Number of children who have been served in Part C and referred to Part B for eligibility determination that are not included in b, c, d, e	80
--	----

**Explanation of Slippage**

The number of children who have been served in Part C and referred to Part B for eligibility determination (that are not included in b, c, d, e) decreased from 75.26 percent in FFY 2014 to 67.35 percent in FFY 2015. This is equal to 80 children and represents less than 3 percent of the 2,717 referrals (2.9 percent). The slippage is due to the smaller denominator, rather than an increase in the number of instances of noncompliance. The smaller denominator is the result of an increase in the number of parent refusals to provide consent that caused delays in evaluations or initial services, or to whom exceptions under 34 CFR §300.301(d) applied (1,544 in FFY 2014 to 1,788 in FFY 2015).

A New York State (NYS) public health law allows parents, in certain circumstances, to keep their children in early intervention services beyond the third birthday (see additional information). This practice negatively affects New York State's data as calculated by OSEP.

In FFY 2015, there were 1,303 students who fell under this provision and whose parents chose to have them continue in Part C, Early Intervention (EI). At the direction of USDOE, the FFY 2014 has been established as a new baseline that reports 1,153 children whose parents opted to continue receiving Part C services in line d rather than line c. Had NYS been authorized to count as compliant the 1,303 students who continued to get special education programs and services in EI beyond their third birthday, consistent with its unique statute, its compliance rate would have been 94.8 percent.

Account for children included in (a), but not included in b, c, d, or e. Indicate the range of days beyond the third birthday when eligibility was determined and the IEP developed, and the reasons for the delays.

There are 80 students in (a) that are not included in b, c, d, or e in the following table. These are students for whom evaluations were not

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

completed within State-established timelines for reasons which are not in compliance with State requirements. The chart below provides information regarding the extent of delays and reasons for not completing the initial evaluations of children within the State-established timelines.

Reasons for Delays, FFY 2015	Number of Children by Number of Days of Delay in Developing an IEP by Third Birthday or Determining Eligibility for Preschool Special Education in FFY 2015					Total	Percent of Total
	1-10	11-20	21-30	Over 30	Unknown

What is the source of the data provided for this indicator?

- State monitoring
- State database that includes data for the entire reporting year

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

The State provides assurance that it is using its currently approved sampling plan and will only change the years for which it is used.

NYS collects data for this indicator via the Student Information Repository System (SIRS) and verifies these data by displaying them in a VR12 report, which was developed in the PD Data System. SIRS is NYS's individual student data reporting system. School districts report the date of referral, date of written parent consent for an initial evaluation, date of the CPSE meeting to determine eligibility and date the IEP is implemented. Reasons for delays are collected for children whose eligibility determination is not made or whose IEPs are not implemented by their third birthday or in compliance with State requirements. Each school district's compliance rate is calculated.

 Provide additional information about this indicator (optional)

New York State (NYS) Public Health Law, section 2541(8)(a) provides that a child's eligibility for EI services ends as of his or her third birthday, unless the child has been referred to the Committee on Preschool Special Education (CPSE) and found eligible for preschool special education services before his or her third birthday. Under these provisions, parents may elect to either transition the child to preschool special education or continue their child in early intervention programming beyond the third birthday until either September or January, according to the following rules: (1) If the child turns three years of age on or before the thirty-first day of August, the child shall, if requested by the parent, be eligible to receive early intervention services contained in an Individualized Family Service Plan (IFSP) until the first day of September of that calendar year; or, (2) If the child turns three years of age on or after the first day of September, the child shall, if requested by the parent and if already receiving EI services, be eligible to continue receiving such services until the second day of January of the following calendar year. When the parent elects to continue in EI under these provisions, the CPSE would write the IEP and indicate the starting date for special education services as of September or January, respectively. In no cases may the child receive EI and preschool special education services simultaneously.

In FFY 2015, there were 1,303 students who fell under this provision and whose parents chose to have them continue in Part C, Early Intervention. At the direction of USDOE, the FFY 2014 has been established as a new baseline that reports 1,153 children whose parents opted to continue receiving Part C services in line d rather than line c.

NYSED's FFY 2015 data for Indicator 12 is adversely impacted as a direct result of NYS's unique statute. Consistent with NYS Public Health Law section 2541(8)(a), for a child already receiving IDEA Part C Early Intervention (EI) services, parents have the option to continue their child's special education services through the Part C IDEA (EI program) beyond their third birthday. Under this option, in FFY 2015, a significant number (1,303) of NYS's preschool age students continued to receive their special education programs and services through IDEA (Part C) EI programs. NYSED significantly values parental choice and believes it is important to support parents should they choose this option. The primary tenets of good transition planning are to ensure students continue to receive services as appropriate to meet their needs and that the transition process is successful for families. Supporting parents in this choice fosters a successful transition for them, as well as ensures that their child continues to receive special education services through Part C IDEA services to address specific needs.

**Actions required in FFY 2014 response**

none

Note: Any actions required in last year's response that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

**FFY 2014 Findings of Noncompliance Verified as Corrected**

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

For all noncompliance identified in FFY 2014 that has been corrected, NYS has verified that each LEA with noncompliance identified for this Indicator: (1) is correctly implementing 34 CFR §300.124(b) (i.e., achieved 100 percent compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has developed and implemented the IEP, although late, for any child for whom implementation of the IEP was not timely, unless the child was no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02.

To verify the correction of noncompliance for all students through the review of subsequent data demonstrating compliance, the districts were required to report to the State the percent of students who had a timely evaluation over a specified period of time. See

*Describe how the State verified that each individual case of noncompliance was corrected*

For all noncompliance identified in FFY 2014 that has been corrected, NYS has verified that each LEA with noncompliance identified for this indicator: (1) is correctly implementing 34 CFR §300.124(b) (i.e., achieved 100 percent compliance) based on a review of updated data, such as data subsequently collected through on-site monitoring or a State data system; and (2) has developed and implemented the IEP, although late, for any child for whom implementation of the IEP was not timely, unless the child was no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02.

The State verified the correction of noncompliance by requiring submission of the specific date that the student's IEP was implemented, although late, for each individual student whose IEP implementation was not timely.

**OSEP Response**

The State indicated that "A New York State (NYS) public health law allows parents, in certain circumstances, to keep their children in early intervention services beyond the third birthday (see additional information). This practice negatively affects New York State's data as calculated by OSEP. In FFY 2015, there were 1,303 students who fell under this provision and whose parents chose to have them continue in Part C, Early Intervention (EI). At the direction of USDOE, the FFY 2014 has been established as a new baseline that reports 1,153 children whose parents opted to continue receiving Part C services in line d rather than line c. Had NYS been authorized to count as compliant the 1,303 students who continued to get special education programs and services in EI beyond their third birthday, consistent with its unique statute, its compliance rate would have been 94.8 percent."

The question of how States with an extended option policy under 34 CFR §303.211 or a similar State option are able to account for data under this indicator is currently under consideration as part of the Part B SPP/APR Information Collection, which is in the process of being finalized. As such, OSEP will consider the State's alternate calculation of 94.83% for this year for the purpose of calculating the State's compliance data in the RDA Matrix.

Because the State reported less than 100% compliance for FFY 2015, the State must report on the status of correction of noncompliance identified in FFY 2015 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2016 SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2015 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2015, although its FFY 2015 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2015.

**Required Actions**

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)  
Indicator 13: Secondary Transition**

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Compliance indicator: Percent of youth with IEPs aged 16 and above with an IEP that includes appropriate measurable postsecondary goals that are annually updated and based upon an age appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those postsecondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the IEP Team meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the IEP Team meeting with the prior consent of the parent or student who has reached the age of majority.

(20 U.S.C. 1416(a)(3)(B))

**Historical Data**

Baseline Data: 2009

FFY	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014

**FFY 2015 - FFY 2018 Targets**

FFY	2015	2016	2017	2018
Target	100%	100%	100%	100%

**FFY 2015 SPP/APR Data**

Number of youth aged 16 and above with IEPs that contain each of the required components for secondary transition	Number of youth with IEPs aged 16 and above	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
2,409	3,149	78.29%	100%	76.50%

**Explanation of Slippage**

Slippage varied regionally across the state. For example, the largest Big Five district, New York City, showed a decrease in compliance from 66 percent to 63 percent, while the second largest Big Five district reported substantial improvement from the first year it was included in the sample for this indicator, FFY 2009 (27 percent), until it reported again in FFY 2015 (93 percent).

NYSED engaged in a root cause analysis of its Indicator 13 results and identified the following challenges for districts which may have resulted in slippage:

- Districts in New York State are required to report on Indicator 13 once every six years, with the exception of New York City, which reports each year on 100 randomly selected IEPs. Many districts do not utilize technical assistance until the year that they are required to report, which doesn't allow them the time needed to make the necessary systemic changes before reporting. There is a need for focus on quality IEP development, not just compliance during the reporting year. The six-year reporting cycle also makes it difficult for NYSED to compare the year-to-year performance of districts.
- Turnover of Committee on Special Education chairpersons and district administrators, including directors of special education, throughout the State makes it difficult for districts to maintain consistent procedures and messages.

What is the source of the data provided for this indicator?

- State monitoring
- State database that includes data for the entire reporting year

Describe the method used to collect these data, and if data are from the State's monitoring, describe the procedures used to collect these data.

**Measurement:**

Percent = [(# of youth with IEPs aged 15 and above with an IEP that includes appropriate measurable post-secondary goals that are annually updated and based upon an age-appropriate transition assessment, transition services, including courses of study, that will reasonably enable the student to meet those post-secondary goals, and annual IEP goals related to the student's transition services needs. There also must be evidence that the student was invited to the CSE meeting where transition services are to be discussed and evidence that, if appropriate, a representative of any participating agency was invited to the CSE meeting with the prior consent of the parent or student who has reached the age of majority) divided by the (# of youth with an IEP age 15 and above)] times 100.

Data Source:

NYS will use data taken from State monitoring, as described below.

**Overview of Issue/Description of System or Process**

State law and regulations define transition services to mean a coordinated set of activities for a student with a disability, designed within a results-oriented process that is focused on improving the academic and functional achievement of the student with a disability to facilitate the student's movement from school to post-school activities, including, but not limited to, post-secondary education, vocational education, integrated competitive employment (including supported employment), continuing and adult education, adult services, independent living, or community participation. The coordinated set of activities must be based on the individual student's needs, taking into account the student's strengths, preferences and interests, and must include needed activities in instruction; related services; community experiences; the development of employment and other post-school adult living objectives; and when appropriate, acquisition of daily living skills and functional vocational evaluation.

When the purpose of an IEP meeting is to consider transition services, the meeting notice must indicate this purpose, indicate that the school district/agency will invite the student to participate in the meeting, and identify any other agency that will be invited to send a representative.

In NYS, transition services must be in a student's IEP beginning not later than the first IEP to be in effect when the student is age 15 (and at a younger age, if determined appropriate) and updated annually. The IEP must, under the applicable components of the student's IEP, include:

- under the student's present levels of performance, a statement of the student's needs, taking into account the student's strengths, preferences and interests, as they relate to transition from school to post-school activities;
- appropriate measurable post-secondary goals based upon age appropriate transition assessments relating to training, education, employment and, where appropriate, independent living skills;
- annual IEP goals related to the student's transition services needs;
- statement of the transition service needs of the student that focuses on the student's courses of study, such as participation in advanced placement courses or a vocational education program;
- needed activities to facilitate the student's movement from school to post-school activities, including instruction, related services, community experiences, the development of employment and other post-school adult living objectives and, when appropriate, acquisition of daily living skills and functional vocational evaluation; and
- a statement of the responsibilities of the school district and, when applicable, participating agencies for the provision of such services and activities that promote movement from school to post-school opportunities, or both, before the student leaves the school setting.

**Sampling Methodology**

The State provides assurance that it is using its currently approved sampling methodology and only changing the years for which it will be used.

**IEP Monitoring Review Process**

NYSED has developed an "IEP/Transition Self-Review" monitoring protocol to be used each year in monitoring districts for this Indicator. The school districts selected for the representative sample are directed to complete the "Transition IEP" self-review monitoring protocol on a representative sample of IEPs and document results on a form prescribed by NYSED. The form requires documentation of the percent of students whose IEPs met each of the compliance requirements on the monitoring protocol. See <http://www.p12.nysed.gov/specialed/spp/13selfreview-Oct2012.htm>.

Districts are directed to complete and enter data on their IEP reviews by August 31. NYSED arranges for random verification reviews of reported data in school districts in each Special Education Quality Assurance (SEQA) region. All school districts identified through the self-review or verification process as not having IEPs that include appropriate documentation of post-secondary goals and transition services on a student's IEP will be directed to correct the noncompliance immediately, but not later than the prescribed due date in the district's notification (always within one year).

The review of IEPs required a determination as to whether the IEPs in the sample selected included specific transition content information and whether the content of the IEP would reasonably enable the student to meet measurable post-secondary goals. A qualitative review of the IEPs around the following eight components was conducted:

- Students actively participate in planning their educational programs leading toward achievement of post-secondary goals.
- IEPs are individualized and are based on the assessment information about the students, including individual needs, preferences, interests and strengths of the students.
- Transition needs identified in the students' assessment information are included in the students' present levels of performance.
- Annual goals address students' transition needs identified in the present levels of performance and are calculated to help each student progress incrementally toward the attainment of the post-secondary goals.
- The recommended special education programs and services will assist the students to meet their annual goals relating to transition.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

- The statements of needed transition services are developed in consideration of the students' needs, preferences and interests, are directly related to the students' goals beyond secondary education and will assist the students to reach their post-secondary goals.
- Courses are linked to attainment of the students' post-secondary goals.
- The school district and appropriate participating agencies coordinate their activities in support of the students' attainment of post-secondary goals.

Provide additional information about this indicator (optional)

All 105 school districts in the sample used a State-developed self-review monitoring protocol to review a sample of IEPs of students with disabilities aged 15 and above to determine if each IEP is in compliance with all transition planning requirements. The self-review monitoring protocol is posted at <http://www.p12.nysed.gov/specialed/spp/13selfreview-Oct2012.htm>.

For NYC reviews, NYSED and NYC Department of Education staff jointly conducted the monitoring review. The total number of students with IEPs, ages 15-21, enrolled in the school districts sampled during 2015-16 was 61,505. The total number of IEPs reviewed from these representative school districts was 3,149. Of the IEPs reviewed, 2,409 were found to have been in compliance with all IEP transition requirements and 740 had one or more transition planning requirements that were not appropriately addressed in the students' IEPs.

NYSED has accessed, and will continue to access, guidance from OSEP through its engagement in the Differentiated Monitoring and Support process, on ways to improve results for Indicator 13. NYSED is aligning its technical assistance resources to better support districts in the transition process and will engage OSEP for support in this endeavor.

**Actions required in FFY 2014 response**

none

Note: Any actions required in last year's response that are related to correction of findings should be responded to on the "Correction of Previous Findings of Noncompliance" page of this indicator. If your State's only actions required in last year's response are related to findings of noncompliance, a text field will not be displayed on this page.

**Correction of Findings of Noncompliance Identified in FFY 2014**

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
90	90	0	0

**FFY 2014 Findings of Noncompliance Verified as Corrected**

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

The State verified that each LEA with noncompliance identified in FFY 2014 for this Indicator is correctly implementing 34 CFR §§300.320(b) and 300.321(b) (i.e., achieved 100 percent compliance) based on a review of a sample of student individualized education programs (IEPs) and related records.

For NYC, the State verified correction based on a review of updated data collected annually based on review of transition components of IEPs and related documentation.

*Describe how the State verified that each individual case of noncompliance was corrected*

The State verified correction of noncompliance by reviewing individual student records, including records of individual students whose IEPs were identified as noncompliant.

**FFY 2012 Findings of Noncompliance Verified as Corrected**

*Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements*

The State verified that each LEA with noncompliance identified in FFY 2012 for this Indicator is correctly implementing 34 CFR §§300.320(b) and 300.321(b) (i.e., achieved 100 percent compliance) based on a review of a sample of student individualized education programs (IEPs) and related records.

*Describe how the State verified that each individual case of noncompliance was corrected*

The State verified correction of noncompliance by reviewing individual student records, including records of individual students whose

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

IEPs were identified as noncompliant.

**OSEP Response**

Because the State reported less than 100% compliance for FFY 2015, the State must report on the status of correction of noncompliance identified in FFY 2015 for this indicator. When reporting on the correction of noncompliance, the State must report, in the FFY 2016SPP/APR, that it has verified that each LEA with noncompliance identified in FFY 2015 for this indicator: (1) is correctly implementing the specific regulatory requirements (i.e., achieved 100% compliance) based on a review of updated data such as data subsequently collected through on-site monitoring or a State data system; and (2) has corrected each individual case of noncompliance, unless the child is no longer within the jurisdiction of the LEA, consistent with OSEP Memo 09-02. In the FFY 2016 SPP/APR, the State must describe the specific actions that were taken to verify the correction.

If the State did not identify any findings of noncompliance in FFY 2015, although its FFY 2015 data reflect less than 100% compliance, provide an explanation of why the State did not identify any findings of noncompliance in FFY 2015.

**Required Actions**

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)  
Indicator 14: Post-School Outcomes**

Monitoring Priority: Effective General Supervision Part B / Effective Transition

Results indicator: Percent of youth who are no longer in secondary school, had IEPs in effect at the time they left school, and were:

- A. Enrolled in higher education within one year of leaving high school.
- B. Enrolled in higher education or competitively employed within one year of leaving high school.
- C. Enrolled in higher education or in some other postsecondary education or training program; or competitively employed or in some other employment within one year of leaving high school.

**Targets: Description of Stakeholder Input** - Please see the Stakeholder Involvement section of the [introduction](#).

Enter additional information about stakeholder involvement

An internal workgroup analyzed historical targets and actual data to create proposed FFY 2013- FFY 2018 targets. The draft targets were shared with the State's Commissioner's Advisory Panel for Special Education, which is the IDEA State Advisory Panel, at one of its meetings. Discussions in target setting included a review of historical trends and the State's new policies that are expected to engage students to remain in school including, but not limited to, the Skills and Achievement Commencement Credential; the Career Development and Occupational Studies (CDOS) Commencement Credential; initiatives to increase student access to Career and Technical Education courses and work-based learning; and alternative pathways to a regular high school diploma. It was also recommended that targets consider the anticipated positive impact on employment related to the Adult Career and Continuing Education Services - Vocational Rehabilitation's (ACCES-VR's) newly formed Transition Unit. Final targets were determined following this annual meeting in consideration of stakeholder comments.

**FFY 2015 SPP/APR Data**

Number of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school	1371.00
1. Number of respondent youth who enrolled in higher education within one year of leaving high school	559.00
2. Number of respondent youth who competitively employed within one year of leaving high school	363.00
3. Number of respondent youth enrolled in some other postsecondary education or training program within one year of leaving high school (but not enrolled in higher education or competitively employed)	92.00
4. Number of respondent youth who are in some other employment within one year of leaving high school (but not enrolled in higher education, some other postsecondary education or training program, or competitively employed).	52.00

	Number of respondent youth	Number of respondent youth who are no longer in secondary school and had IEPs in effect at the time they left school	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

**Explanation of A Slippage**

While the FFY 2015 data for measurement A showed slippage from the FFY 2014 data, the State exceeded its targets for measurements B and C. The decrease in measurement A from FFY 2014 to FFY 2015 was consistent among need resource categories, with the exception of rural high need districts, which showed improvement from 23 percent in FFY 2014 to 30 percent in FFY 2015.

The response rates among drop outs significantly increased compared to FFY 2014 and contributed to the decrease in each of the measurements. Drop outs accounted for 23.9 % of the FFY 2015 survey pool representation (5.9% over-representation). In FFY 2014, only 9.2% of the FFY 2014 survey pool were drop outs (a 9.2% under-representation).

Was sampling used? Yes

Has your previously-approved sampling plan changed? No

Describe the sampling methodology outlining how the design will yield valid and reliable estimates.

The State provides assurance that it is using its currently approved sampling methodology and only changing the years in which it is used.

Provide additional information about this indicator (optional)

**Data Source:**

New York State (NYS) continues to use a contractor to collect data for this indicator. The current contractor is Potsdam Institute for Applied Research at the State University of New York in Potsdam, NY. When possible, interviews with each identified Exiter were conducted by telephone, but the survey was also available on the web and in hard copy by mail. See <http://www.p12.nysed.gov/specialed/spp/2012/ind14.htm>.

**Definitions:**

**Exiters** are defined to include those students with disabilities who had IEPs and who completed the high school program with any diploma or certificate of completion (i.e., Regents or local diploma, CDOS Commencement Credential, General Educational Development (GED) diploma), who completed school by reaching the maximum age to attend special education, or those who dropped out during the academic year being reviewed.

**Survey pool** is the total number of Exiters from the school districts surveyed in FFY 2014.

**Response pool** means those students from the survey pool who were able to be reached for an interview or who completed the written survey at least one year after leaving school.

**Enrolled in higher education** means youth have been enrolled on a full- or part-time basis in a community college (two-year program) or college/university (four or more year program) for at least one complete term, at any time in the year since leaving high school.

**Competitive employment** means that youth have worked for pay at or above the State's minimum wage in a setting with others who are nondisabled for a period of 20 hours a week for at least 90 days at any time in the year since leaving high school. This includes military employment.

**Enrolled in other postsecondary education or training** means youth have been enrolled on a full- or part-time basis for at least one complete term at any time in the year since leaving high school in an education or training program (e.g., Job Corps; adult education; workforce development program; adult rehabilitation service programs; or other). Part-time is defined differently depending on the standard for the postsecondary school program. For colleges, part-time course loads are typically defined as nine credit hours or fewer per semester. Each person interviewed responds based on their understanding of what constitutes full- or part-time for the institution or program they are attending. Interviewers are trained to provide guidance if requested or needed. Enrolled in other postsecondary education or training also includes enrollment on a full- or part-time basis for at least one complete term in a vocational technical school that is less than a two-year program at any time of the year since leaving high school.

**Some other employment** means youth have worked for pay or been self-employed for a period of at least 90 days at any time in the year

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

since leaving high school. This includes working in a family business (e.g., farm, store, fishing, ranching, catering services, etc.).

**Sampling Methodology:**

Data was collected from a statewide representative sample of school districts. One-sixth of the school districts reported data on this indicator for FFY 2014. For a detailed description of NYS' sampling methodology, see <http://www.p12.nysed.gov/specialed/spp/2012/ind14.htm>.

The response group is representative of FFY 2015 statewide exiters. With the exception of drop outs, each subgroup has a representation that is within 2 percent of the statewide exiter population for that subgroup. The number of drop outs in the response group was overrepresented by 5.9 percent. There is a 95 percent confidence interval for Indicator 14 in FFY 2015.

Table 1: Representativeness of Survey Pool Compared to Exiters for All NYS

Schools During 2014-15, as reported in VR10 Data Reports

Statewide Demographic Representativeness

Statewide	Learning Disabilities	Emotional Disabilities	Intellectual Disabilities	All Other Disabilities	Female	Minority	Dropout
Census Representation (n = 25,448)	53.4%	8.8%	4.3%	33.5%	37.1%	52.5%	17.8%
Survey Pool Representation (n=4,008)	54.6%	10.4%	3.8%	31.1%	39.1%	51.7%	23.7%
Difference	1.2%	1.6%	-0.5%	-2.4%	2.0%	-0.8%	5.9%

*Note: Positive difference indicates overrepresentation; negative difference indicates underrepresentation in the interview pool.*

**Actions required in FFY 2014 response**

none

**OSEP Response**

The State reported that the data for this indicator were collected from a response group that was not representative of the population. OSEP notes that the State did not include strategies or improvement activities to address this issue in the future.

**Required Actions**

In the FFY 2016 SPP/APR, the State must report whether the FFY 2016 data are from a group representative of the population, and, if not, the actions the State is taking to address this issue.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)  
Indicator 15: Resolution Sessions**

Monitoring Priority: Effective General Supervision Part B / General Supervision

Results indicator: Percent of hearing requests that went to resolution sessions that were resolved through resolution session settlement agreements.

**Targets: Description of Stakeholder Input** - Please see the Stakeholder Involvement section of the [introduction](#).

Enter additional information about stakeholder involvement

NYSED consulted with the Commissioner's Advisory Panel for target setting for this indicator. To provide background to CAP for this discussion, a comprehensive data presentation on the State's due process system, including impartial hearings, mediation and resolution sessions was held in the spring of 2014. The target setting discussion then followed in the fall of 2014.

Considerations discussed for target setting included historical trends, the length of time it takes some districts (particularly NYC) to enter into settlement agreements which may have initiated from resolution meeting discussions and NYC's new proposed expedited settlement process. Mediation data was also considered, as were the reasons for the majority of requests for due process hearings (i.e., tuition reimbursement).

Stakeholders discussed the variability in factors that impact this Indicator. Since FFY 2008, the State used a variable target of an increase of two percent over the prior year data which was not clear to many stakeholders since the percentage target changed each year. The State considered these factors in its decision to change targets to a range.

**Prepopulated Data**

Source	Date	Description	Data	Overwrite Data
SY 2015-16 EMAPS IDEA Part B Dispute Resolution Survey; Section C: Due Process Complaints	11/2/2016	<a href="#">3.1(a) Number resolution sessions resolved through settlement agreements</a>	161	null
SY 2015-16 EMAPS IDEA Part B Dispute Resolution Survey; Section C: Due Process Complaints	11/2/2016	<a href="#">3.1 Number of resolution sessions</a>	5,036	null

**FFY 2015 SPP/APR Data**

3.1(a) Number resolution sessions resolved through settlement agreements	3.1 Number of resolution sessions	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
161	5,036	4.82%	7.00% - 8.00%	3.20%

**Explanation of Slippage**

The percent of hearing requests that went to resolution sessions and that were resolved through resolution session settlement agreements declined from 4.82 percent in FFY 2014 to 3.20 percent in FFY 2015. There was an increase in the number of issues included in all due process requests from 13,417 issues in FFY 2014 to 15,377 issues in FFY 2015, possibly affecting the ability to resolve the issues during the resolution period. There was also an increase in waivers of all or part of the resolution period in FFY 2015 (1,826), compared to FFY 2014 (1,772), which may have impacted the number of resolution period agreements. Forty-six (46) percent of all due process complaints in FFY 2015 involved parent tuition reimbursement; an issue that parents may feel needs an IHO's decision.

**FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)**

In addition, settlement negotiations between parents and the district may not occur in a timely manner; therefore, the 30-day resolution period ends prior to actual settlement. Issues may also be increasing in complexity, resulting in difficulty resolving the issues during the resolution period.

Provide additional information about this indicator (optional)

NYSED has accessed, and will continue to access, guidance from OSEP through its engagement in the Differentiated Monitoring and Support process, on ways to improve results for Indicator 15 .

Enter additional information about stakeholder involvement

NYSED consulted with the Commissioner's Advisory Panel (CAP) for target setting for this Indicator. To provide background to CAP for this discussion, a comprehensive data presentation on the State's due process system, including impartial hearings, mediation and resolution sessions was held in the spring of 2014. The target setting discussion then followed in the fall of 2014.

Considerations discussed for target setting included historical trends, the length of time it takes some districts (particularly NYC) to enter into settlement agreements which may have initiated from resolution meeting discussions and NYC's new proposed expedited settlement process. Mediation data was also considered, as were the reasons for the majority of requests for due process hearings (i.e., tuition reimbursement). Given the State's fluctuation in performance shown in the historical data, ranges for targets have been set.

**Prepopulated Data**

Source	Date	Description	Data	Overwrite Data
SY 2015-16 EMAPS IDEA Part B Dispute Resolution Survey; Section B: Mediation Requests	11/2/2016	<a href="#">2.1.a.i Mediations agreements related to due process complaints</a>	13	null
SY 2015-16 EMAPS IDEA Part B Dispute Resolution Survey; Section B: Mediation Requests	11/2/2016	<a href="#">2.1.b.i Mediations agreements not related to due process complaints</a>	163	null
SY 2015-16 EMAPS IDEA Part B Dispute Resolution Survey; Section B: Mediation Requests	11/2/2016	<a href="#">2.1 Mediations held</a>	212	null

**FFY 2015 SPP/APR Data**

2.1.a.i Mediations agreements related to due process complaints	2.1.b.i Mediations agreements not related to due process complaints	2.1 Mediations held	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data
13	163	212	88.53%	87.00% - 91.00%	83.02%

**Explanation of Slippage**

Due process complaints increased from 5,170 in FFY 2014 to 5,305 in FFY 2015. An increased use of the due process complaint process may have resulted in decreased use of mediation and, therefore, a decreased number of mediation agreements. Other possible reasons for the slippage include increased complexity and difficulty of the issues facing school districts and parents/students coming to mediation may result in fewer mediation agreements, and parents may prefer to work with an impartial hearing officer, rather than try to reach agreement with a district.

# FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR) Indicator 17: State Systemic Improvement Plan

Monitoring Priority: General Supervision

Results indicator: The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

## Overview

## Data Analysis

A description of how the State identified and analyzed key data, including data from SPP/APR indicators, 618 data collections, and other available data as applicable, to: (1) select the State-identified Measurable Result(s) for Children with Disabilities, and (2) identify root causes contributing to low performance. The description must include information about how the data were disaggregated by multiple variables (e.g., LEA, region, race/ethnicity, gender, disability category, placement, etc.). As part of its data analysis, the State should also consider compliance data and whether those data present potential barriers to improvement. In addition, if the State identifies any concerns about the quality of the data, the description must include how the State will address these concerns. Finally, if additional data are needed, the description should include the methods and timelines to collect and analyze the additional data.

See Attachment

## Analysis of State Infrastructure to Support Improvement and Build Capacity

A description of how the State analyzed the capacity of its current infrastructure to support improvement and build capacity in LEAs to implement, scale up, and sustain the use of evidence-based practices to improve results for children with disabilities. State systems that make up its infrastructure include, at a minimum: governance, fiscal, quality standards, professional development, data, technical assistance, and accountability/monitoring. The description must include current strengths of the systems, the extent the systems are coordinated, and areas for improvement of functioning within and across the systems. The State must also identify current State-level improvement plans and initiatives, including special and general education improvement plans and initiatives, and describe the extent that these initiatives are aligned, and how they are, or could be, integrated with, the SSIP. Finally, the State should identify representatives (e.g., offices, agencies, positions, individuals, and other stakeholders) that were involved in developing Phase I of the SSIP and that will be involved in developing and implementing Phase II of the SSIP.

See Attachment

## State-identified Measurable Result(s) for Children with Disabilities

A statement of the result(s) the State intends to achieve through the implementation of the SSIP. The State-identified result(s) must be aligned to an SPP/APR indicator or a component of an SPP/APR indicator. The State-identified result(s) must be clearly based on the Data and State Infrastructure Analyses and must be a child-level outcome in contrast to a process outcome. The State may select a single result (e.g., increasing the graduation rate for children with disabilities) or a cluster of related results (e.g., increasing the graduation rate and decreasing the dropout rate for children with disabilities).

## FFY 2015 Part B State Performance Plan (SPP)/Annual Performance Report (APR)

Statement

See Attachment

Description

See Attachment

### Selection of Coherent Improvement Strategies

An explanation of how the improvement strategies were selected, and why they are sound, logical and aligned, and will lead to a measurable improvement in the State-identified result(s). The improvement strategies should include the strategies, identified through the Data and State Infrastructure Analyses, that are needed to improve the State infrastructure and to support LEA implementation of evidence-based practices to improve the State-identified Measurable Result(s) for Children with Disabilities. The State must describe how implementation of the improvement strategies will address identified root causes for low performance and ultimately build LEA capacity to achieve the State-identified Measurable Result(s) for Children with Disabilities.

See attachment

### Theory of Action

A graphic illustration that shows the rationale of how implementing the coherent set of improvement strategies selected will increase the State's capacity to lead meaningful change in LEAs, and achieve improvement in the State-identified Measurable Result(s) for Children with Disabilities.

**Submitted Theory of Action:** No Theory of Action Submitted

Provide a description of the provided graphic illustration (optional)

Description of Illustration

See Attachment

**Infrastructure Development**

- (a) Specify improvements that will be made to the State infrastructure to better support EIS programs and providers to implement and scale up EBPs to improve results for infants and toddlers with disabilities and their families.
- (b) Identify the steps the State will take to further align and leverage current improvement plans and other early learning initiatives and programs in the State, including Race to the Top-Early Learning Challenge, Home Visiting Program, Early Head Start and others which impact infants and toddlers with disabilities and their families.
- (c) Identify who will be in charge of implementing the changes to infrastructure, resources needed, expected outcomes, and timelines for completing improvement efforts.
- (d) Specify how the State will involve multiple offices within the State Lead Agency, as well as other State agencies and stakeholders in the improvement of its infrastructure.

See attachment

**Support for EIS programs and providers Implementation of Evidence-Based Practices**

- (a) Specify how the State will support EIS providers in implementing the evidence-based practices that will result in changes in Lead Agency, EIS program, and EIS provider practices to achieve the SIMR(s) for infants and toddlers with disabilities and their families.
- (b) Identify steps and specific activities needed to implement the coherent improvement strategies, including communication strategies and stakeholder involvement; how identified barriers will be addressed; who will be in charge of implementing; how the activities will be implemented with fidelity; the resources that will be used to implement them; and timelines for completion.
- (c) Specify how the State will involve multiple offices within the Lead Agency (and other State agencies such as the SEA) to support EIS providers in scaling up and sustaining the implementation of the evidence-based practices once they have been implemented with fidelity.

See attachment

**Evaluation**

- (a) Specify how the evaluation is aligned to the theory of action and other components of the SSIP and the extent to which it includes short-term and long-term objectives to measure implementation of the SSIP and its impact on achieving measurable improvement in SIMR(s) for infants and toddlers with disabilities and their families.
- (b) Specify how the evaluation includes stakeholders and how information from the evaluation will be disseminated to stakeholders.
- (c) Specify the methods that the State will use to collect and analyze data to evaluate implementation and outcomes of the SSIP and the progress toward achieving intended improvements in the SIMR(s).
- (d) Specify how the State will use the evaluation data to examine the effectiveness of the implementation; assess the State's progress toward achieving intended improvements; and to make modifications to the SSIP as necessary.

See attachment

**Technical Assistance and Support**

Describe the support the State needs to develop and implement an effective SSIP. Areas to consider include: Infrastructure development; Support for EIS programs and providers implementation of EBP; Evaluation; and Stakeholder involvement in Phase II.
